Preface	
Plenary Lectures	P-1 to P-13
Section A: <i>Synthesis: monosaccharides, oligosaccharides, polysaccharides, nucleosides, antibiotics, carbohydrates as chiral synthons</i>	A-1 to A-168
Section B: <i>Determination of structure of simple and complex carbohydrates, glycoconjugates, oligonucleotides - Analytical methods (chromatography, X-ray, NMR, MS etc.) - Application in medicine and food chemistry</i>	B-1 to B-70
Section C: <i>Biochemistry, biosynthesis, biological role of carbohydrates, glycoconjugates, lectins, oligonucleotides, enzymes</i>	C-1 to C-77
Section D: <i>Industrial aspects and biotechnology of carbohydrates, sucrose, cyclodextrines, cellulose, starch, miscellaneous carbohydrates - Chemical, food and pharmaceutical industry</i>	D-1 to D-20
Author Index	I-1 to I-10
Subject Index	I-11 to I-17
