

268	2	Boundary Value Problems for Partial Differential Equations
269	2.1	Classical Solution Function Spaces
270	2.2	Classical Solutions
271	2.3	Weak Solutions, Approximation
272	2.4	Weak Solutions, Weak Derivatives
273	2.5	Weak Solutions, Applications of the Degree Theory
274	2.6	Weak Solutions, Applications of Monotone Operators
275	2.7	Weak Solutions, Applications of Variational Methods
282	3	General notation
283	Index	ix
<b>List of notation</b>		
1	1	1 Preliminaries
1.1	1	Elements of Linear Algebra
1.2	23	Normed Linear Spaces
2	55	2 Properties of Linear and Nonlinear Operators
2.1	55	Linear Operators
2.2	76	Compact Operators
2.3	91	Contraction Principle
3	103	3 Abstract Integral and Differential Calculus
3.1	103	Integration of Vector Functions
3.2	110	Differential Calculus in Normed Linear Spaces
4	129	4 Local Properties of Differentiable Mappings
4.1	129	Inverse Function Theorem
4.2	136	Implicit Function Theorem
4.3	145	Local Structure of Differentiable Maps, Bifurcations
5	171	5 Topological Methods
5.1	171	Brouwer and Schauder Fixed Point Theorems
5.2	183	Topological Degree
5.3	208	Theory of Monotone Operators
5.4	220	Supersolutions, Subsolutions, Monotone Iterations
6	231	6 Variational Methods
6.1	231	Local Extrema
6.2	245	Global Extrema
6.3	260	Relative Extrema and Lagrange Multipliers
6.4	274	Mountain Pass Theorem
6.5	284	Saddle Point Theorem

<b>7 Boundary Value Problems for Partial Differential Equations</b>	<b>293</b>
7.1 Classical Solution, Functional Setting . . . . .	293
7.2 Classical Solution, Applications . . . . .	297
7.3 Weak Solutions, Functional Setting . . . . .	299
7.4 Weak Solutions, Application of Fixed Point Theorems . . . . .	305
7.5 Weak Solutions, Application of the Degree Theory . . . . .	312
7.6 Weak Solutions, Application of Theory of Monotone Operators . . . . .	319
7.7 Weak Solutions, Application of Variational Methods . . . . .	323
