<b>1</b>	<b>Introduction</b>	<b>21</b>
<b>2</b>	<b>Inclusion of the course in the study programme</b>	<b>23</b>
2.1	Introduction to the course	23
2.2	Entry test	23
2.3	Analysis of Line – Basic relations of homogenous line	23
2.4	Infinite homogenous line	26
2.5	Voltage vs. current relations at the beginning and termination of line	30
2.6	Phase and group velocities of propagation	31
2.7	Delay of signal	33
2.8	Input impedance of homogenous line terminated variably	34
2.8.1	Impact of infinite line termination	34
2.8.2	Input impedance of nite line, terminated by impedance $Z_2 = Z_c$	35
2.8.3	Input impedance of open line	35
2.8.4	Input impedance of short-line	36
2.8.5	Input impedance of line terminated by common impedance $Z_2 \neq Z_c$	38
2.9	Lines practically infinite	38
2.10	Electrically short lines	39
2.11	Frequency dependence of primary and secondary parameters of variol types of line	41
2.11.1	Open air lines	41
2.11.2	Cable lines	48
2.12	Homogenous line at high frequencies	57
2.12.1	HF open air line	58
2.12.2	HF short line	62
2.13	Exercises	64

<b>3</b>	<b>Types of metallic lines and cables</b>	<b>65</b>
3.1	Open air lines	65
3.2	Cable lines	65
3.3	Electrical properties of metallic lines	73
3.4	Coil-loaded cables	77
3.5	Symmetrical HF cables and cables for digital transmission	82
3.6	Coaxial cables	82
3.7	Special cables	87
3.8	Structured cabling systems	90
3.9	xDSL Transmissions	95
3.10	Exercises	96
<b>4</b>	<b>Shortcomings of telecommunication cables and cable non-homogeneities</b>	<b>97</b>
4.1	Non-homogeneities of cables	97
4.2	Non-homogeneities of primary parameters	97
4.3	Asymmetry of partial capacitances and leakages	99
4.4	Magnetic asymmetries	103
4.5	Corrective measures against asymmetry	104
4.6	Non-homogeneities of lines	107
4.7	Exercises	110
<b>5</b>	<b>Wireless transmissions</b>	<b>111</b>
5.1	Radio transmissions	111
5.2	Satellite transmissions	112
5.3	Mobile transmissions	112
5.4	Optical transmissions	112
<b>6</b>	<b>Optical fibres and cables</b>	<b>114</b>
6.1	Basic principles of transmission	114
6.2	Types of optical fibres	116
6.3	Theory of optical transmission, loss and dispersion	124

6.4	Optical cables	127
6.5	Practical usage of optical fibres for high bit-rate transmission	140
6.5.1	Optical access networks	148
6.5.2	Triple Play services in FTTH systems	156
6.6	Exercises	162
<b>7</b>	<b>Appendix</b>	<b>163</b>
7.1	Exercise results of chapter 3.11	163
7.2	Exercise results of chapter 4.10	163
7.3	Results of chapter 5.7 exercise	163
7.4	Results of chapter 7.6 exercise	163
