

CONTENTS

List of used abbreviations and symbols	- 7 -
1. Introduction.....	- 9 -
2. Properties of alloys based on Fe_3Al	- 10 -
2.1. Iron aluminide phase structure round composition Fe_3Al	- 10 -
2.2. Mechanical properties of alloys based on Fe_3Al	- 12 -
2.3. Benefits of alloys based on Fe_3Al	- 15 -
2.4. Weldability of alloys based on Fe_3Al	- 16 -
3. Program SYSWELD and its structure	- 18 -
4. Input data for numerical simulations	- 20 -
4.1. Materials input data	- 20 -
4.1.1. Obtaining of input data for temperature-metallurgical analysis	- 21 -
4.1.1.1. Thermal conductivity coefficient λ	- 22 -
4.1.1.2. Specific heat capacity c	- 24 -
4.1.1.3. Density ρ	- 25 -
4.1.1.4. Heat transfer coefficient α	- 26 -
4.1.1.5. Input data entry for temperature-metallurgical analysis	- 30 -
4.1.2. Obtaining and entering input data for mechanical analysis	- 33 -
4.2. Definition and heat source shape description	- 37 -
4.2.1. Temperature field from double-ellipsoid heat source	- 39 -
4.2.2. 3D Gaussian, model for laser and electron beam welding	- 40 -
4.3. Volumetric model creation	- 41 -
5. Stress and deformation during welding	- 43 -
5.1. Relation between internal stress and deformation	- 44 -
5.2. Factors influencing internal stress and deformation	- 45 -
5.3. Experimental methods to determinate residual stress	- 47 -
6. Simulation in program Sysweld	- 49 -
6.1. Fundamentals for volumetric model creation	- 49 -
6.2. Creation and modification of heat source	- 52 -
6.2.1. Setting and heat source modification for simulation calculation	- 54 -
6.3. Output data presentation possibilities	- 57 -
6.4. Disadvantages of output data	- 60 -
7. Program MOVYPRO 07	- 62 -

8.	Iron aluminide Fe_3Al welding simulation based on real experiments	- 64 -
8.1.	Experimentally welding of specimen Fe_3Al	- 64 -
8.2.	Creation of simulation model	- 67 -
8.3.	Determination of smelted area.....	- 69 -
8.4.	Temperature field verification	- 69 -
8.5.	Residual stresses after welding analyze	- 72 -
8.6.	Critical places analyze by program MOVYPRO 07.....	- 75 -
9.	Conclusion.....	- 81 -
10.	References	- 83 -
11.	Appendixes.....	- 86 -
