INTRODUCTION	7
1. SAFETY, RELIABILITY AND RISK.....	8
1. 1 Traffic Accident Information System and Possibilities of Crash-risk Evaluation .	8
1. 1. 1 Introduction.....	8
1. 1. 2 Traffic Accident Statistics.....	9
1. 1. 3 Risk, Degree of Risk and Risk Factors.....	13
1. 1. 4 Probability of Traffic Accident Occurrence.....	15
1. 1. 5 Impact of Traffic Accident	15
1. 1. 6 Example of Application.....	16
1. 1. 7 Conclusion.....	23
1. 2 Possibilities of Quantified Risk Assessment.....	23
1. 2. 1 Introduction.....	23
1. 2. 2 Reliability, Risk Prediction and Safety Integrity	24
1. 2. 3 Risk Assessment (QRA)	27
1. 2. 4 Hazard identification	28
1. 2. 5 Conclusion.....	29
1. 3 Safety Assessment of Special Systems.....	31
1. 3. 1 Introduction.....	31
1. 3. 2 Failure and Hazard Analysis of the System	31
1. 3. 3 Software Safety Assessment	39
1. 3. 4 Conclusion.....	43
2. MODELING OF COMPLEX MECHANICAL SYSTEMS.....	44
2. 1 Tools and Processes for Affordable Vehicles	44
2. 1. 1 Introduction.....	44
2. 1. 2 Processes, Tools and Affordability.....	44
2. 1. 3 Value of Integration of Tools and Processes.....	45
2. 1. 4 Common Vehicle Design Attributes.....	50
2. 1. 5 Multidisciplinary Design Optimization	51
2. 1. 6 Integrated Tools for Qualification by Analysis	52
2. 2 Architecture of Tools and Processes for Affordable Vehicles	53
2. 2. 1 Introduction.....	53

2. 2. 2 Engineering tools integration	54
2. 2. 3 Functional Needs and Architecture	55
2. 2. 4 Process Representation and Communication of Distributed Data, Application, and Vested Participants	59
2. 2. 5 Modularity – Maximization of Reuse	61
2. 3 Virtual Approach to Ground Vehicles Design	61
2. 3. 1 Introduction	61
2. 3. 2 Calculation in the Development process	62
2. 3. 3 Virtual Prototypes in the Design Process	63
2. 3. 4 Structural Analysis and Design	65
2. 3. 5 Suspension Analysis and Design	65
2. 3. 6 MBS Model of Vehicle Dynamic and Mobility	67
2. 3. 7 Use of Simulation for Mine Protection Development	69
2. 3. 8 Conclusion	72
2. 4 Model of Lubricating Oil Filling-up, Modification, and Degradation in the Combustion Engines	73
2. 4. 1 Introduction	73
2. 4. 2 Model of oil filling-up and renewal	73
2. 4. 3 Model of operational assessment of lubricating medium	77
2. 4. 4 Conclusion	80
2. 5 Mechanical Systems Wear and Degradation Processes Modeling	80
2. 5. 1 Introduction – Evaluation of Machine Sets Wear Mode	80
2. 5. 2 Trend Evaluation of the Wear Mode	83
2. 5. 3 Multi-dimensional Statistical Evaluation	89
2. 5. 4 Results and Discussion	92
2. 5. 5 Conclusion	94
3. TRIBOLOGY, DIAGNOSTICS, MAINTENANCE, RELIABILITY, THEORY AND APPLICATION	95
3. 1 Engine Failure and its Avoidance – tribology's Contribution to Efficient Maintenance	95
3. 1. 1 Introduction	95
3. 1. 2 Tribological principles	95
3. 1. 3 Failure Diagnoses	97
3. 1. 4 Condition-based Maintenance	99
3. 1. 5 Wear Analysis	102
3. 1. 6 Conclusion	105

3. 2 The Enhancement of Vehicle Availability trough Advanced Maintenance Concept 106

3. 2. 1 Introduction 106

3. 2. 2 Mission Reliability and Availability/Readiness are Directly Linked 106

3. 2. 3 Trade-Offs and the Relationship Between Availability and Life-Cycle cost 107

3. 2. 4 Key Drivers and Performance Indicators of Vehicles Availability 108

3. 2. 5 Major Trends in Some NATO Countries 111

3. 2. 6 HUM and PHM Systems 114

3. 2. 7 Integrated Logistic Support (ILS) 115

3. 2. 8 Conclusion..... 117

3. 3 Operation Reliability and Diagnostics of Mechanical Systems..... 118

3. 3. 1 Introduction..... 118

3. 3. 2 Failure relationship analysis..... 119

3. 3. 3 Application of Monitoring the Operation Information on Failure Rate with the use of Correlation and Regression analysis..... 124

3. 3. 4 Conclusion..... 127

3. 4 Fetigue Wear – Theory and Application 128

3. 4. 1 Introduction..... 128

3. 4. 2 Fatigue wear during sliding 129

3. 4. 3 Fatigue wear during rolling 136

3. 4. 4 Conclusion..... 148

4. UP-TO-DATE METHODS AND THEIR USING IN SPECIAL TECHNIQUE.....149

4. 1 Possibilities of Nanotechnology Defense Application: 149

4. 1. 1 Introduction..... 149

4. 1. 2 Fabrication for nanotechnology..... 150

4. 1. 3 Nanomaterials 152

4. 1. 4 Nanotechnology in defense applications..... 154

4. 1. 5 The evolving capability and the vision 155

4. 1. 6 Practical examples and developments 156

4. 1. 7 Conclusion..... 158

4. 2 Active Vibration Control –Automotive Application 160

4. 2. 1 Introduction..... 160

4. 2. 2 System Description..... 160

4. 2. 3 Design and Algorithm of Control System 162

4. 2. 4 Results 165

4. 2. 5 Conclusion.....	168
4. 3 Fuzzy Logic System - Method to Apply to Break down Diagnosis and CM for Maintenance	168
4. 3. 1 Introduction.....	168
4. 3. 2 Fuzzy Logic System.....	170
4. 3. 3 Establishing the Antecedent Part of the Rule.....	172
4. 3. 4 Establishing the Consequent Part of a Rule	173
4. 3. 5 Inferring the output corresponding to a given input: fuzzy reasoning and.....	173
aggregation.....	173
4. 3. 6 Interpretation of fuzzy rules.....	176
4. 3. 7 Conclusion.....	176
4. 4 Genetic Algorithms - Method to Apply to Break down Diagnosis and CM for Maintenance	177
4. 4. 1 Introduction.....	177
4. 4. 2 Genetic Algorithms.....	178
4. 4. 3 Definition and creation of the individual population	180
4. 4. 4 The traditional breeding algorithm	181
4. 4. 5 Conclusion.....	183
4. 5 Artificial Neural Networks - Method to Apply to Break down Diagnosis and CM for Maintenance	184
4. 5. 1 Introduction.....	184
4. 5. 2 Artificial neural networks	185
4. 5. 3 Feedforward artificial neural networks for regression	187
4. 5. 4 Uncertainty of Neural Network	190
4. 5. 5 Conclusion.....	192
