1. Green forage	5
1.1. Definition and botanical characterisation	5
1.2. Production and feedstuffs utilisation	22
1.3. Fresh green annual crops production grown on arable soil	27
Maize ( <i>Zea mays</i> )	27
Sorghum, millet, bristle grass, foxtail, Sudan grass harvested green	34
Oats harvested green	35
Spring barley harvested green	35
Winter rye harvested green	35
Winter wheat harvested green	35
Triticale harvested green	35
Winter barley harvested green	36
Sunflower harvested green	36
Bean harvested green	36
Erect mallow	37
Phacelia harvested green	37
Spurrey harvested green	38
Buckwheat harvested green	38
Legume-cereal mixtures harvested green	38
Cruciferous forages harvested green	39
Annual ryegrass (Westerwold)	40
1.4. Green (fresh) fodder of permanent plants grown on arable soil	42
Perennial legumes	42
Lucerne-grass and clover-grass utilized green	47
1.5. Permanent grasslands	47
Meadows	51
Pastures	58

Grasses harvested facultative	66
1.6. Feedstuff from conventional and ecological farming	66
1.7. Maximal daily dosage of green feeds for different kind of animals	74
1.8. Summary	74
Literature	82
2. Ensiled green forage	83
2.1. Preserved green feeds	83
2.2. Summary	90
