

# CONTENTS

Preface

<b>1</b>	<b>Introduction</b> .....	1
<b>2</b>	<b>Kinematics of Spatial Body Motion</b> .....	5
2.1	Theory of the Linear Complex .....	6
2.2	Theory of Screws .....	11
2.3	Axodes of the Relative Motion, Plücker Conoid .....	13
<b>3</b>	<b>Conjugate Tooth Surfaces</b> .....	23
3.1	Matrix Notation .....	24
3.1.1	Screw Motion .....	25
3.1.2	Generating Conjugate Profiles According to Envelope Principle.....	25
3.1.3	Profile Description Using Spline Function .....	26
3.1.4	Profile Description Using Spline Function .....	26
3.2	Screw Surface Profiles .....	27
3.2.1	Geometry of the SRM “A” Profile.....	28
3.2.2	Geometry of the SLF4 Profile.....	30
3.2.3	Geometry Problem on Addendum of the Main Rotor and Dedendum of the Gate Rotor with the SRM “A” Profile .....	33
3.2.4	Connecting of Profile Curves on Addendum of the Gate Rotor with the SLF4 Profile .....	35
<b>4</b>	<b>Theory of Generating Hobbing Cutter for Rotor Gearing</b> .....	45
4.1	Tool Surface .....	47
4.1.1	Normal Line of the Surface $\sigma_K$ .....	51
4.1.2	Relative Velocity .....	53
4.1.3	Equation of the Tool Surface .....	54
4.2	Cutting Edge.....	55
4.3	Kinematic Conditions on the Cutting Edge.....	57
4.4	Application to Rotors with the SLF4 Profile .....	58
<b>5</b>	<b>Working Space, Clearance and Shape Optimization</b> .....	65
5.1	Working Space and its Boundary Surface.....	66

5.2	Spatial Model of the Blow-Hole Area.....	69
5.2.1	Loss-Making Surface .....	70
5.2.2	Loss-Making Space.....	73
5.2.2.1	Surface $F_1$ .....	74
5.2.2.2	Surface $F_2$ .....	75
5.2.2.3	Cover Surfaces $M_1$ and $M_2$ .....	76
5.2.2.4	Side Surface $X_1$ and $X_2$ .....	79
5.3	Optimization of the Working Space.....	81
5.3.1	Geometry of Tooth Profiles.....	82
5.3.1.1	Curve $k_5$ .....	83
5.3.1.2	Curve $k_1$ .....	84
5.3.1.3	Curve $k_9$ .....	85
5.3.1.4	Curve $k_{11}$ .....	85
5.3.1.5	Addendum Circle $k_{a2}$ of the Gate Rotor .....	87
5.3.1.6	Addendum Circle $k_{a3}$ of the Main Rotor.....	90
5.3.2	Optimization of the Geometric Parameters.....	91
<b>6</b>	<b>Operational Vibrations and Experimental Dynamic Analysis .....</b>	<b>95</b>
6.1	Measuring of Vibration .....	96
6.2	Estimation of Frequency Spectra .....	97
6.3	Experimental Modal Rotor Analysis.....	100
6.4	Diagnosis of Operational Vibration .....	101
<b>7</b>	<b>Housing and Rotors Operational Distortion.....</b>	<b>103</b>
7.1	Force Field.....	104
7.2	Temperature Field .....	107
7.3	Housing and Rotor Distortion .....	108
7.3.1	Housing Distortion .....	108
7.3.2	Rotor Distortion.....	109
7.3.2.1	Computing Temperature Analysis .....	109
7.3.2.2	Experimental Temperature Analysis.....	115
<b>8</b>	<b>Contact of Tooth Surfaces .....</b>	<b>119</b>
8.1	Correct Contact .....	120
8.2	Incorrect Contact.....	124

8.2.1 Parallel Displacement of Axes .....	125
8.2.2 General Displacement of Axes.....	129
8.2.3 Instantaneous Gear Ratio .....	133
8.2.4 Force Loading of Rotors .....	136
8.2.5 Leakage Flow .....	141
<b>9 Curvature of Surfaces in Contact Point.....</b>	<b>145</b>
9.1 Method of Solution.....	146
9.2 Basic Geometry of the Surface $\sigma_2$ .....	148
9.3 Surface $\sigma_2^\Delta$ .....	148
9.3.1 Point of Contact.....	149
9.3.2 Principal Curvatures .....	150
9.3.3 Direction of Principal Curvatures .....	154
9.4 Surface $\sigma_3^\Delta$ .....	155
9.4.1 Point of Contact.....	155
9.4.2 Principal Curvatures .....	157
9.4.3 Direction of Principal Curvatures .....	161
<b>10 Conclusion.....</b>	<b>163</b>
<b>References .....</b>	<b>165</b>
<b>Subject index.....</b>	<b>171</b>
