

Contents

1	Introduction	1
1.1	Objectives of This Book	3
1.1.1	Overview of the State of the Art	4
1.1.2	Component Model for Mobile Architectures	4
1.1.3	Application of the Component Model in SOA	5
1.1.4	Software Development Process	5
1.1.5	Case Study	5
1.2	Structure of This Book	5

Part I State of the Art

2	Formal Bases	9
2.1	Labelled Transition Systems	10
2.2	Communicating Sequential Processes	11
2.3	Calculus of Mobile Processes	13
2.3.1	Operational Semantics	16
2.3.2	Congruences of Processes	17
3	Software Component Architecture	21
3.1	Software Architecture	21
3.2	Component-Based Development	22
3.3	Component Models	23
3.3.1	Wright	23
3.3.2	Darwin and Tracta	25
3.3.3	SOFA	26
3.3.4	SOFA 2.0	27
3.3.5	Fractal	28
3.4	Architecture Description Languages	30
3.4.1	ACME	31
3.4.2	Unified Modelling Language	31

3.4.3	ArchWare ADL	34
4	Service Oriented Architecture	37
4.1	Design of Services	37
4.1.1	Business Process Modelling	38
4.1.2	Business-to-Service Transformation	39
4.1.3	Service Composition	39
4.2	Implementation of Services	40
4.3	Services and Components	41
4.3.1	Service Component Architecture	41

Part II Component Model for Mobile Architectures

5	Component Model	47
5.1	Logical View	47
5.1.1	Metamodel	49
5.1.2	System Model	55
5.2	Process View	58
5.2.1	Notation	59
5.2.2	Interface's References and Binding	60
5.2.3	Control of a Component's Life-cycle	61
5.2.4	Cloning of Components and Updating of Subcomponents	62
5.2.5	Primitive and Composite Components	63
5.3	An Example of a Component-Based System and its Description	64
5.3.1	Definition of the Components' Implementations	65
5.3.2	Description of the Component Based System	67
6	Behavioural Modelling of Services	69
6.1	Service as a Part of Service Oriented Architecture	70
6.1.1	Communication of Services and Service Broker	70
6.2	Service as a Component Based System	71
6.3	An Example of a Service-Oriented Architecture	73
6.3.1	Service Identification	73
6.3.2	Service Model	75
6.3.3	Description of Services as Entities of SOA	77
6.3.4	Description of Services as Component-Based Systems ..	78

Part III Application

7	Development Process	83
7.1	Application of the Behavioural Modelling of Services	83
7.2	Application of the Component Model	84
7.3	Integration of a Formal Description	86

8	Tools	87
8.1	Component Modelling Tools	87
8.1.1	Component Diagrams in UML	87
8.1.2	A Tool for Modelling of Component-Based Systems	88
8.2	Verification Tools	90
8.2.1	The Mobility Workbench (MWB)	92
8.2.2	Another/Advanced Bisimulation Checker (ABC)	93
8.2.3	Pi-Calculus Equivalences Tester (PiET)	93
9	Case Study	95
9.1	System Description	96
9.2	Service Identification	97
9.3	Component-Based System	100
9.4	Formal Description of the Service-Oriented Architecture	102
9.5	Formal Description of the Component-Based System	104
9.6	System Properties and Their Verification	108
9.6.1	Simulation	108
9.6.2	Deadlocks	109
9.6.3	Bisimulation Checking	110
9.6.4	Model Checking	111
9.7	Evaluation and Conclusion	112
9.7.1	Important Merits	113
9.7.2	Possible Drawbacks	114

Part IV Conclusion

10	Summary	117
11	Future Research Directions	119
	References	121
	Acronyms	129

Part V Appendices

Process Descriptions from the Case-Study in MWB/ABC	135
A.1 Control Parts of Components	135
A.2 Core Behaviour of the Components	136
A.3 Complete Behaviour of the Subcomponents	137
A.4 Behaviour of the Composite Component	138
A.5 Services of SOA	139
