1	Introduction.....	1
1.1	Thesis Structure.....	4
2	Interconnection Networks.....	7
2.1	Network Basics.....	7
2.2	Topology.....	8
2.2.1	Channels and Nodes.....	9
2.2.2	Direct and Indirect Networks.....	10
2.2.3	Cuts and Bisection.....	10
2.2.4	Paths.....	12
2.2.5	Symmetry.....	12
2.3	Switching.....	12
2.3.1	Messages, Packets, Flits and Piths.....	13
2.3.2	Circuit Switching.....	15
2.3.3	Store-and-Forward Switching.....	15
2.3.4	Virtual Cut-Through Switching.....	17
2.3.5	Wormhole Switching.....	17
2.4	Routing.....	19
2.4.1	Deterministic Routing.....	20
2.4.2	Oblivious Routing.....	20
2.4.3	Adaptive Routing.....	23
2.4.4	Deadlock and Livelock.....	24
3	Collective Communications in Wormhole Networks.....	27
3.1	Model of Communication.....	27
3.2	Classification of Collective Communications.....	29
3.3	One-to-All and All-to-One Communications.....	30
3.3.1	Broadcast and Reduce Communications.....	31
3.3.2	Scatter and Gather Communications.....	32
3.4	All-to-All Communications.....	34
3.4.1	All-to-all Broadcast Communication.....	34
3.4.2	All-to-all Scatter Communications.....	34

VIII Contents

3.5	General Many-to-Many Communications	38
3.5.1	Overlapping Many-to-Many Communications	38
3.5.2	Many-to-Many Communications with $R \subset T$	39
3.5.3	Many-to-Many Communications with $T \subset R$	39
3.5.4	More Complicated Many-to-Many Communications	40
3.5.5	Example Calculation of Lower Bounds	40
4	Scheduling of Wormhole Collective Communications	43
4.1	Interconnection Networks	44
4.1.1	The Most Popular Interconnection Networks	44
4.1.2	Optimal Diameter-Degree Networks	45
4.1.3	Novel Network Architectures	46
4.2	Scheduling of Collective Communications	49
4.2.1	OAS Scheduling	50
4.2.2	AAS Scheduling	50
4.2.3	OAB Scheduling	52
4.2.4	AAB Scheduling	55
4.3	Conclusions and Outstanding Problems	56
5	Evolutionary Algorithms	59
5.1	Genetic Algorithms	60
5.1.1	Encoding Issue	61
5.1.2	Genetic Operators	64
5.1.3	Selection and Replacement Mechanisms	67
5.1.4	Creation of Initial Population	69
5.1.5	Fitness Function	69
5.1.6	Values for the Parameters of GA	69
5.2	Estimation of Distribution Algorithms	70
5.2.1	EDA without Interactions	71
5.2.2	EDA with Pairwise Interactions	71
5.2.3	EDA with Multivariate Interactions	73
6	Evolutionary Design of Collective Communications	75
6.1	Input Data Structure and Preprocessing	75
6.1.1	Input Data Preprocessing	76
6.2	Scatter Encoding	78
6.2.1	Definition of the Scatter Encoding	78
6.2.2	Features of the Scatter Encoding	80
6.2.3	Graphic Visualization of a Scatter Chromosome	80
6.3	Broadcast Encoding	81
6.3.1	Definition of the Broadcast Encoding	81
6.3.2	Features of the Broadcast Encoding	83
6.3.3	Graphic Visualization of a Broadcast Chromosome	84
6.4	Fitness Function Definition	84
6.4.1	Formal Definition of the Fitness Function	85
6.4.2	Graphic Visualization of the Fitness Function	86

6.5	Acceleration and Restoration Heuristics	87
6.5.1	Port Based Acceleration Heuristic	87
6.5.2	Transfer Swap Heuristic	89
6.5.3	Restoration of Broadcast Chromosomes	89
6.5.4	Initial Population Building Heuristic	91
6.5.5	Restricted Surrounding Heuristic	91
6.6	Mutation Operator	92
7	Optimization Tools and Parameters Adjustments	95
7.1	Optimization Tools	95
7.1.1	Standard Genetic Algorithm	96
7.1.2	Mixed Bayesian Optimization Algorithm	96
7.1.3	Univariate Marginal Distribution Algorithm	97
7.2	Experimental Comparison of Solution Quality	98
7.2.1	Solution Quality Produced by SGA	98
7.2.2	Solution Quality Produced by MBOA	101
7.2.3	Solution Quality Produced by UMDA	102
7.2.4	Summary	103
7.3	Experimental Comparison of Tool Speed	105
7.4	Experimental Comparison of Tool Scalability	106
7.4.1	Tool Scalability of Scatter Based Communications	107
7.4.2	Tool Scalability of Broadcast Based Communications	108
7.4.3	Summary	110
7.5	Conclusions	111
8	Experimental Results of the Quest for High Quality Schedules	113
8.1	Common Interconnection Topologies	113
8.1.1	Hypercubes	114
8.1.2	Rings	116
8.1.3	Meshes and Tori	119
8.2	Optimal Diameter-Degree Topologies	121
8.3	Novel Network Architectures	122
8.4	Multistage Topologies	124
8.5	Fat Topologies	128
8.6	Faulty Topologies	132
8.7	Many-to-Many Communications	134
8.8	Summary	136
9	Conclusions	139
9.1	Contributions of the Thesis	141
9.2	Future work	142
	References	145
	Appendix	159
