

## CONTENTS

INTRODUCTION.....	9
1. THEORETICAL, LEGAL AND METHODOLOGICAL ASSUMPTIONS .....	13
1.1. Mining waterflooded subsidence reservoirs, their genesis.....	13
1.2. Mining subsidence reservoirs as environmental islands .....	17
1.3. Socio-economic and educational function of waterflooded subsidence reservoirs .....	21
1.4. Land reclamation methods of mining waterflooded subsidence reservoirs .....	29
2. STUDIES ON MINING SUBSIDENCE RESERVOIRS IN THE AREA OF COAL BASIN UPPER SILESIA.....	39
2.1. Criteria for the selection of research objects, their localization and description .....	39
2.1.1. General description of the reservoirs .....	42
2.2. Methods .....	49
2.2.1. Methods of vegetation research.....	49
2.2.2. Research of water and bottom sediments.....	52
2.2.3. Methods of soil research.....	53
2.3. Floristic diversity of mining subsidence reservoirs .....	54
2.4. Phytocoenotic and biotopic diversity of mining subsidence reservoirs.....	61
2.5. Chemistry of water and bottom sediments as factors influencing biodiversity .....	69
3. Practical guidelines for land reclamation of mining subsidence reservoirs...	83
3.1. Hitherto experiences with land reclamation of mining subsidence reservoirs and their importance for nature conservation as well as nature landscape protection .....	83
3.2. Reasons essential for the procedures of reclamation and mining subsidence reservoirs management.....	91
4. BIBLIOGRAPHY.....	95
5. SUMMARY .....	106
6. ANNEX.....	109
6.1. List of Colour Pictures .....	109
6.2. Colour Pictures .....	111
