

Contents

Preface	iii
1 Introduction	1
2 New Language Resources and Tools	7
2.1 VerbaLex – New Comprehensive Lexicon of Verb Valencies for Czech	10
2.1.1 Linguistic Requirements for the VerbaLex Format	11
2.1.2 Semantic Roles	14
2.1.3 The Implementation of Editing and Exporting Tools	18
2.1.4 Application of VerbaLex in Syntactic Analysis . .	23
2.2 VisDic – Off-line WordNet Editor	25
2.2.1 Basic Functionality	25
2.2.2 Advanced Functionality	28
2.2.3 XML Configuration	31
2.3 DEBVisDic and other DEB Platform Applications	39
2.3.1 The Features of the Platform for Lexicographers’ Tools	40
2.3.2 Assets of the DEB Platform	43
2.3.3 The DEB Administration Interface	44
2.3.4 How To Make a Sample Dictionary	50
2.3.5 Usage Variability – The Users’ Interfaces	54
2.4 Future Work on the Language Resources and NLP Tools .	66
3 synt – Czech Syntax Analyzer	69
3.1 The Grammar Development Process	73

3.1.1	Grammar Development Workbench	73
3.2	New Meta-grammar Constructs in synt	76
3.2.1	The Meta-grammar Design	77
3.2.2	The Parsing Algorithm	82
3.2.3	Evaluation of Contextual Constraints	83
3.2.4	The synt Parser Implementation	84
3.3	Best Analysis Selection – a Supervised Construction of Pruning Constraints	87
3.4	Parsing with Verb Frame Information	89
3.4.1	Automatic Extraction of Verb Frames from the Pack- ed Shared Forest	91
3.4.2	Examples	92
3.5	The Beautified Chart Method – Pruning Technique Based on Linguistic Adequacy	94
3.5.1	Beautified Trees	95
3.5.2	The Previous Estimate of the Effect of the Beauti- fied Chart Method	97
3.5.3	The Beautified Chart Algorithm	101
3.5.4	The Beautified Chart Results	105
3.6	Parser Comparison Experiments	106
3.6.1	synt and Moore’s parser	106
3.6.2	Phrasal synt Compared with Dependency Parsers	107
3.7	Further Development of synt	116
4	Transparent Intensional Logic as a Way to Semantics	119
4.1	Overview of the Transparent Intensional Logic	121
4.1.1	TIL Types	122
4.2	The Logical Analysis of a Sentence	124
4.2.1	Verb Frame Analysis	126
4.2.2	The Sentence Analysis	130
4.3	Sentence Logical Analysis Using Complex Valency Frames	134
4.3.1	Examples of Logical Analysis	136
4.4	TIL Knowledge Base Representation	142
4.4.1	Knowledge Base Implementation – the Dolphin Sys- tem	144
4.5	Experiment of Using TIL in a Simulation System Easel	153
4.5.1	Using TIL and Easel in Applications	154
4.6	Long Way to Full Natural Language Semantics	156

5	Application in Dialogues – the Electrical Power Systems Simulation	159
5.1	Multi-Agent Framework for EPS Simulation and Monitoring	163
5.1.1	The Rice System Architecture	165
5.2	Human-machine Dialogues with the Rice System	179
5.2.1	Building a Specialized Corpus	180
5.2.2	Morphological Tagging	182
5.2.3	Syntactic Analysis of the Domain Texts	182
5.2.4	Designing an Intelligent Dialogue Interface	184
5.3	Rice Usage Scenarios	188
5.3.1	Example Nodes Implementation	192
5.4	Modelling of Economic Aspects of a Power System Failure	196
5.4.1	Network Parts	199
5.4.2	The Agents Implementation	201
5.4.3	The Simulation Run	204
5.5	Future Work on the Rice System	206
6	Conclusions and Future Directions	207
	Bibliography	211
	Annotation	227
