# Contents

<b>Preface</b>	<b>6</b>
<b>1 Sets</b>	<b>7</b>
1.1 Basic notions . . . . .	7
1.2 Russell's Paradox . . . . .	13
1.3 Exercises . . . . .	14
<b>2 Cardinality of Sets</b>	<b>19</b>
2.1 Cardinality of sets . . . . .	19
2.2 More about Cardinalities . . . . .	26
2.3 Exercises . . . . .	27
<b>3 Graphs</b>	<b>33</b>
3.1 Basic notions . . . . .	33
3.2 Trees . . . . .	38
3.3 Exercises . . . . .	41
<b>4 Relations</b>	<b>43</b>
4.1 Binary relations . . . . .	43
4.2 Operations with relations . . . . .	45
4.3 Relations on a set . . . . .	47
4.4 Exercises . . . . .	53
<b>5 Propositional Logic</b>	<b>61</b>
5.1 Formal Syntax of Propositional Logic . . . . .	62
5.2 Truth valuations of formulas . . . . .	64
5.3 Connection to logical circuits . . . . .	69
5.4 Exercises . . . . .	69

<b>6</b>	<b>Semantical Consequence, Tautological Equivalence</b>	<b>75</b>
6.1	Semantical Consequence . . . . .	75
6.2	Tautological Equivalence of Formulas . . . . .	79
6.3	Exercises . . . . .	82
<b>7</b>	<b>Complete Systems of Logical Connectives</b>	<b>87</b>
7.1	Further Logical Connectives . . . . .	87
7.2	Complete Systems of Logical Connectives . . . . .	89
7.3	An Example of a More Difficult Proof . . . . .	93
7.4	Exercises . . . . .	96
<b>8</b>	<b>Conjunctive and Disjunctive Normal Forms</b>	<b>101</b>
8.1	Boolean functions of several variables . . . . .	101
8.2	Disjunctive Normal Forms . . . . .	103
8.3	Conjunctive Normal Forms . . . . .	105
8.4	Boolean Calculus . . . . .	107
8.5	Exercises . . . . .	109
<b>9</b>	<b>Deduction in Propositional Logic</b>	<b>113</b>
9.1	Natural Deduction . . . . .	113
9.2	Completeness Theorem for Natural Deduction . . . . .	120
9.3	Exercises . . . . .	122
<b>10</b>	<b>Resolution Method in Propositional Logic</b>	<b>127</b>
10.1	Resolvents . . . . .	128
10.2	Resolution Principle . . . . .	130
10.3	Exercises . . . . .	138
<b>11</b>	<b>Predicate Logic</b>	<b>141</b>
11.1	An Informal Description of Predicate Logic . . . . .	142
11.2	Formal Syntax of Predicate Logic, Formulas . . . . .	146
11.3	Exercises . . . . .	151
<b>12</b>	<b>Semantics of Predicate Logic</b>	<b>157</b>
12.1	Interpretation . . . . .	159
12.2	Tautologies, Contradictions, and Satisfiable Sentences . . . . .	164
12.3	Semantical Consequence and Tautological Equivalence . . . . .	169
12.4	Exercises . . . . .	173

---

<b>13 Natural Deduction in Predicate Logic</b>	<b>185</b>
13.1 Natural Deduction . . . . .	185
13.2 The Completeness Theorem . . . . .	191
13.3 Exercises . . . . .	193
<b>14 Resolution Method in Predicate Logic</b>	<b>195</b>
14.1 Resolvents . . . . .	196
14.2 Resolution Principle . . . . .	199
14.3 A Clausal Form of a Sentence . . . . .	203
14.4 Skolemization . . . . .	204
14.5 Examples How to Use the Resolution Method in Predicate Logic	208
14.6 Exercises . . . . .	213
<b>Appendix</b>	<b>219</b>
