

Contents

1.	INTRODUCTION.....	9
1.1.	TYPICAL EXAMPLES OF TERRORIST ATTACKS FROM OFFICIAL RESOURCES IN THE LAST DECADE.....	9
2.	BASIC CONSIDERATIONS	
2.1.	TERMINOLOGY AND CLASSIFICATION OF THE DESIGNING BLAST PROTECTIVE STRUCTURES FOR MILITARY AND CIVILIAN USE.....	13
2.1.1	BALANCED SURVIVABILITY.....	13
2.1.2	SITE PLANNING.....	14
2.1.3	BUILDING LAYOUT.....	15
2.1.4	ASSESSMENT TERRORIST THREATS.....	16
2.1.5	OBSERVATIONS OF CONVENTIONAL STRUCTURES.....	18
2.2	THE MOST IMPORTANT RESOURCES OF TERRORIST ATTACKS.....	18
2.3	LIST OF MAIN STANDARDS AND RECOMMENDATIONS.....	19
3.	DESCRIPTION AND TERMINOLOGY OF PHENOMENA OF SHOCK WAVE..	21
4.	STATE OF THE ART.....	29
4.1	EXAMPLES OF EXPERIMENTS OF PROTECTIVE STRUCTURES.....	29
4.2	NUMERICAL METHODS – GNOM 3D AND AUTODYN 3D AND WHAT-NOT.....	37
4.3	EXAMPLES OF THE STRUCTURES (DUMPERS – PROTECTION WALLS AND STRUCTURES) ALASKA, TEXAS T-TYPE BARRIERS, WATERWALL AND ETC.	44
5.	MATHEMATICAL MODEL: BASIC EQUATIONS.....	61
5.1	BASIC FORMULAS BASED ON LANDAU AND LIFTSCHITZ THEORY.....	62
5.2	EQUATIONS OF MOTION, CALCULATED PARAMETERS.....	63
5.3	CALCULATION SCHEMES.....	69
5.4	RESULTS.....	69
6.	NUMERICAL SOLUTION.....	73
6.1	FULL VIEW OF THE EQUATIONS OF GAS DYNAMICS.....	73
6.2	EQUATIONS IN DIMENSIONLESS VARIABLES.....	73

6.3	RELATIONS ON THE SHOCK WAVE.....	74
6.4	RELATIONS ON THE WAVE OF DILUTION.....	75
6.5	ALGEBRAIC EQUATION FOR PRESSURE ON CONTACT RIP.....	77
6.6	CORRECTION FOR COUNTING OF QUANTITIES.....	80
6.7	LAWS OF CONSERVATION AS INTEGRAL PROPORTIONS.....	81
7.	GALERKIN-PETROV DISCONTINUOUS FINITE ELEMENT METHOD.....	83
7.1	INTRODUCTION.....	83
7.2	CONSERVATION EQUATIONS.....	86
7.2.1	CONSERVATION OF MASS DENSITY.....	87
7.2.2	CONSERVATION OF MOMENTUM.....	88
7.2.3	CONSERVATION OF ENERGY.....	89
7.3	VARIATIONAL FORMULATION.....	91
7.3.1	LINEAR PROBLEM.....	91
7.3.2	NONLINEAR PROBLEM.....	93
7.4	SOLUTION OF THE ARCH.....	94
7.5	GENERAL PROCEDURE FOR SOLVING COUPLED PROBLEM.....	95
7.6	RESULTS.....	96
7.7	CONCLUSIONS TO THIS METHOD.....	97
8.	IMPACT OF A BLAST IN UNDERGROUND PARKING BASED ON FREE HEXAGONS.....	103
8.1	BOUNDARY ELEMENT SOLUTION IN ONE ELEMENT.....	104
8.2	STATIC CONTACT CONDITIONS.....	106
8.3	FISCHERA'S CONDITIONS.....	107
8.4	PENALTY FORMULATION.....	108
8.6	SPRING STIFFNESSES.....	110
8.7	ADDITIONAL DYNAMICAL FORCES INSIDE THE PARTICLES WITH FIXED NEIGHBORHOOD.....	113
8.8	ALGORITHM FOR TIME INVOLVEMENT INTO DEM.....	114
8.9	EXAMPLE.....	117
8.10	CONCLUSIONS.....	119
9.	EXPERIMENTAL WORK CONDUCTED FOR THE PROBLEMATIC.....	121
9.1	CALCULATION THEORY.....	121
9.2	RESULTS OF EXPERIMENTS.....	125
10.	CONCLUSIONS.....	127
11.	REFERENCES.....	131
