

CONTENTS

Introduction	7
Section: Water quality related problems	9
<i>Sediment fluxes within large watershed systems versus data availability – future visions (abstract)</i>	
Dostal T., Krása, J., Becvar M., Jakubikova A., Vrana K.	9
<i>Preliminary Determination of Erosion Standards Regarding Water Eutrophication (abstract)</i>	
Pavel Rosendorf	10
<i>Eutrophication as an effect of soil erosion and high soil phosphorus content – a case study from the Western lake Vansjø catchment (abstract)</i>	
Marianne Bechmann	16
<i>Suspended sediment and phosphorus dynamics in small heterogeneous river systems – a case study from Northern Luxembourg (abstract)</i>	
Andreas Krein, Nuria Martínez-Carreras, Mercedes Salvia-Castellvi, Jean François Iffly, François Barnich, Laurent Pfister, Lucien Hoffmann	17
<i>Water quality changes in selected rural catchments in the Czech Republic</i>	
Jakub Langhammer, Zdeněk Kliment, Jiří Kadlec	19
<i>Effects of implemented measures to reduce erosion, P losses and eutrophication in the Morsa catchment, drinking water source for Moss City, Norway (abstract)</i>	
Lillian Øygarden	35
<i>Influence of the Agri-environmental Programme on erosion and the state of receiving surface waters in Finland (abstract)</i>	
Petri Ekholm, Kirsti Granlund, Pirkko Kauppila, Sari Mitikka, Jorma Niemi, Katri Rankinen, Antti Räsänen, Johanna Räsänen	37
<i>Evaluation of Finnish Agri-Environmental Programme based on concept of Critical Source Areas (abstract)</i>	
Katri Rankinen, Juha Grönroos	38
Section: Erosion monitoring & Landscape management & Water pollution	39
<i>Human induced conditions of sediment transport during heavy rainfall in catchments of first-order of the Lublin Upland (Poland)</i>	
Jan Rodzik, Grzegorz Janicki, Jerzy Rejman	39
<i>Companion modelling and management of erosive run-off (abstract)</i>	
Souchère V.1, Bousquet F., Echeverria J., Etienne M3, Le Page C., Millair L.	44
<i>The role of geotextiles in soil erosion and runoff control</i>	
Á. Kertész, A. Tót, Z. Szalai	45

<i>Sediment and phosphorus loads from three small catchments in the watershed of Lake Balaton (abstract)</i>	
István Sisák, Ferenc Máté, Péter Szűcs	54
<i>Soil use and management impact on surface runoff and som/soc content on undulating landscape of Lithuania</i>	
V. Feiza, B. Jankauskas, G. Jankauskiene A. Slepetiene, D. Feiziene	55
<i>Source areas and control mechanism of natural dissolved organic carbon (DOC) in the Volga catchment – a case study (abstract)</i>	
Ollesch, G., Meissner, R., Demidov, V. and Abbt-Braun	73
<i>Pan European soil erosion assessment: comparison of different approaches (abstract)</i>	
V. Jagu, O. Cerdan, Y. Le Bissonnais	74
Section: Sediment transport & Muddy floods	75
<i>Travel Distance and Catchment Scale Sediment Routing (extended abstract)</i>	
Mike Kirkby and Brian Irvine	75
<i>Quantification of sediment load and particularly-bounded nutrient and contaminant transport into Reservoirs in Saxony (abstract)</i>	
A. Weigert, J. Schmidt	79
<i>Simulating off-site effects of soil erosion in order to preserve habitats of sweet water shells in some brooks of the Erzgebirge/Saxony (abstract)</i>	
A. Schob and Schmidt,J.	80
<i>Soil Erosion and Sediment Transport in the Czech Part of the Elbe Catchment</i>	
Martin Becvar	81
<i>Assessment of soil loss via laminar and linear erosion in the influence area of tucurui hydroelectric power station reservoir, Brazil</i>	
Íris L. Macêdo, Suzi H. Theodoro and Hector M. O. Hernandez	88
<i>Suspended sediment yield for rainfall events in two small agricultural watersheds (abstract)</i>	
Barszcz M., Hejduk L., Banasik K.	102
<i>On-site and off-site impacts of wind erosion in Europe: an overview</i>	
Geert Sterk and Dirk Goossens	103
<i>Applying erosion damage mapping to assess and quantify off-site effect of soil erosion in Switzerland (abstract)</i>	
Ledermann T., Schneider F., Prasuhn V., Herweg K., Liniger H.P.	114
<i>Badland areas: the main suspended sediment source in central Spanish Pyrenees</i>	
Nadal-Romero, E., Regüés, D., Latron, J., Lana-Renault, N.,Serrano-Muela, P., Martí-Bono, C.	115
<i>Land use change in inland of Portugal: implications on overland flow and erosion rates</i>	
A. Nunes & C.O.A. Coelho	124
<i>Muddy flood hazard in Slovakia</i>	
Ivan Barča, Radoslav Bonk, Mínar Jozef, Stankoviansky Milos, Trizna Milan	140

<i>Muddy Floods: Hazard from Dells, Dry Valleys and Gullies (abstract)</i>	
Miloš Stankoviánský	142
<i>Efficiency of pilot measures to mitigate muddy floods at small and medium catchment scales in the Belgian loess belt (abstract)</i>	
Olivier Evrard, Karel Vandaele, Charles Biélders, Bas van Wesemaela	143
Poster presentations	145
<i>Evaluation of the AnnAGNPS and SWAT sediment transport models in the Blánska catchment, Czech Republic</i>	
Jiří Kadlec, Zdeněk Kliment, Jakub Langhammer	145
<i>Evaluation of soil erosion and sediment delivery in Mediterranean watersheds (abstract)</i>	
A. Leombruni, M. Mancini, G. Ravazzani, J. Martinelli	156
<i>Overland flow control via surface management techniques over the last century in the Tuscan-Emilian Apennine range: the "Rio Maggiore" case study</i>	
C. Cavazza, S. Correggiari, D. Pavanelli, M. Rigotti	157
<i>Estimating suspended sediment loads and their uncertainty using sediment rating curves in the Attert river basin and sub-basins (Grand Duchy of Luxembourg) (abstract)</i>	
Núria Martínez-Carreras, Andreas Krein, Jean François Iffly, Laurent Pfister, Lucien Hoffmann, and Francesc Gallart	166
<i>Relationship between suspended sediment concentration and total nitrogen, and comparison among basins for some Apennine rivers</i>	
Donatella Pavanelli, Marco Rigotti	167
<i>Map of soil loss and sediment transport for the Czech Republic (abstract)</i>	
Krasa J., Dostal T., Vrána K.	177
<i>Describing the evolution of landscape in Karlovassi Basin (Samos, Greece). Introduction of an algorithm to analyze the temporal process</i>	
Vaiopoulos D., Skianis G., Vassilopoulos A., Evelpidou N.	178
<i>Combined effects of suspended sediment concentration and exposure time on stream epilithic periphyton and benthic macroinvertebrates: an experimental study (abstract)</i>	
García Molinos, J. and I. Donohue	184
<i>Effects of particle density and added concentration of suspended sediment on bed-load transport in rill flow (abstract)</i>	
Guillaume Nord	185
<i>Sediment Yield in the Northern Ethiopian Highlands: implications for Soil & Water Conservation Measures (extended abstract)</i>	
Vanmaercke, M., Zenebe, A., Poesen, J., Nyssen, J., Verstraeten, G., Deckers, J., Govers, G.	186
List of participants	189
