

CONTENTS

Mazen Ayoubi, Sebastian Bülte, Josef Hegger	1
Bond Behaviour of Pretensioned Strands under Cyclic Loading	
Madlen Baumert	5
<i>FEM Modelling of Hip Endoprostheses in Comparison to Standardised Tests</i>	
Pavel Beran	7
Comparing Measured and Computed Surface Temperatures of Saint Vitus Cathedral Bearing System	
Guido Bertram, Josef Hegger	9
Shear Carrying Capacity of Steel Fiber Reinforced UHPC	
Denis Davydov, Milan Jirásek, Petr Kabele, Jiří Němeček	13
Study of Micromechanical Behaviour of Cement Paste by Integration of Experimental Nanoindentation and Numerical Analysis	
Eubomír Gajdoš, Martin Šperl	17
Corrosion Fatigue Damage of a High-grade Linepipe Steel I485mb	
Gerhard Hanswille, Marco Bergmann	19
About the Longitudinal Shear Resistance of the Interface between Steel and Concrete of Composite Driven Piles	
Leoš Horníček	23
Experimental Measurements of Modern Railway Track Components	
Petr Huňka, Jiří Kolísko	27
The Influence of the Classified Fly Ash on Characteristics of Concrete	
Ivan Janděšek, Daniel Vavřík	31
Utilization of Digital Image Correlation in Experimental Mechanics	
Michal Jandera, Josef Machacek	35
Effect of Residual Stresses on Load Capacity of Compressed Cold-rolled Box Sections	
Aleš Jíra, Miroslav Petrátl	39
How to Eliminate / Minimize Influence of Stress Shield of Rigid Stems on Cortical Bone in Diaphysis	
Ondřej Jiroušek, Daniel Vavřík, Jan Jakůbek, Jiří Dammer, Jiří Němeček	43
Apparent Properties of Trabecular Bone Determined Using Voxel-based FE Models and Nanoindentation	
Dennis Kahl, Marc Gutermann	45
Assessment of Historic Masonry Supported by Experiments	
Jiří Kunecký, Daniel Kytýř	49
Comparison of Numerical and Experimental Methods Involved in Research of Protective Helmets: Case Study of Simple XPS Brick	
Daniel Kytýř, Ondřej Jiroušek, Ondřej Žák	53
Material Testing of Spongy Bone Based on Optical Identification	

Sussanna Labisch.....	55
Numerical Verification of Natures Inventions – Gains and Difficulties	
Stefan Lachmann, Rüdiger Höffer, Stanislav Pospíšil	59
Experimental Requirements for the Identification of Non-linear Models of aeroelastic Forces on Bridge Girders	
Matěj Lepš, Vít Šmilauer, Zuzana Vítengerová.....	61
Multiobjective Optimization of Cement Paste Hydration	
Jaroslav Lísal, Miroslav Petrtyl.....	63
Numerical Analyses of Cortical Cartilage as Hyperelastic Material	
Christian Neuhaus, Wolfhard Zahlen.....	67
Dynamic Model Validation for a Wind Force Filter Approximation	
Stanislav Pospíšil, R. Král, Jiří Náprstek, Rüdiger Höffer, Stefan Lachmann	71
Numerical and Experimental Solution of Non-linear Aeorelastic Response of a Bridge Girder	
Kirsten Stopp, Reinhart Harte	75
Monitoring of Power Plant Foundations for Analysing the Soil – Structure - Interaction	
Jaroslava Valach, J. Bryscejn, Daniel Vavřík	79
Using Light Intensity for Depth Masurement	
Miroslav Vokáč, Petr Bouška, Vladimír Hanykýř	81
Irreversible Moisture Expansion of Porous Ceramic and its Determination by Thermal Dilatometer	
Cornelia Wevers, Jörg Franke, Rüdiger Höffer	85
Numerical Full Scale Simulations of Turbulent Wind Fields around Cubic Bodies in Solitary and Group Arrangements	
Holger Worrack, Johannes Wilden	89
Determination of Mechanical Material Properties after Welding Materials by Using a Low Energy Procedure	

The XIth Bilateral Czech / German Symposium is organized under the agreement between AS CR and DFG and is supported by Internal Grant Agency of CTU and the research project MSM 6840770043.
