Introduction	11
<b>1. Defining Essential Concepts. Selecting Methodology and Research Methods, and Setting Research Goals</b>	<b>13</b>
1.1 Defining the Concepts of "Methodology of Science," "Scientific Method" and "Principles of Scientific Work"	13
1.2 Selecting Methodology and Setting Research Goals	15
1.3 Selecting Scientific Procedures and Research Methods	18
1.4 Defining Concepts in Scientific Work	33
<b>2. Science, Its Origins and Historical Types. Problem of Methodology and Methods in the Context of the Development of Science</b>	<b>40</b>
2.1 The Cultural Epoch and Historical Types of Science	40
2.2 The Age of Science in Classical Antiquity	42
2.3 The Age of Medieval Science	44
2.4 The Age of Modern Science	46
2.5 The Age of Post-modern Science	51
<b>3. Logical Foundations of the Construction of Scientific Theories</b>	<b>53</b>
3.1 Axiomatic Deductive Approach to the Construction of a Scientific Theory	53
3.2 Inductive Approach to the Construction of a Scientific Theory. Limitations for the Use of Induction	55
3.3 The Role of Verification in Scientific Research	58
3.4 The Role of Falsification in Scientific Investigation. The Problem of Testing Hypotheses	62
<b>4. Normative and Non-normative Cognition of Social Reality</b>	<b>66</b>
4.1 Non-normative Theories	67
4.2 Normative Theories	70

<b>5. Explanation</b>	<b>74</b>
5.1 Scientific Explanation by Deductive Inference	74
5.2 Explanation Based on a "Scientific Law" (by Subsumption Under a "Scientific Law")	77
5.3 Explanation Based on an Idealized "Scientific Law"	83
5.4 The Problem of Universality in Social and Economic Laws	86
5.5 Explanation by Subsumption Under a Theory	87
5.6 Types of Explanation Based on the Dependence Between the Explanandum and the Explanans	90
5.6.1 Non-probabilistic Types of Explanation	91
5.6.2 Explanation Based on the Idea of "Probability"	94
5.6.3 Explanation Based on Two Concepts of Probability According to Rudolf Carnap	98
5.6.3.1 A Scientist's Procedure in the Scientific Process of Confirming a Hypothesis	99
5.6.3.2 Carnap's Conception of Two Concepts of Probability and Its Importance for Scientific Research	101
<b>6. Prediction</b>	<b>103</b>
6.1 Defining the Concept of "Future" as Viewed by the Methodology of Science	103
6.2 The Problem of Determinism in Relation to Predicting the Future	107
6.3 Non-Cartesian Rationalism and the Problem of Prediction	109
6.4 The Problem of the Relation of Induction and Deduction	112
<b>7. Narrative Model in Social Sciences</b>	<b>115</b>
7.1 Dilthey's Conception of Human Sciences – A Starting Point for a Turn Away from Explanation to the Narrative Model	115
7.2 Rickert and Windelband's Conception of "Human Sciences," or "Idiographic Sciences"	117
7.3 Problematization of the Nomological Conception of a Historical Fact	118
7.4 The Distinction Between the Nomological and Narrative Explanations of Social Phenomena. A Historical Explanation	120
7.5 Logical Tools for the Construction of a Story. A Role of a Historian in a Narrative	124
7.6 Epistemology and Phenomenology of Narrative History	126
<b>8. The Contradictory Nature of Explanation and Interpretation Explanation. Points of Departure of the Integrative Approach to Investigating Social Phenomena</b>	<b>133</b>
8.1 Atomistic, Holistic and Integrative Approaches to the Investigation of Social Phenomena	134

8.2 Explanatory Conception of Cause, Interpretative Conception of Meaning and Their Criticism through the Integrative Approach	136
8.3 Dichotomy of Objectivism and Relativism in the Social Phenomena Investigation and Their Criticism in the Integrative Approach	139

Glossary of Essential Terms	142
Bibliography	165
Summary	167
Subject Index	168
