Chapter 1

Introduction

1

*Steve Barton, Allan Eastham, Amanda Isom, Denise McLaverty,
Yi Ling Soong and Rachael Polowyj*

1.1	How Many Cosmetic Products Do You Use in the Day?	2
1.2	What Is a 'Cosmetic'?	3
1.3	What Goes into a Cosmetic Product?	5
1.4	The Importance of the Identities and Structures of Chemical Compounds	10
1.4.1	Organic and Inorganic Chemistry	11
1.4.2	Carbon Chains and Carbon Rings	11
1.5	The Importance of How Chemical Compounds Are Held Together	12
1.5.1	Did You Know That Some Ingredients in Cosmetic Products Have an Electrical Charge?	12
1.5.2	Did You Know That Some Ingredients in Cosmetic Products Have 'Polarity'?	12
1.5.3	Did You Know That Some Compounds Are Held Together More Strongly Than Others?	13

1.6	The Importance of How Chemical Compounds Fall Apart	13
1.7	Prepared to Read On?	14
	Reference	18

Chapter 2

Clean Chemistry – The Science Behind Cleansing Products 19

Edward Rolls

2.1	Introduction to Surfactant Behaviour	19
2.1.1	So, What Makes Surfactants So Special?	19
2.1.2	How Does the Special Structure Affect How Surfactants Behave?	20
2.1.3	Why Isn't Using Water Alone Enough to Clean Things?	21
2.1.4	Experiment at Home	23
2.1.5	How Do Surfactants Create Foam?	23
2.1.6	How Do Surfactants Help to Clean Dirt Away?	25
2.2	Surfactants Used for Cleaning	26
2.3	Secondary Surfactants – Luxurious, Creamy Foams	31
2.4	Finishing Touches	35
2.5	Alternative Systems	37
2.6	Natural/Organic and Sustainability	38
2.7	Conclusion	42

Chapter 3

Good Hair Day: The Science Behind Hair-care Products 43

P. Cornwell and J. Lim

3.1	Introduction	43
3.2	Hair Structure	44
3.3	Hair Diversity	52
3.4	The Living Follicle	54
3.5	Sebum and Hair Greasiness	57
3.6	Hair Damage	58
3.7	Hair Thinning and Hair Loss	60
3.8	Hair Greying	61
3.9	Shampoo Surfactant Bases	62
3.10	Shampoo Conditioning Systems	64

3.11	Hair Conditioners	66
3.12	Hair Styling	69
3.13	Straightening Treatments	70
3.14	Bringing It All Together	73
	References	73
Chapter 4		
	Oral Care – A Mouthful of Chemistry	75
<i>Eleanor Roberts and Stephen Mason</i>		
4.1	Physiology of Teeth	75
4.1.1	Overview and Structure	75
4.1.2	Enamel and Dentine	77
4.1.3	Saliva	77
4.1.4	The Pellicle	78
4.2	When Good Mouths Go Bad	79
4.2.1	Plaque (aka Dental Biofilm)	79
4.2.2	Dental Calculus (aka Tartar)	80
4.2.3	Periodontal Disease (Gum Disease)	80
4.2.4	Tooth Decay (aka Dental Caries)	82
4.2.5	Tooth Wear (aka Dental Erosion)	84
4.2.6	Dentinal Hypersensitivity (aka ‘Sensitive Teeth’)	85
4.2.7	Tooth Stain and Whitening	87
4.2.8	Oral Malodour (Bad Breath)	88
4.3	Just What Are All These Ingredients in My Oral Care Product?	88
4.3.1	Overview	88
4.3.2	Fluoride	90
4.3.3	Abrasives	93
4.3.4	Anti-sensitivity	94
4.3.5	Stain Removal/Whitening	97
4.3.6	Anti-gingivitis	100
4.3.7	Calculus Control	102
4.3.8	Enamel Care	102
4.3.9	Other Ingredients	102
4.3.10	Mouthwash	104
4.3.11	How Are Claims for Oral Care Product Performance Substantiated?	104
4.4	Conclusion	107
	Further Reading	107
	References	108

Chapter 5

You Against the World! – The Science Behind Skin and Skincare Products**109***Robin Parker, Nichola Roberts and Monique Burke*

5.1	The Skin – What Exactly Does Our Skin Do?	109
5.1.1	Skin Deep – What Is Beneath the Surface?	110
5.1.2	We Are Not Alone – What's On The Surface?	114
5.2	One Size Fits All? – All Skin Is Different	116
5.2.1	How and Why Does the Skin's Appearance Change with Age?	116
5.2.2	Does Skin Vary from Individual to Individual?	120
5.2.3	Are There Differences Between Men's and Women's Skin?	122
5.3	Staying on the Surface – Do Cosmetic Ingredients Go into The Skin?	124
5.4	What Goes into Skincare Products and Why – Care and Protection for Your Skin	126
5.4.1	How Do Cosmetics Make a Difference to Skin Appearance?	127
5.5	Moisturization – Where Chemistry Meets Biology	129
5.5.1	What Is the Difference Between Moisturization and Hydration?	129
5.5.2	Which Ingredients Are Important in an Effective Skin Moisturizer?	131
5.6	Emulsions – Better Together!	132
5.6.1	What Are Emulsifiers and Why Are They All Different?	135
5.6.2	How Can We Make Emulsions Stable for Several Years?	138
5.7	Touch and Texture – It's Just A Feeling	141
5.7.1	What Is Rheology and Why Is It So Important in Skincare?	142
5.7.2	How Can We Control the Rheology and Skin Feel of Cosmetic Creams?	144
5.7.3	By What Other Ways Can We Affect the Feel of Skincare Formulas?	146
5.8	Different Types of Skincare Products	148
5.8.1	Why Do We Have Day and Night Moisturizers, and Are They Different?	148
5.8.2	Do Men Need Different Moisturizers to Women?	149

5.8.3	How Important Are Skincare Regimes and What Are the Necessary Products?	149
5.8.4	Are the Skin Concerns for the Body the Same As Those for the Face? – How Many Different Moisturizers Do We Need?	152
5.9	Conclusion	153
	References	153

Chapter 6

More Than a Smudge of Colour – The Science Behind Colour Cosmetics 155

Claire Summers and Pauline Dubois

6.1	Why Does Something Appear Coloured?	155
6.2	How Can We Create Coloured Products?	161
6.2.1	Dyes	162
6.2.2	Why Pigments Are Crucial for Colour Cosmetics	163
6.2.3	Are Inorganic and Organic Pigments the Only Materials Used to Create Colour?	168
6.3	Are Pigments Easy to Use?	173
6.3.1	How Do You Disperse Pigments?	174
6.4	Why the Texture of Cosmetic Formulations Is so Important	177
6.4.1	Foundations – Are They More Than Just Colour?	178
6.4.2	Powders – Simple Yet Surprisingly Complex	181
6.4.3	Lipsticks – More Than Lip Service	183
6.5	The Art of Colour Matching	184
6.6	Curl up and Dye?	184
6.6.1	Oxidation and pH	187
6.6.2	Natural Dyes	190
6.6.3	Temporary Hair Colourants	190
6.7	Conclusion	191
	Further Reading	191

Chapter 7

Follow the Scent – The Science Behind the Fragrance in Products 192

V. Daniau

7.1	Sources and Mechanism of Odour Formation	192
7.1.1	Mechanisms	193

7.2	Odour Recognition (Box 7.1)	194
7.2.1	Specialized Olfactory Sensory Neurons	194
7.2.2	Infinite Combinations	194
7.3	Smell and Emotions	195
7.4	The Message Carried by a Fragrance	196
7.5	Creating and Masking Odours	197
7.5.1	The Creative Process and the Teams Involved	197
7.5.2	The Construction of a Fragrance	201
7.5.3	Fragrance Families	204
7.5.4	Fragrances in Different Bases and Products	206
7.5.5	Covering Malodours	208
7.6	Stability: Why Do Fragrances Change Over Time?	208
7.6.1	Base Interaction	208
7.6.2	Stability	209
7.7	Essential Chemistry	212
7.7.1	How Were Aroma Chemicals Discovered?	212
7.7.2	Categories of Aroma Molecules	215
7.8	Extraction Methods	216
7.8.1	Expression	216
7.8.2	Distillation	219
7.8.3	Solvent Extraction	221
7.8.4	Developments in Scientific Research Methods to Analyse Natural Scents	222
7.9	Conclusion	223
	Further Reading	224
Chapter 8		
The Inside Story – The Science Behind Active Ingredients		225
<i>C. Metcalfe and T. Causer</i>		
8.1	Vitamins	226
8.1.1	Where Do Vitamins Come From?	226
8.1.2	Oil-soluble Vitamins	227
8.1.3	Water-soluble Vitamins	229
8.1.4	Minerals	231
8.1.5	Other Vitamins	231
8.2	Peptides	231
8.2.1	Why Are Peptides Useful in Cosmetics?	232
8.2.2	How Are Peptides Named?	233

8.2.3	Discovering New Peptide Ingredients	233
8.2.4	Which Peptides Are Commonly Used?	234
8.2.5	Is It Just Hype?	234
8.3	Hydroxy Acids	235
8.3.1	Why Are Hydroxy Acids Useful in Cosmetics?	236
8.3.2	Hydroxy Acids in Peel Products	236
8.3.3	Using Products Containing AHAs	237
8.4	UV Filters: Protecting Products and the Skin/Hair	237
8.4.1	The Electromagnetic Spectrum	237
8.4.2	What Is Sun Protection Factor (SPF)?	238
8.4.3	How Does UVA Protection Differ from SPF?	239
8.4.4	How Do Sunscreen Products Work?	239
8.4.5	Product Innovation	240
8.4.6	Why Do Coloured Cosmetics Sometimes Contain UV Filters Even If They Don't Offer UV Protection?	240
8.4.7	The Hair Needs Protecting Too!	240
8.5	Antioxidants	241
8.5.1	What Is Oxidation?	241
8.5.2	How Do Antioxidants Work?	244
8.6	Antimicrobials	245
8.6.1	The Germs (Microorganisms) Around Us	246
8.6.2	Products Need Protecting – ‘Preserving’	250
8.6.3	What Happens if Cosmetics Are Not Preserved?	251
8.6.4	How Do Companies Know If Their Products Will Remain Safe If They Become Contaminated?	251
8.6.5	Antimicrobial Protection on the Skin	253
8.7	Natural Extracts	253
8.7.1	Producing Natural Extracts Using Stem Cells	256
8.8	Delivery Systems	256
8.8.1	Why and Where Are Delivery Systems Used?	257
8.8.2	Examples of Delivery Systems	258
8.9	Antiperspirant and Deodorant Effects	259
8.9.1	What Is the Difference Between an Antiperspirant and a Deodorant?	259
8.9.2	Why Do Antiperspirants and Deodorants Come in Different Formats?	260
8.10	Conclusion	261

Chapter 9

Testing and More Testing – The Science Behind Keeping Your Skin Safe and Healthy

262

Stephen Kirk

9.1	Cosmetic Products – How We Keep You and Your Skin Safe and Healthy	262
9.2	Stability Testing – Making Sure a Product Is Fit for Purpose	263
9.2.1	Microbiological Testing – Will It Go Mouldy?	264
9.2.2	Chemical Stability – Will My Product Change Colour?	269
9.2.3	Period After Opening (PAO) and Shelf-life – How Long Will It Be Okay to Use?	272
9.3	Safety Assessment of Cosmetic Ingredients and Finished Products – Is My Chosen Product Going to Harm Me?	273
9.3.1	Hazard and Risk – The Tale of a Shark and the Swimmer	273
9.3.2	Identifying the Hazard Characteristics of a Cosmetic Ingredient	276
9.3.3	Testing New Cosmetic Ingredients Using Non-animal Alternative Methods	277
9.4	Product Claims – Will My Product Do What It Says on the Tin?	278
9.4.1	Sun Protection Testing – Will My Cream Protect Me from the Harmful Effects of the Sun?	278
9.5	Safety-related Claims Made on Some Products	284
9.5.1	Will Your Product Damage My Eyes or Make Them Sting?	284
9.5.2	Hypoallergenic – Exactly What Does This Mean?	285
9.6	Post-market Surveillance – the Customer's Story of Using a Product	287
9.7	What Does All This Mean to Me?	288
	Further Reading	288

Chapter 10

Myths and Scares – Science in Perspective

290

E. Meredith and R. Polowyj

10.1	Are Cosmetics Tested on Animals?	291
10.1.1	European Union (EU)	291
10.1.2	Global Challenges	292

10.2	How Much Does the Skin Absorb?	292
10.2.1	Myth – 60% of Everything You Put on Your Skin Is Absorbed	293
10.2.2	Fact – Different Skin Types Have Different Barrier Functionality	293
10.3	Should I Avoid Certain Ingredients?	294
10.3.1	Why Are Some Products Labelled As Being ‘Free-from’ Certain Ingredients?	294
10.3.2	Parabens	296
10.3.3	Sulfates	297
10.3.4	Silicones	297
10.3.5	How Do I Know That the Ingredients in the Products I Use Are Safe?	299
10.3.6	Do Cosmetics Contain Hormone-disrupting Ingredients?	300
10.4	What Is the Difference Between Natural and Synthetic Ingredients?	301
10.5	Do Cosmetics Pollute the Oceans?	304
10.5.1	Do Cosmetics Contain Plastic Microbeads?	306
10.5.2	Are Cosmetics a Cause of Microplastics?	306
10.5.3	Why Is Plastic Packaging So Often Used to Package Cosmetics?	307
10.5.4	Are Sunscreens Damaging to Coral?	309
10.6	Why Are Cosmetics So Important?	309
10.7	Having Confidence in Cosmetic Products	311
	References	312
	Appendix 1	313
	Subject Index	317
	Reviews	339
