
Table of Contents

Foreword.....	xi
Preface.....	xiii
1. Why Distributed?.....	1
The Single-Threaded Nature of JavaScript	1
Quick Node.js Overview	6
The Node.js Event Loop	9
Event Loop Phases	10
Code Example	11
Event Loop Tips	14
Sample Applications	15
Service Relationship	16
Producer Service	17
Consumer Service	18
2. Protocols.....	21
Request and Response with HTTP	22
HTTP Payloads	23
HTTP Semantics	25
HTTP Compression	26
HTTPS / TLS	29
JSON over HTTP	34
The Dangers of Serializing POJOs	35
API Facade with GraphQL	36
GraphQL Schema	37
Queries and Responses	38

GraphQL Producer	40
GraphQL Consumer	43
RPC with gRPC	45
Protocol Buffers	45
gRPC Producer	48
gRPC Consumer	50
3. Scaling.....	53
The Cluster Module	53
A Simple Example	54
Request Dispatching	57
Cluster Shortcomings	58
Reverse Proxies with HAProxy	61
Introduction to HAProxy	63
Load Balancing and Health Checks	64
Compression	69
TLS Termination	70
Rate Limiting and Back Pressure	72
SLA and Load Testing	75
Introduction to Autocannon	76
Running a Baseline Load Test	76
Reverse Proxy Concerns	80
Protocol Concerns	84
Coming Up with SLOs	87
4. Observability.....	91
Environments	92
Logging with ELK	93
Running ELK via Docker	94
Transmitting Logs from Node.js	95
Creating a Kibana Dashboard	98
Running Ad-Hoc Queries	100
Metrics with Graphite, StatsD, and Grafana	102
Running via Docker	103
Transmitting Metrics from Node.js	104
Creating a Grafana Dashboard	106
Node.js Health Indicators	108
Distributed Request Tracing with Zipkin	111
How Does Zipkin Work?	112
Running Zipkin via Docker	115
Transmitting Traces from Node.js	115

Visualizing a Request Tree	118
Visualizing Microservice Dependencies	119
Health Checks	120
Building a Health Check	121
Testing the Health Check	124
Alerting with Cabot	124
Create a Twilio Trial Account	125
Running Cabot via Docker	126
Creating a Health Check	127
5. Containers.....	131
Introduction to Docker	133
Containerizing a Node.js Service	140
Dependency Stage	141
Release Stage	143
From Image to Container	146
Rebuilding and Versioning an Image	148
Basic Orchestration with Docker Compose	151
Composing Node.js Services	152
Internal Docker Registry	156
Running the Docker Registry	157
Pushing and Pulling to the Registry	158
Running a Docker Registry UI	160
6. Deployments.....	163
Build Pipeline with Travis CI	165
Creating a Basic Project	165
Configuring Travis CI	167
Testing a Pull Request	168
Automated Testing	170
Unit Tests	172
Integration Tests	174
Code Coverage Enforcement	177
Deploying to Heroku	183
Create a Heroku App	184
Configure Travis CI	185
Deploy Your Application	187
Modules, Packages, and SemVer	190
Node.js Modules	191
SemVer (Semantic Versioning)	193
npm Packages and the npm CLI	197

Internal npm Registry	204
Running Verdaccio	205
Configuring npm to Use Verdaccio	205
Publishing to Verdaccio	205
7. Container Orchestration.....	209
Introduction to Kubernetes	210
Kubernetes Overview	210
Kubernetes Concepts	211
Starting Kubernetes	214
Getting Started	214
Deploying an Application	219
Kubectl Subcommands	219
Kubectl Configuration Files	222
Service Discovery	226
Modifying Deployments	232
Scaling Application Instances	232
Deploying New Application Versions	233
Rolling Back Application Deployments	235
8. Resilience.....	239
The Death of a Node.js Process	239
Process Exit	240
Exceptions, Rejections, and Emitted Errors	242
Signals	247
Building Stateless Services	249
Avoiding Memory Leaks	251
Bounded In-Process Caches	252
External Caching with Memcached	256
Introducing Memcached	257
Running Memcached	258
Caching Data with Memcached	259
Data Structure Mutations	260
Database Connection Resilience	262
Running PostgreSQL	262
Automatic Reconnection	263
Connection Pooling	269
Schema Migrations with Knex	272
Configuring Knex	274
Creating a Schema Migration	275
Applying a Migration	276

Rolling Back a Migration	279
Live Migrations	280
Idempotency and Messaging Resilience	284
HTTP Retry Logic	286
Circuit Breaker Pattern	289
Exponential Backoff	289
Resilience Testing	293
Random Crashes	294
Event Loop Pauses	294
Random Failed Async Operations	295
9. Distributed Primitives.....	297
The ID Generation Problem	298
Introduction to Redis	301
Redis Operations	302
Strings	304
Lists	305
Sets	307
Hash	308
Sorted Sets	310
Generic Commands	311
Other Types	312
Seeking Atomicity	313
Transactions	315
Lua Scripting	317
Writing a Lua Script File	318
Loading the Lua Script	320
Tying It All Together	322
10. Security.....	325
Wrangling Repositories	326
Recognizing Attack Surface	328
Parameter Checking and Deserialization	328
Malicious npm Packages	331
Application Configuration	332
Environment Variables	333
Configuration Files	334
Secrets Management	337
Upgrading Dependencies	339
Automatic Upgrades with GitHub Dependabot	340
Manual Upgrades with npm CLI	342

Unpatched Vulnerabilities	344
Upgrading Node.js	346
Node.js LTS Schedule	346
Upgrade Approach	347
A. Installing HAProxy	349
B. Installing Docker	351
C. Installing Minikube & Kubectl	353
Index	355
