

Table of content

Preface	vii
Humphreys and Zwierzykowski:	
<i>Festulolium</i> , a century of research and breeding and its increased relevance in meeting the requirements for multifunctional grassland agriculture	1
Boller et al.:	
Spontaneous natural formation of interspecific hybrids within the <i>Festuca-Lolium</i> complex	27
Majka et al.:	
Cytogenetic insights into <i>Festulolium</i>	52
Baert et al.:	
Breeding and genetics of two new amphiploid <i>Festulolium</i> synthetics with improved yield and digestibility	63
Kemešytė et al.:	
<i>Festulolium</i> field performance under fluctuating growing conditions in Lithuania	77
Curran et al.:	
Persistency, yield, and silage quality of <i>Festulolium</i> cultivars over a consecutive five-year period under a mild Atlantic climate	89
Borawska-Jarmułowicz et al.:	
Morphological diversity of seeds of Polish <i>Festulolium</i> cultivars depending on weather conditions	109
Tamura et al.:	
Quantitative trait loci for winter hardiness and other agronomic traits in the progeny of two amphiploid <i>Festulolium</i> hybrids (<i>Festuca pratensis</i> × <i>Lolium perenne</i>) backcrossed twice to tetraploid <i>Lolium perenne</i>	122
Perlikowski and Kosmala:	
Mechanisms of drought resistance in introgression forms of <i>Lolium</i> <i>multiflorum</i> / <i>Festuca arundinacea</i>	146
Staniak et al.:	
Prolonged drought stress induced changes in yield and physiological processes of <i>Trifolium repens</i> and <i>Festulolium braunii</i>	158
Černoch and Kopecký:	
Drought tolerance and regrowth capacity revealed in the <i>Festuca-Lolium</i> complex	172

Marzec-Schmidt et al.:

Rapid increases in β -1,3-glucanase and chitinase activities are markers of resistance to *Microdochium nivale* in grasses of the *Lolium-Festuca* complex 186

Golińska and Goliński:

Tensile strength of the rachilla in spikelets of Polish *Festulolium braunii* cultivars 199

Trnka et al.:

Future agroclimatic conditions and implications for European grasslands. . . . 209

Zwierzykowski and Kopecký:

A brief history and (nearly) complete bibliography of *Festulolium* 241

Kopecký:

List of interspecific hybrids observed within the *Festuca-Lolium* complex 280

Appendix 283
