

Contents

List of Contributors	V
Preface	VII
Introduction	
Cilia and Flagella – Ciliates and Flagellates <i>Klaus Hausmann and Renate Radek</i>	3
Ultrastructure	
Cellular Architecture, Growth, Morphogenesis, Chemoattractants, and Loose Ends <i>Gregory A. Antipa</i>	23
Ejection, Ingestion, Digestion, and Expulsion in Ciliates <i>Klaus Hausmann</i>	47
Cell Biology	
A Song of Praise for <i>Paramecium</i> as a Model in Vesicle Trafficking A <i>Sotto Voce</i> Praise in Retrospect with Certain Reservation <i>Helmut Plattner</i>	69
Ciliate Mating Types and Pheromones <i>Pierangelo Luporini, Claudio Alimenti, and Adriana Vallesi</i>	95
Motility	
Encounters with Cilia <i>Michael A. Sleight</i>	121
How do Protists keep up? <i>Hans Machemer</i>	133
Ctenophores and Termites – Systems for Motility <i>Sidney L. Tamm</i>	147

Taxonomy and Systematics

Kinetids, Concepts, and Coincidences
Denis H. Lynn 175

On Algal and other Protist Flagella and Cilia
Øjvind Moestrup 189

Symbiosis

Insights into the *Paramecium-Holospira* and *Paramecium-Chlorella* Symbioses
Masahiro Fujishima and Yuuki Kodama 203

Prokaryotic Endosymbionts in Ciliates
Hans-Dieter Görtz 229

Symbionts of Symbionts – Termite Flagellates and their Bacterial Associations
Renate Radek and Jürgen F. H. Strassert 239

Biodiversity

Smallest Protists in the Deepest Depths – Flagellates from Abyssal Sea Floors
Klaus Hausmann 255

Retro- and Prospective

Five Decades of Research in Protistology – What have We learned?
Jens Boenigk 267

Addendum

Curricula Vitae of Contributors 277

Humor 287

Acknowledgements 290
