

## Table of contents

### *Plenary lectures*

The effects of wind on plants: A review <i>E. de Langre</i>	3
Dynamics of cantilevers subjected to internal and/or external axial flow: New developments and insights <i>M.P. Paidoussis</i>	9
Some thoughts on the elusive mechanism of fluidelastic instability in heat exchanger tube arrays <i>D.S. Weaver</i>	21
Flow-excited acoustic resonance in industry <i>S. Ziada</i>	29

### *Fluid-structure interaction theory*

Post-critical limit cycles and non-stationary response types of aeroelastic system <i>J. Náprstek, S. Pospíšil, C. Fischer</i>	41
The wettability of the liquid-solid interface <i>F. Pochylý, S. Fialová, V. Habán, L. Rinka</i>	47
Stiffness of fluid layer with Tailor vortices <i>F. Pochylý, M. Kozubková, S. Fialová</i>	53

### *Computational methods*

Large deformations on elongated bodies <i>G. De Nayer, M. Visonneau, A. Leroyer, F. Boyer</i>	61
Modal identification of an aeroelastic system using an extended Karhunen-Loève decomposition <i>M. Diez, C. Leotardi</i>	67
ALE discontinuous Galerkin simulation of compressible flow in time-dependent domains <i>M. Feistauer, V. Kučera, J. Prokopová</i>	73
Computation of dimensionless spectrum of fluid forces induced by vortex shedding from a single rigid tube in a single-phase cross flow <i>F. Jusserand, A. Adobes, T. Pasutto, L. Broutin</i>	79
A virtual wind tunnel for numerical simulation of flow-induced vibrations <i>K. Kamemoto, A. Ojima, A. Nakamura</i>	85

Determination of fluid forces on a circular cylinder in pulsating cross-flow from numerical experiments <i>C. Liang, E. Konstantinidis</i>	91
POD-Galerkin method in fluid structure interaction <i>E. Liberge, A. Hamdouni</i>	97
New mathematical and computational model of fluid-structure interaction using FEM <i>F. Pochylý, E. Malenovský</i>	103
Porous media modelling for a row of fuel assemblies under seismic loading <i>G. Ricciardi, B. Collard, S. Bellizzi, B. Cochelin</i>	109
 <b><i>Biomechanics</i></b>	
Effect of acoustic loading on the self-oscillations of a synthetic model of the vocal folds <i>L.J. Chen, M. Zanartu, D. Cook, L. Mongeau</i>	117
Self-propelled eel-like body dynamics: simplified model and optimisation of laws of deformation <i>A. Leroyer, M. Visonneau, M. Porez, F. Boyer</i>	123
Nonlinear cochlea dynamics and the upper limit of the human auditory system <i>H. Mahmoud</i>	129
Numerical simulation of compressible flow with low Mach number through oscillating glottis <i>P. Punčochářová, J. Fürst, K. Kozel, J. Horáček</i>	135
Mathematical and physical modeling of flow-induced vibrations of human vocal folds <i>P. Šidlof, O. Doaré, O. Cadot, A. Chaigne, J. Horáček</i>	141
Analogue computational modeling of upper-airway dynamics <i>G.A. Tetlow, A.D. Lucey, J. Wang</i>	147
 <b><i>Control of flow-induced vibrations</i></b>	
Suppressing vortex-induced vibrations via passive means <i>H. Baek, G.E. Karniadakis</i>	155
Control of vortex induced vibration of a circular cylinder <i>S. Dong</i>	161
Flow induced vibration of a microvalve for aerodynamic control <i>O. Ducloux, K. Talbi, L. Gimeno, R. Viard, P. Pernod, V. Preobrazhensky, A. Merlen</i>	167
Active control law design for suppression of flutter and gust response of aeroelastic panel via segmented piezoelectric actuators <i>S.A. Fazelzadeh, S.M. Jafari</i>	173
Influence of the cylinder diameter variation on the near wake behaviour in uniform flow <i>H. Oualli, S. Hanchi, A. Bouabdallah, R. Asković</i>	179

## ***Tube arrays***

- A simple consistent method for time-domain simulation of turbulence excitations applied to tube/support dynamical analysis under non-uniform flows 187  
*J. Antunes, X. Delaune, P. Piteau, L. Borsoi*
- Variation of fluidelastic critical velocity with mass ratio and Reynolds number in a densely packed normal triangular tube array 193  
*S. Gillen, C. Meskell*
- Effect of acoustic resonance on the dynamic lift in square tube arrays 199  
*R. Hanson, S. Ziada*
- Numerical prediction of fluidelastic instability threshold in tube bundles 205  
*F. Huvelin, E. Longatte, F. Baj, M. Souli*
- Study on influence of geometry on fluid elastic instability 211  
*K. Ishihara, G. Kitayama*
- Investigation of flow characteristics in heat exchanger tube bundles composed of wavy and circular cylinders 217  
*K. Lam, Y. F. Lin, T. Cai, Y. Liu, L. Zou*
- Effect of intermediate supports and flow mixer on the eigenvalues of a multi-span cylindrical rod subjected to axial and periodic mixed flow 223  
*K.H. Lee, H.K. Kim, C.W. Shin, H.S. Kang*
- Effect of acoustic resonance on fluidelastic instability in normal triangular tube arrays 229  
*J. Mahon, C. Meskell*
- Surface pressure distributions in normal triangular tube arrays 235  
*J. Mahon, J. Harel, C. Meskell*
- Experimental study on the mechanism of in-flow oscillation of cylinder arrays 241  
*T. Nakamura, H. Kondo, S. Nobuta, J. Okamoto, Y. Takahashi*
- Dynamic of a steam generator tube supported by an anti-vibration bar 247  
*I. Nowlan, A. Ross, M.J. Pettigrew*
- New technologies provide effective mitigation of flow-induced vibration in heat exchangers 253  
*A.S. Wannan, T.M. Rudy, Z.F. Ruzek*
- Usefulness of sensitivity equation method in finding inter-cylinder couplings and overview of its other interests 259  
*R. Watteaux, N. Mureithi, D. Pelletier, S. Étienne*
- Experimental studies of a simulation CANDU fuel bundle in confined axial flow 265  
*X. Zhang, S.D. Yu*

### ***Ship and offshore structures***

- Numerical study of oscillatory flow past four cylinders in square arrangement 273  
*P. Anagnostopoulos, Ch. Dikarou, S. Seitanis*
- Unsteady response of a circular cylinder under wake-induced excitation from a fixed upstream cylinder 279  
*G.R.S. Assi, P.W. Bearman, J.R. Meneghini*
- Effect on wake flow of abrupt alterations in ellipticity of an orbiting cylinder 285  
*L. Baranyi*
- Numerical simulation of flow past a circular cylinder in elliptic orbit at low Reynolds numbers 291  
*E. Didier*
- A time-independent finite difference analysis of flow induced cylinder vibration 297  
*B.F. Chen, C.C. Chu*
- The numerical study of the hydraulic dampener efficiency for minimization of the floating oil platform pitching under the action of the sea roughness 303  
*S. Lupuleac, A. Bolshev, J. Shinder, A. Ulanov, E. Toropov, A. Gintovt*
- Experimental study on the effect of the current wake on the FPSO-shuttle fishtailing dynamics 309  
*A.N. Simos, C.H. Fucatu, A.L.C. Fugarra, V.L.F. Matos*
- ### ***Thin-walled and slender structures in or with axial flow***
- Effect of geometric imperfections on shells conveying fluid 317  
*M. Amabili, K. Karagiozis, M.P. Païdoussis*
- Aeroelastic instability of plate subject to normal jet 323  
*M. Antoine, P. Hémon, E. de Langre*
- Nonlinear aerodynamic damping of beams at high oscillatory Reynolds numbers 327  
*R.A. Bidkar, M. Kimber, A. Raman, A.K. Bajaj, S.V. Garimella*
- The influence of imperfections on the nonlinear vibrations of cylindrical shells subjected to internal flowing fluid and combined loads 333  
*Z. del Prado, P.B. Gonçalves, M.P. Païdoussis*
- Effect of dissipation on local and global stability of fluid-conveying pipes 339  
*O. Doaré*
- Three-dimensional stability analysis of a rectangular plate in an axial flow 345  
*C. Eloy, L. Schouveiler*
- Vorticity dynamics and symmetry breaking in the near wake of a flapping foil 351  
*R. Godoy-Diana, C. Marais, J.L. Aider, J.E. Wesfreid*
- Hydroelastic vibration of a rectangular plate in contact with a liquid filled in a rigid semi-cylindrical vessel 357  
*K.H. Jeong, G.M. Lee, J.S. Park*

An investigation on the diffuser-induced vibration instability of a rod in axial annular flow <i>H.S. Kang, N.W. Mureithi, M.J. Pettigrew</i>	363
Nonlinear fluid-structure interaction of clamped shells <i>K. Karagiozis, M.P. Païdoussis, A.K. Misra</i>	369
Eigen-analysis of a cantilevered flexible plate in channel flow <i>A.D. Lucey, M.W. Pitman, R.M. Howell</i>	375
Three-dimensional and chaotic oscillations of long pipes conveying fluid in the presence of an end-mass <i>Y. Modarres-Sadeghi, M.P. Païdoussis</i>	381
Linear dynamics of the flow-structure interaction of compliant walls having complex boundary conditions <i>M.W. Pitman, A.D. Lucey</i>	387
Dynamics of variants of two-dimensional cantilevered thin flexible plates in axial flow <i>L. Tang, M.P. Païdoussis, J. Jiang</i>	393
Dynamics of two-dimensional cantilevered thin flexible plates in axial flow: energy transfer and the design of a flutter-mill <i>L. Tang, M.P. Païdoussis, J. Jiang</i>	399
Fluidic oscillator devices based on the "aerodynamic paradoxon" <i>V. Tesař</i>	405
 <b><i>Underwater cables and risers, sloshing</i></b>	
Flow past a curved pipe in different in-line configurations undergoing forced transverse oscillations <i>A. de Vecchi, S.J. Sherwin, J.M.R. Graham</i>	413
Wake structures and dynamic response of one and two long flexible cylinders undergoing vortex-induced vibrations <i>F.J. Huera Huarte, P.W. Bearman</i>	419
Comparisons between full scale and experimental data for vortex self induced vibrations on cylindrical structures <i>A.C. Fernandes, E.M.C. Silva, R. Franciss, F.M. Coelho</i>	425
Sloshing in tanks in a magnetic field <i>J.B. Frandsen</i>	433
Analysis of flow-induced vibrations of a slide gate chain using monolithic fluid-structure coupling <i>B. Hübner, U. Seidel, J. Koutnik</i>	439
Sloshing waves and resonance modes of sloshing fluid in a 3D tank <i>B.F. Chen, C.H. Wu</i>	445

An investigation on seismic response of the R/C rectangular fluid tanks considering fluid-structure-soil interaction <i>R. Livaoglu</i>	451
Sloshing response of the cylindrical elevated tanks with frame staging system on different soil conditions <i>R. Livaoglu, A. Dogangün</i>	457
Numerical simulation of nonlinear vibration response of a cylindrical water storage tank by explicit Finite Element Method <i>A. Maekawa, K. Fujita, H. Ogawa</i>	463
Linear stability approach to predict lock-in and time sharing in vortex-induced vibrations <i>R. Violette, E. de Langre, J. Szydlowski</i>	469
 <b><i>Wing aeroelasticity</i></b>	
Aeroelastic instability of bending-torsion wings containing a mass subjected to follower force <i>S.A. Fazelzadeh, H. Kalantari, A. Mazidi</i>	477
Analysis of tiltrotor airframe vibratory loads transmitted by the wing-proprotor system <i>M. Gennaretti, M. Molica Colella, G. Bernardini</i>	483
Numerical simulations of interaction of inviscid and viscous incompressible flow with a vibrating profile <i>R. Honzátko, J. Horáček, K. Kozel</i>	489
Artificial neural network for flutter prediction of swept rectangular cantilever wings <i>M. Mohammadi-Amin, A. Taheri, M. Razi</i>	495
Aeroelastic analysis of a swept wing containing cubic and freeplay nonlinearities in a subsonic compressible flow <i>M. Mohammadi-Amin, M. Razi, B. Ghadiri</i>	501
Flow induced vibration of an airfoil with three degrees of freedom <i>M. Ružička, M. Feistauer, J. Horáček, P. Sváček</i>	507
By-pass transition to airfoil flutter by transient growth due to gust impulse <i>M. Schwartz, P. Hémon, E. de Langre</i>	513
Airfoils in cross flow <i>T. Staubli, R. Waser, C. Widmer</i>	519
Influence of flow models in an aeroelastic problem: Comparison of a turbulence model with a laminar solution of the Navier-Stokes equations <i>P. Sváček, M. Feistauer, J. Horáček</i>	525
Visualization of unsteady flow around a vibrating profile <i>V. Vlček, J. Horáček, M. Luxa, J. Veselý</i>	531

## ***Valves, piping, pumps, gates turbines, rotors***

- PBMR PCU acoustics 539  
*M. Cepkauskas, R. Thanjekwayo*
- Vibration behavior of circular cylinders subjected to jet-flow from a narrow gap 545  
*K. Fujita, K. Kawabe*
- The numerical analysis of the aeroelastic behaviour for a turbomachine blade row in 3D viscous flow 551  
*V.I. Gnesin, L.V. Kolodyazhnaya, R. Rzadkowski*
- Damping of the pressure pulsations in the vaneless space of the pump turbine 559  
*V. Habán, F. Pochylý, S. Fialová*
- Characteristics of pressure pulsations in piping systems excited by a centrifugal compressor 563  
*I. Hayashi, S. Kaneko*
- Analogous tainter-gate failures in Japan and USA 569  
*N. Ishii, K. Anami, T. Oku, T. Makihata, C.W. Knisely*
- The simulation of the Saint Petersburg flood defense system gate vibration under the loads from the moving water 575  
*S. Lupuleac, A. Bolshev, J. Shinder, E. Petukhov, V. Chernetsov*
- Cavitation and dissipation efficiency of multihole orifices 581  
*S. Malavasi, S. Macchi, E. Merighetti*
- Summarize of method for analysis on self-excited vibration of gate 587  
*K. Ogihara*
- Rotor instability induced by oil film and possibilities of its suppression through bearing external excitation 593  
*J. Šimek, R. Svoboda, J. Tůma*
- Transonic flow vibration in a steam control valve for a power plant 599  
*K. Yonezawa, Y. Tsujimoto, K. Tezuka, M. Mori, R. Morita, F. Inada*
- Flow-acoustic coupling in T-junctions: Effect of T-junction geometry 605  
*S. Ziada, K. McLaren, Y. Li*
- Two phase flows***
- Effect of fluid density on two-phase damping for piping subjected to internal bubbly flow 613  
*C. Béguin, A. Ross, M.J. Pettigrew, E. de Langre*
- Relationship between vibration behaviour and two-phase flow regime transitions for piping with internal flow 619  
*C. Béguin, A. Ross, M.J. Pettigrew, N.W. Mureithi*
- Experimental investigation on brine recirculation pumps in a desalination plant 625  
*L. Carassale, A. Stocchino, F. Percivale, M. Colombini, S. Rebagliati, M. Bucello*

Scaling fluidelastic instability in heat exchanger tube arrays subjected to two-phase cross-flow <i>J.E. Moran, D.S. Weaver</i>	631
Acoustic damping in cavitation-induced two-phase flow <i>P. Moussou, S. Caillaud</i>	637
Scaling buffeting forces of air-water flow in a rod bundle <i>S. Pascal-Ribot, Y. Blanchet</i>	643
Further study of quasi-periodic vibration excitation forces in rotated triangular tube bundles subjected to two-phase cross-flow <i>C. Zhang, M.J. Pettigrew, N.W. Mureithi</i>	649
 <b><i>Wind induced vibrations</i></b>	
Strouhal number of two-dimensional rectangular prisms in confined smooth and grid turbulent flows <i>N.E. Amrouche, A. Laneville</i>	657
Destabilising effect of plant flexibility in air and aquatic vegetation canopy flows <i>F. Gosselin, E. de Langre</i>	663
Transition of flow-induced bridge girder oscillations from resonance to critical and post-critical behaviour <i>R. Höffer, S. Lachmann, S. Pospíšil</i>	669
Flow-induced streamwise oscillation of square cylinders <i>T. Kiwata, A. Okajima</i>	675
Nonlinear aeroelastic solutions applied to analysis of a bridge <i>V. Losik</i>	681
Study on the role of Karman vortex on galloping of bluff bodies <i>M. Matsumoto, M. Hashimoto, T. Yagi, T. Nakase, K. Maeta</i>	687
A model for the numerical simulation of rivulet evolution on a circular cylinder in an air flow <i>A.C. Robertson, I.J. Taylor, S.K. Wilson, B.R. Duffy, J.M. Sullivan</i>	693
 <b><i>Flow-acoustic coupling</i></b>	
Reduction of 3/4 open jet wind tunnel low-frequency fluctuations <i>X. Amandolese, C. Vartanian</i>	701
Aeroacoustic noise generation by planar jet-plate impingement <i>D. Arthurs, S. Ziada</i>	707
Effect of cavity depth on diametral modes excitation <i>K. Awny, S. Ziada</i>	713

Coherent structures and origination of powerful sound oscillations around bluff bodies <i>S.P. Bardakhanov, M.M. Katasonov, H.J. Sung</i>	719
Flow induced pulsations generated in corrugated tubes <i>S.P.C. Belfroid, R. Swindell, R. Tummers</i>	725
Flow-acoustic interaction in corrugated pipes: time-domain simulation of experimental phenomena <i>V. Debut, J. Antunes, M. Moreira</i>	731
An assessment of thermoacoustic vibration potential in a corner-fired furnace of a utility boiler - a case study <i>F.L. Eisinger, R.E. Sullivan</i>	737
Simple equations for acoustic structural coupling <i>H. Goyder</i>	743
Numerical simulation of the flow excited acoustic resonance of two tandem cylinders in cross-flow <i>A. Mohany, S. Ziada</i>	749
Optimization of baffle configurations to prevent aeroacoustic instabilities in heat exchangers: Preliminary experiments <i>M. Moreira, J. Antunes, V. Debut, H. Pina</i>	755
A comprehensive model for the amplification of acoustic pressure waves by single hole orifices <i>P. Moussou, P. Testud, Y. Auregan, A. Hirschberg</i>	761
Effect of junction geometry on acoustic response of side branch resonators <i>A. Velikorodny, T. Yan, P. Oshkai</i>	767
 <b><i>Bluff bodies, vortex - induced - vibrations</i></b>	
New methods for suppressing vortex-induced vibration of circular cylinders <i>G. Assi, P. Bearman</i>	775
Prediction of flow-induced vibration behaviour of a circular cylinder in a uniform stream <i>M.H. Bahmani, M.H. Akbari</i>	781
Numerical simulation of the flow-induced vibration in the flow around two circular cylinders in tandem arrangements <i>B. Carmo, S. Sherwin, P. Bearman, R. Willden</i>	787
Vortex-induced vibrations using wake oscillator model comparison on 2D response with experiments <i>D. Cébron, B. Gaurier, G. Germain</i>	793
Third harmonic lift forces from phase variation in forced cross-flow and in-line cylinder motions <i>J.M. Dahl, F.S. Hover, M.S. Triantafyllou</i>	799

Wake formation for a pair of circular cylinders in cross-flow with one oscillating <i>M.M.A. Hayder, S.J. Price</i>	805
Critical mass and new wake patterns for freely rising and falling spheres <i>M. Horowitz, C.H.K. Williamson</i>	811
Strouhal number determination of the transient flow on a single cylinder by means of wavelets <i>M.L.S. Indrusiak, S.V. Möller</i>	817
Flow-induced vibrations of a non-buoyant sphere <i>H. Lee, M.C. Thompson, K. Hourigan</i>	823
Classification of the wake of two side-by-side square cylinders <i>A.M. Mahbub, Y. Zhou</i>	829
Analysis of effects of the free surface on the movement of a tethered sphere immersed in a steady flow <i>D. Mirauda, S. Malavasi, A. Volpe Plantamura</i>	835
Understanding mode transitions in vortex-induced vibration using controlled motion <i>T.L. Morse, C.H.K. Williamson</i>	841
A POD based analysis of the 2D cylinder wake mode interactions <i>N.W. Mureithi, M. Rodriguez, P. Versailles, A. Pham, H.D. Vo</i>	847
Flow-induced vibration of a sphere up to critical Reynolds number <i>T. Nishihara, Y. Eguchi</i>	853
Development of a novel vortex flow meter for downhole use <i>W. Schiferli, L. Cheng</i>	859
Near wake structure of a wall-mounted finite-length square cylinder <i>H.F. Wang, Y. Zhou</i>	865
Numerical study of vortex flow meters <i>R. Belakroum, T.H. Mai, M. Kadja, K. Zibouche</i>	871
Flow-induced vibration of a large-diameter elbow piping in high Reynolds number range, random force measurement and vibration analysis <i>K. Hirota, Y. Ishitani, T. Nakamura, T. Shiraishi, H. Sago, H. Yamano, S. Kotake</i>	877
Super-harmonic vibrations of model-scale riser pipes <i>R.J. McSherry, J.M.R. Graham, R.H.J. Willden</i>	883
<b><i>Author index</i></b>	889
<b><i>Acknowledgements</i></b>	892
