

Table of Contents

Plenary lectures

Hael Mughrabi

Fatigue, an everlasting materials problem - still en vogue 27

Keisuke Tanaka

Small fatigue crack propagation in notched components under combined torsional and axial loading 28

Steven Johnson

The history, logic and uses of the equivalent initial flaw size approach to total fatigue life prediction..... 29

M Neil James, Mark Newby, Danie Hattingh, Axel Steuwer

Shot peening of steam turbine blades: residual stresses and their modification by fatigue cycling..... 30

Session 1: Cyclic deformation and fatigue life

Charles Kwan, Zhirui Wang

Cyclic deformation behavior of ultra-fine grained copper processed by accumulative roll-bonding..... 31

Andreas Böhner, Heinz Werner Höppel, Rimma Lapovok, Mathias Göken

Influence of backpressure during equal channel angular pressing on the fatigue behaviour of AA5754 32

Lothar Werner Meyer, Kristin Hockauf, Thomas Niendorf, Svetlana Wagner, Thorsten Halle, Matthias Hockauf

Cyclic behavior and microstructural stability of an ultrafine-grained Al-Mg-Si alloy subjected to low-cycle fatigue..... 33

Pasquale Cavaliere

Cyclic deformation of ultra-fine and nanocrystalline metals through nanoindentation: similarities with crack propagation 34

Stephan Scheriau, Siegfried Kleber, Reinhard Pippan

The effect of severe plastic deformation on the low-cycle fatigue behavior of an austenitic stainless steel..... 35

Pierre-François Giroux, France Dalle, Maxime Sauzay, Christel Caës, Benjamin Fournier, Thilo Morgeneyer, Anne-Françoise Gourgues-Lorenzon

Influence of strain rate on P92 microstructural stability during fatigue tests at high temperature..... 36

Takayuki Yamagishi, Masayuki Akita, Masaki Nakajima, Yoshihiko Uematsu, Keiro Tokaji

Effect of sigma-phase embrittlement on fatigue behaviour in high-chromium ferritic stainless steel 37

Ivo Kuběna, Tomáš Kruml, Philippe Spatig, Nadine Baluc, Zbigniew Oksiuta, Martin Petrevec, Karel Obrtlík, Jaroslav Polák

Fatigue behaviour of ODS ferritic-martensitic Eurofer steel..... 38

Hélène Bultel, Jean-Bernard Vogt

Influence of thermal treatment on fatigue behavior of 4130 AISI steel..... 39

Krste Cvetkovski, Johan Ahlström, Birger Karlsson

Thermal softening of fine pearlitic steel and its effect on the fatigue behaviour 40

G. V. Prasad Reddy, R. Sandhya, K. Bhanu Sankara Rao, S. Sankaran <i>Influence of nitrogen alloying on dynamic strain ageing regimes in low cycle fatigue of AISI 316LN stainless steel</i>	41
Kalyan K Ray, Krishna Dutta, S Sivaprasad, Soumitra Tarafder <i>Fatigue damage of AISI 304 LN stainless steel: Role of mean stress</i>	42
Laurent de Baglion, Jose Mendez <i>Low cycle fatigue behavior of a type 304L austenitic stainless steel in air or in vacuum, at 20°C or at 300°C: relative effect of strain rate and environment</i>	43
Maxime Sauzay, Pierre Evrard, Antonin Steckmeyer, Emilie Ferrié <i>Physically-based modeling of the cyclic macroscopic behaviour of metals.....</i>	44
Peng Li, Zhefeng Zhang, Xiaowu Li, Shouxin Li, Zhongguang Wang <i>Effect of orientations on the cyclic deformation behaviors of fcc single crystals</i>	45
Seiichiro Tsutsumi, Masahiro Toyosada, Fionn Dunne <i>Phenomenological cyclic plasticity model for high-cycle fatigue</i>	46
Christian Motz, Daniel Kiener, Daniel Weygand, Peter Gumbsch, Reinhard Pippan <i>Cyclic response of copper micro-bending beams: Comparison between in-situ experiments and 3-D DDD Simulations</i>	47
Magnus Hörnqvist, Birger Karlsson <i>Dynamic strain ageing and dynamic precipitation in AA7030 during cyclic deformation.....</i>	48
Osama Khalil, Karl-Heinz Lang <i>Low cycle fatigue behaviour of AA2618 aluminium alloy.....</i>	49
Gonzalo M. Dominguez Almaraz, Victor H. Mercado Lemus, J. Jesus Villalon Lopez <i>Rotating bending fatigue tests for aluminum alloy 6061 T6, close to elastic limit and with artificial pitting holes</i>	50
Akira Ueno, Susumu Miyakawa, Koji Yamada, Tomoyuki Sugiyama <i>Fatigue behavior of die casting aluminum alloys in air and vacuum</i>	51
Ligia Nascimento, S. Yi, Jan Bohlen, Lenka Fuskova, Dietmar Letzig, Karl Kainer <i>High cycle fatigue behaviour of magnesium alloys</i>	52
Heinz Werner Höppel, Michaela Prell, Lilia May, Mathias Göken <i>Influence of grain size and precipitation state on the fatigue lives and deformation mechanisms of CP Aluminium and AA6082 in the VHCF-regime</i>	53
Christian Stöcker, Martina Zimmermann, Hans-Jurgen Christ <i>Influence of prestraining on the high-temperature fatigue behaviour of polycrystalline Ni-base superalloys in the VHCF range.....</i>	54
Domnin Gelmedin, Karl-Heinz Lang <i>Fatigue behaviour of the superalloy IN 713C under LCF-, HCF- and superimposed LCF / HCF-loading</i>	55
Qingyuan Wang, Tang Li, Xiangguo Zeng <i>Gigacycle fatigue behavior of high strength aluminum alloys.....</i>	56
Christopher Szczepanski, Sushant Jha, James Larsen, J. Wayne Jones <i>The role of microstructural heterogeneity on fatigue lifetime variability in the very high cycle regime of an alpha + beta titanium alloy, Ti-6Al-2Sn-4Zr-6Mo</i>	57
Denis Delagnes, Farhad Rezai-Aria, Christophe Levaillant <i>Influence of testing and tempering temperatures on fatigue behaviour, life and crack initiation mechanisms in a 5%Cr martensitic steel</i>	58
Holger Germann, Peter Starke, Eberhard Kerscher, Dietmar Eifler <i>Fatigue behaviour and lifetime calculation of the cast irons EN-GJL-250, EN-GJS-600 and EN-GJV-400</i>	59

Session 13: Fibre composites

Antoine Launay, Yann Marco, Habibou Maitournam, Ida Raoult, Fabien Szymtka <i>Cyclic behavior of short glass fiber reinforced polyamide for fatigue life prediction of automotive components</i>	194
Simone Giancane, Francesco Panella, Riccardo Nobile, Vito Dattoma <i>Fatigue damage evolution of fiber reinforced composites with digital image correlation analysis</i>	195
H. Mivehchi, A. Varvani-Farahani <i>The effect of temperature on fatigue strength and cumulative fatigue damage of FRP composites</i>	196
Ambrosius Weiss, Walid Trabelsi, Laurent Michel, Jean-Jacques Barrau, Stephane Mahdi <i>Influence of ply-drop location on the fatigue behaviour of tapered composites laminates</i>	197
Ahmet Hanifi Ertas, Fazil O. Sonmez <i>Design of fiber reinforced laminates for maximum fatigue life</i>	198
Zuraidah Salleh, Yakub Taib, Nor Amalina Nordin, S. Yunus, Mohamad Nor Berhan, Ahmad Badri Ismail <i>Post impact fatigue strength of natural fiber</i>	199

Session 14: Creep-fatigue interactions

Pierre Marmy, Olivier Gillia <i>Investigations of the effect of creep fatigue interaction in a Cu-Cr-Zr alloy</i>	200
Jeffrey L. Evans <i>Crack tip kinetics during creep-fatigue of nickel-base superalloys</i>	201
Huichen Yu, Ying Li, Xinyue Huang, Xueren Wu, Duoqi Shi, Xiaoguang Yang <i>Low cycle fatigue behavior and life evaluation of a P/M nickel base superalloy under different dwell conditions</i>	202
Stan Mandziej <i>Low-cycle thermal-mechanical fatigue as an accelerated creep test</i>	203
Katsuyuki Tokimasa, Yuya Miyahara <i>Evaluation of the effect of strain hold time on nonproportionally combined axial/torsional fatigue life of SUS304 and 316LC steels</i>	204
Benjamin Fournier, Stéphanie Hollner, J. Longour, Christel Caës, I. Tournié, Pierre-François Giroux, France Dalle, Maxime Sauzay, S. H. Kim, D.-W. Kim, W.-S. Ryu, André Pineau <i>Comparison of various commercial and experimental 9-12%Cr steels under high temperature fatigue and creep-fatigue loadings</i>	205
José M. Silva, Ricardo Cláudio, Carlos Moura Branco, José Martins Ferreira <i>Creep-fatigue behaviour of a new generation Ni-base superalloy for aeroengine usage</i>	206

Session 15: Corrosion

Aditya Jaya, Ung Hing Tiong, Reza Mohammed, Cees Bil, Graham Clark <i>Corrosion treatments and the fatigue of aerospace structural joints</i>	207
Frédéric Menan, Gilbert Hénaff <i>Synergistic action of fatigue and corrosion during crack growth in the 2024 aluminium alloy</i>	208

Jun Nakamura, Mitsuo Miyahara, Tomohiko Omura, Hiroyuki Semba, Masayuki Wakita, Youhei Otome	
<i>Degradation of fatigue properties in high pressure gaseous hydrogen environment evaluated by cyclic pressurization tests</i>	209
Ryuichiro Ebara	
<i>Corrosion fatigue crack initiation behavior of stainless steels</i>	210
Mark Knop, Jeff Heath, Zoran Sterjovski, Stan Lynch	
<i>Effects of cycle frequency on corrosion-fatigue crack growth in cathodically protected high-strength steels</i>	211
Session 16: Thermo-mechanical fatigue	
Thomas K. Heckel, Hans-Jurgen Christ	
<i>Isothermal and thermomechanical fatigue of titanium alloys</i>	212
Sten Johansson, Johan Moverare, Daniel Leidermark, Kjell Simonsson, Jan Kanessund	
<i>Investigation of localized damage in single crystals subjected to thermomechanical fatigue (TMF)</i>	213
Martin Petrenec, Tomáš Kruml, Karel Obrtlík, Jaroslav Polák, Petr Buček	
<i>Influence of niobium alloying on the low cycle fatigue of gamma-TiAl alloys at room and high temperatures</i>	214
Robert L. Amaro, Stephen D. Antolovich, Richard W. Neu, Alexander Staroselsky	
<i>On thermo-mechanical fatigue in single crystal Ni-base superalloys</i>	215
Robert A. Kupkovits, Daniel J. Smith, Richard W. Neu	
<i>Influence of minimum temperature on the thermomechanical fatigue of a directionally-solidified Ni-base superalloy</i>	216
Markus Grieb, Hans-Jurgen Christ, Burkhard Plege	
<i>Thermomechanical fatigue of cast aluminium alloys for cyclinder head applications - experimental characterization and life prediction</i>	217
Tsuyoshi Takahashi, Katsuhiko Sasaki	
<i>Low cycle thermal fatigue of aluminum alloy cylinder head in consideration of changing metrology microstructure</i>	218
Shadan Tabibian, Eric Charkaluk, Andrei Constantinescu, Alexis Oudin, Fabien Szmytka	
<i>Behavior, damage and fatigue life assessment of lost foam casting aluminum alloys under thermo-mechanical fatigue conditions</i>	219
Byeong Choon Goo, Choong Hwan Lim	
<i>Thermal fatigue evaluation of cast iron discs for railway vehicles</i>	220
Abderrazak Daoud, Jean-Bernard Vogt, Eric Charkaluk, Lin Zhang, Jean Claude Baisci	
<i>Effect of temperature on the low cycle fatigue behavior of Glidcop Al-15</i>	221
Kai Bauerbach, Michael Vormwald, Jurgen Rudolph	
<i>Fatigue assessment of thermal cyclic loading conditions based on a short crack approach</i>	222
Antoine Fissolo, Jean Marc Stelmaszyk, Cédric Gourdin, Pauline Bouin, Grégory Perez	
<i>Thermal fatigue loading for a type 304-L stainless steel used for pressure water reactor: Investigations on the effect of a nearly perfect biaxial loading, and on the cumulative fatigue-life</i>	223
Sören Sjöström, Hakan Brodin	
<i>Influence of TBC end geometry on the TMF life of an APS TBC</i>	224

Session 17: Fretting and contact fatigue

- Thomas Christiner, Johannes Reiser, Istvan Godor, Hermann Maderbacher, Wilfried Eichlseder, Franz Trieb, Rene Stuhlinger**
Combined numerical and experimental investigations on fretting wear..... 225
- Kunio Asai**
Fretting fatigue strength of 12% Cr steel under high local contact pressure and its fracture mechanics analysis 226
- Jean-François Brunel, Eric Charkaluk, Philippe Dufrénoy, François Demilly**
Rolling contact fatigue of railways wheels: Influence of steel grade and sliding conditions..... 227
- Junbiao Lai, Hans Kuijpers, Yuri Kadin**
A combined analytical-numerical model for subsurface crack initiation and propagation under rolling contact loading 228
- Peter Göncz, Rok Potočnik, Srečko Glodež**
Fatigue behavior of 42CrMo4 steel under contact loading 229

Session 18: Durability, reliability and expert systems

- Jan Papuga**
New technologies for sharing research data and costs 230
- Jianyu Zhang, Rui Bao, Xiang Zhang, Binjun Fei**
A probabilistic estimation method of multiple site damage occurrence for aircraft structures 231
- Kristoffer Karlén, Marten Olsson**
Experimental and statistical investigation of the weakest link integral and the volume effect 232
- Sotomi Ishihara, Syosei Yoshifuji, Tomonori Namito, Takahito Goshima**
On the distributions of fatigue lives and defect-sizes in the die-cast magnesium alloy AZ91..... 233

Session 19: Welding, casting, and other manufacturing techniques

- Saki Chowdhury, Daolun Chen, Sanjeev Bhole, Xinjin Cao**
Effect of pin tool thread orientation on fatigue strength of friction stir welded AZ31B-H24 Mg butt joints 234
- Yoshihiko Uematsu, Keiro Tokaji, Yasunari Tozaki, Yasuhito Nakashima**
Fatigue behaviour of dissimilar friction stir spot weld between A6061 and SPCC welded by a scrolled groove shoulder tool..... 235
- Catarina Vidal, Virgínia Infante, Pedro Vilaça**
Assessment of improvement techniques effect on fatigue behaviour of friction stir welded aerospace aluminium alloys..... 236
- Mario Buchely, Hector Jaramillo, Wilson Hormaza**
Effect of electrode covering type in high cycle axial fatigue of AISI 304 base metal welded using AISI 308L filler metal 237
- F. Packandam, A. Varvani-Farahani**
A comparative study on fatigue damage assessment of welded joints under uniaxial loading based on energy methods 238
- Hong-Tae Kang, Ilaria Accorsi, Bipin Patel, Eric Pakalns**
Fatigue performance of resistance spot welds in three sheet stack-ups..... 239

Carole Erny, David Thevenet, Jaen-Yves Cognard, Manuel Korner <i>Fatigue assessment of naval welded assemblies</i>	240
Soran Hassanifard, Mohammad Zehsaz <i>The effects of residual stresses on the fatigue life of 5083-O aluminum alloy spot welded joints</i>	241
Manuel Wohlfahrt, Christian Oberwinkler, Sabine Tunzini, Armin Rauscher, Ruben de la Prida Caballero, Wilfried Eichlseder <i>The role of sampling position on fatigue of austempered ductile iron</i>	242
Ján Kardoš <i>Contact force control in the robot end-point</i>	243
Session 20: Experimental techniques	
Magnus Hörnqvist, Thomas Hansson, Olle Clevfors <i>Fatigue crack growth testing using varying R-ratios</i>	244
Ryan Morrissey, Reji John <i>Thin foil test system development</i>	245
Yoshiyuki Furuya <i>Size effects in gigacycle fatigue of high-strength steel under ultrasonic fatigue testing</i>	246
Michael Koster, Guntram Wagner, Dietmar Eifler <i>Cyclic deformation behaviour of a medium carbon steel in the VHCF regime</i>	247
Marcus Klein, Dietmar Eifler <i>Influences of the manufacturing processes on the surface integrity and the resulting fatigue behaviour of quenched and tempered SAE 4140</i>	248
Sangaraju Vishnuvardhan, Raghava Gopala Setty, Gandhi Palla, Saravanan Manickam, Pukazhendhi Dakshina Murthy, Sumit Goyal, Punit Arora, Suneel K. Gupta <i>Fatigue ratcheting studies on TP304 LN stainless steel straight pipes</i>	249
Luiz Fábio Vieira, Herman J. C. Voorwald, Midori Y. P. Costa, Maria Odila Hilario Cioffi <i>Fatigue performance on AISI 4340 steel Ni-20Cr and Ni-Cr-B-Si-Fe HVOF coated</i>	250
Jozef Gocál, Jozef Vičan, Richard Hlinka, Jozef Jošt <i>Laboratory tests of a typical fatigue prone riveted steel railway bridge structural detail</i>	251
Van-Xuan Tran, J. Pan <i>Fatigue behavior of dissimilar spot friction welds in lap-shear and cross-tension specimens of aluminum and steel sheets</i>	252
Yann Marco, Vincent Le Saux, Sylvain Calloch, Pierre Charrier <i>X-ray computed m-tomography: A tool for the characterization of fatigue defect population in a polychloroprene rubber</i>	253
Gianni Nicoletto, Giancarlo Anzelotti, Radomila Konečná <i>X-ray computed tomography vs. metallography for pore sizing and fatigue of cast Al-alloys</i>	254
Daiki Shiozawa, Yoshikazu Nakai, Tomonobu Murakami <i>Observation of crack propagation under torsion fatigue tests by synchrotron radiation micro-CT imaging</i>	255
Tobias Kennerknecht, Durime Bugezi-Ahmeti, Christoph Eberl <i>Fatigue properties of micro molded aluminum bronze</i>	256

Jeroen Van Wittenberghe, Jan De Pauw, Patrick De Baets, Wim De Waele, Magd Abdel Wahab, Guido De Roeck	
<i>Experimental determination of the fatigue life of modified threaded pipe couplings</i>	257
Kiana Kashefi, Amir Peyman Zandi, Mostafa Zeinoddini	
<i>Fatigue life evaluation through field measurements and laboratory tests</i>	258
Vincent Le Saux, Yann Marco, Sylvain Calloch, Cédric Doudard, Pierre Charrier	
<i>An energetic criterion for the fatigue of rubbers: An approach based on a heat build-up protocol and micro-tomography measurements</i>	259
Dalenda Jeddi, Henri-Paul Lieurade	
<i>Effect of retained austenite on high cycle fatigue behavior of carburized 14NiCr11 steel</i>	260
 Session 21: Fatigue life enhancement techniques	
Yasuo Ochi, Takashi Matsumura, Takaaki Ikarashi, Kiyotaka Masaki, Toshifumi Kakiuchi, Yuji Sano, Takafumi Adachi	
<i>Effects of laser peening treatment without protective coating on axial fatigue property of aluminum alloy</i>	261
Matteo Benedetti, Vigilio Fontanari, Bernardo Monelli	
<i>Plain fatigue resistance of shot peened high strength aluminium alloys: effect of loading ratio</i>	262
Kamellia Dalaei, Birger Karlsson, Lars-Erik Svensson	
<i>Stability of residual stresses created by shot peening of pearlitic steel and their influence on fatigue behaviour</i>	263
Pedro Sanjurjo, Cristina Rodríguez, Inés Pariente, Javier Belzunce, Alfonso Canteli	
<i>The influence of shot peening on the fatigue behaviour of duplex stainless steel</i>	264
Libor Holáň, Jaroslav Pokluda, Karel Slámečka, Reinhard Pippan	
<i>Micromechanisms of near-threshold crack propagation under mode II and III in austenitic steel</i>	265
Reji John, Dennis Buchanan, Michael Caton, Sushant Jha	
<i>Stability of shot peen residual stresses in IN100 subjected to creep and fatigue loading</i>	266
Sara Bagherifard, Inés Fernández-Pariente, Ramin Ghelichi, Mario Guagliano	
<i>Fatigue properties of nanocrystallized surfaces obtained by high energy shot peening.....</i>	267
Delphine Retraint, Juha Uusitalo, Pentti Karjalainen, Mikko Palosaari	
<i>Effect of the surface mechanical attrition treatment on the fatigue properties of two austenitic stainless steels</i>	268
Carsten Müller-Bollenhagen, Martina Zimmermann, Hans-Jurgen Christ	
<i>Adjusting the very high cycle fatigue properties of a metastable austenitic stainless steel by means of the martensite content.....</i>	269
Sushant Jha, Reji John, James Larsen	
<i>Fatigue life prediction under shot-peen residual stresses in Ti-6Al-2Sn-4Zr-6Mo</i>	270
Ali El Chaikh, Peter Schmidt, Hans-Jurgen Christ	
<i>Fatigue properties of duplex-aged Ti 38-644 metastable beta titanium alloy</i>	271
János Lukács, Gyula Nagy, Imre Török, János Égert, Balázs Pere	
<i>Experimental and numerical investigations of external reinforced damaged pipelines</i>	272

Eberhard Kerscher, Karl-Heinz Lang <i>Influence of thermal and thermomechanical treatments on the fatigue limit of a bainitic high-strength bearing steel.....</i>	273
Antonio Jorge Abdalla, Vladimir Scheid Baggio, Carlos Antonio Reis Pereira Baptista, Miguel Justino Ribeiro Barbosa <i>Fatigue life changing in rolled carbon steel after plasma thermochemical treatments</i>	274
Session 22: Case studies and industrial applications	
Stanislav Seitzl, Vlastimil Bilek, Zbyněk Keršner, Jiří Veselý <i>Cement based composites for thin building elements: Fracture and fatigue parameters</i>	275
Herman J. C. Voorwald, Luiz Fábio Vieira, Maria Odila Hilario Cioffi <i>Evaluation of WC-10Ni thermal spraying coating by HVOF on the fatigue and corrosion AISI 4340 steel</i>	276
Amaury Chabod, Nicolas Vanderesse, Jean-Yves Buffière, Eric Maire <i>Study by microtomography of the impairment by porosity of the fatigue resistance of Al-Si₉Cu₃ castings</i>	277
Jiří Kunz, Ondřej Kovářik, Hynek Lauschmann, Jan Siegl, Petr Augustin <i>Fractographic reconstitution of fatigue crack growth in integrally stiffened panels.....</i>	278
Luis Llanes, Elena Tarres, Giselle Ramirez, Carlos Alberto Botero, Emilio Jiménez-Piqué <i>Fatigue susceptibility under contact loading of hardmetals coated with ceramic films</i>	279
Iain Le May <i>Case studies of three fatigue failure evaluations in aircraft</i>	280
Anders Blom, Hans Ansell, Joakim Schön, Börje Andersson <i>Structural integrity of hybrid metal composite structures in a fighter aircraft.....</i>	281
Min Liao, Guillaume Renaud <i>Fatigue analysis for CF-18 component: wing fold shear Tie Lug.....</i>	282
Miroslav Novosad, Rostislav Fajkoš, Bohuslav Řeha, Rudolf Řezníček <i>Fatigue tests of railways axles.....</i>	283
Posters	
Martin Petrenec, Hana Tesařová, Přemysl Beran, Miroslav Šmíd, Pavla Roupcová <i>Comparison of low cycle fatigue of ductile cast irons with different matrix alloyed with nickel.....</i>	284
Martin Petrenec, Přemysl Beran, Jiří Dluhoš, Michal Zouhar, Martin Ševčík <i>Analysis of fatigue crack initiation in cycled austempered ductile cast iron</i>	285
Leonardo Sandor, Ismael Politori, Cristiane Gonçalves, Andre Uehara, Claudenete Leal, Marcel Sato, Itamar Ferreira <i>Fatigue crack propagation in nine steels, Type SAE 43XX, from 0.20 to 1.00 % C, for the simulation of the fatigue behavior in a carburized layer of the SAE 4320.....</i>	286
Hyun-Kyu Jun, Hyun-Seung Jung, Dong-Hyong Lee, Jung-Won Seo, Seok-Jin Kwon <i>Fatigue crack evaluation on the underframe of EMU carbody.....</i>	287
Lina Zhang, Xueren Wu, Jianzhong Liu, Benrun Hu <i>Finite element analysis on the crack tip residual stress under single overload.....</i>	288
Mohd Fairuz ab Rahman, Reza Mohammed, Xiaobo Yu, Qianchu Liu, Graham Clark <i>Prediction of stable tearing in fatigue crack growth.....</i>	289

Denise F. Laurito, Carlos Antonio Reis Pereira Baptista, Marcelo Augusto S. Torres, Antonio Jorge Abdalla	
<i>Microstructural effects on fatigue crack growth behavior of a microalloyed steel</i>	290
Khaled Ayadi	
<i>Survey of the propagation of the fissure in a polymer</i>	291
Jong Hoon Lee, Bum Joon Kim, Moon Ki Kim, Byeong Soo Lim	
<i>Effect of oxidation on K_{th} in 12Cr steel</i>	292
Rahi Chermahini, Majid Jabbari	
<i>Fatigue crack growth and closure behavior under multi axial loading</i>	293
Fang-Wen Wang, Yi-Heng Chen	
<i>Fatigue damage driving force based on the M-integral concept</i>	294
Georges Ayoub, Fahmi Zairi, Caroline Frédérix, Jean-Michel Gloaguen, Moussa Nait-Abdelaziz, Roland Seguela, Jean-Marc Lefebvre	
<i>Modelling finite deformation stress-strain response during loading-unloading of polyethylene over a wide range of crystallinities</i>	295
Sunny Lok Hin Chan, Ung Hing Tiong, Cees Bil, Graham Clark	
<i>Some factors influencing damage tolerance under helicopter spectra</i>	296
Hermann Maderbacher, Thomas Christiner, Hans-Peter Gänser, Martin Riedler, Michael Stoschka, Wilfried Eichlseder	
<i>Lifetime evaluation of hot forged aerospace components by linking microstructural evolution and fatigue behaviour</i>	297
Anastasya Gromova, Yurii Ivanov, Sergey Vorobyov, Sergey Konovalov, Sergey Gorbunov, Victor Gromov	
<i>Ways of the dislocation substructure evolution in austenite steel under low and multicycle fatigue</i>	298
Vladimir Kornev, Evgeniy Karpov, Alexander Demeshkin	
<i>Damage accumulation in the pre-fracture zone under low-cyclic loading of specimens with the edge crack</i>	299
Ondřej Pospíchal, Barbara Kucharczyková, P. Misák, Tomáš Vymazal	
<i>Freeze-thaw resistance of concrete with porous aggregate</i>	300
Barbara Kucharczyková, Zbyněk Keršner, Ondřej Pospíchal, P. Misák, Tomáš Vymazal	
<i>Influence of freeze thaw cycles on fracture parameters values of lightweight concrete</i>	301
Simone Giancane, Riccardo Nobile, Francesco Panella, Vito Dattoma	
<i>Fatigue life prediction of notched components based on a nonlinear continuum damage mechanics model</i>	302
Heinz Werner Höppel, Lilia May, Mathias Göken, Ruzlan Valiev	
<i>Fatigue properties of ultrafine-grained Ti6Al4V ELI alloy for medical applications</i>	303
Gilbert Hénaff, Guillaume Benoit, Mathieu Comyn, Mustapha Jouiad	
<i>Fatigue crack growth resistance of a Fe-40Al grade 3 alloy prepared by mechanical alloying and forging</i>	304
Yi-Ming Jen, Yu-Hsiang Yang	
<i>A study of two-stage cumulative fatigue behavior for CNT/epoxy composites</i>	305
Eliane Grigoletto, Itamar Ferreira	
<i>Isothermal fatigue properties of Sn63-Pb37, Sn62-Pb36-Ag2, and Sn42-Bi58 solder joints</i>	306

Gilson Silva Jr., Herman J. C. Voorwald, Luiz Fábio Vieira, Maria Odila H. Cioffi, Rafael Gustavo Bonora	
<i>Evaluation of WC-10Ni thermal spray coating with shot peening on the fatigue strength of AISI 4340 steel.....</i>	307
Rafael Gustavo Bonora, Herman J. C. Voorwald, Maria Odila Hilario Cioffi, Gilson Silva Jr., Luiz Fábio Santos Vieira	
<i>Fatigue in AISI 4340 steel thermal spray coating by HVOF for aeronautic application.....</i>	308
Midori Y. P. Costa, Maria Odila Hilario Cioffi, Marcelo Venditti, Herman J. C. Voorwald	
<i>Fatigue fracture behavior of Ti-6Al-4V PVD coated.....</i>	309
Maria Odila Hilario Cioffi, Gustavo Volpiano, Herman J. C. Voorwald, Mirabel C. Rezende	
<i>Carbon fiber non-crimp multi-axial reinforcement and epoxy mono-component system composite: Fatigue behavior.....</i>	310
Loic Jegou, Yann Marco, Sylvain Calloch, Cédric Doudard	
<i>Evaluation of the influence of geometrical and injection parameters on the fatigue life of PA66 GF50, based on heat built-up measurements.....</i>	311
János Lukács	
<i>Fatigue crack growth tests on type 321 austenitic stainless steel in corrosive environment and at elevated temperature.....</i>	312
Ung Hing Tiong, Graham Clark	
<i>The structural environment as a factor affecting coating failure in aircraft joints.....</i>	313
Jung-Won Seo, Seok-Jin Kwon, Hyun-Kyu Jun, Dong-Hyong Lee	
<i>Fatigue crack growth behavior of surface crack in rails.....</i>	314
Elguja Kutelia, Nugzar Khidasheli, Olga Tsurtsumia, Gocha Beradze	
<i>The contact fatigue and the wear of DADI class aluminum cast iron.....</i>	315
Dong-Hyong Lee, Seok-Jin Kwon, Young-Sam Ham, Won-Hee You	
<i>Characterization of fretting damage in a press-fitted shaft below the fretting fatigue limit.....</i>	316
José Costa, José Ferreira, Luis Abreu	
<i>Fatigue behaviour of butt welded joints in a high strength steel.....</i>	317
Naheen Farabi, Daolun Chen, Norman Y. Zhou	
<i>Fatigue properties of laser welded dual-phase steel joints.....</i>	318
Artur Mariano de Sousa Malafaia, Marcelo Tadeu Milan, Marcelo Falcão de Oliveira, Dirceu Spinelli	
<i>Fatigue behavior of friction stir spot welding and riveted joints in an Al alloy.....</i>	319
Andres L Garcia Fuentes, Rafael D Salas Garcia, Alberto Velasquez Del Rosario, Leiry Centeno	
<i>Physical metallurgy of dissimilar steels (ASTM A240-A537) welded unions and mechanical behavior under monotonic and cyclic loads.....</i>	320
Van-Xuan Tran, D. Leguillon, A. Krishnan, L. R. Xu	
<i>Strength and fracture energy of an adhesive bonding between similar and dissimilar sheet materials.....</i>	321
Marion Risbet, Pierre Feissel, Thierry Roland, Delphine Brancherie, Jean-Marc Roelandt	
<i>Digital image correlation technique : application to early fatigue damage detection in stainless steel.....</i>	322
Antonio Jorge Abdalla, Carlos Eduardo Cancellier Fonseca, Carlos Antonio Reis Pereira Baptista, Miguel Justino Ribeiro Barbosa, Sérgio Schneider, Davi Neves	
<i>Microstructure and fatigue life behavior of an austenitic stainless steel modified with calcium.....</i>	323

Mahdi Chemkhi, Yuanyuan Pi, Delphine Retraint, Clémence Demangel, Hicham Benhayoune <i>Influence of a nanocrystalline surface layer on fatigue strength of Ti-6Al-4V</i>	324
João Mattos, Andre Uehara, Marcel Sato, Itamar Ferreira <i>Fatigue properties and micromechanism of fracture of an AlSiMg0.6 cast alloy used in diesel engine cylinder head.....</i>	325
Wen Tan, Michael Stoschka, Martin Riedler, Wilfried Eichlseder, Manuel Wohlfahrt <i>Fatigue investigations on a forged W-link to improve the transferability of specimen results to real components</i>	326

Thiago Rausch, Paul Beiss, Christoph Broeckmann, Stefan Lindlohr, Rolf Weber <i>Application of quantitative image analysis of graphite structures for the fatigue strength estimation of cast iron materials</i>	60
Meurig Thomas, Martin Jackson, Trevor Lindley <i>The effect of shot peening on the fatigue properties of a near alpha titanium alloy following long term thermal exposure</i>	61
Kasper Lambrighs, Ignaas Verpoest, Bert Verlinden, Martine Wevers <i>Influence of non-metallic inclusions on the fatigue properties of heavily cold drawn steel wires.</i>	62
Martin Schilke, Johan Ahlström, Birger Karlsson <i>Low cycle fatigue and deformation behaviour of austenitic manganese steel in rolled and in as-cast conditions.....</i>	63
Alexander Balitskii, V. I. Vytvytskyi, L. M. Ivaskevich <i>The low-cycle fatigue of corrosion-resistant steels in high pressure hydrogen</i>	64
Stuart Holdsworth, Anna Maschek, Luca Binda, Edoardo Mazza <i>Effect of prior cyclic damage removal on high temperature low cycle fatigue endurance</i>	65
Anthony Ezanno, Cédric Doudard, Sylvain Calloch, Thierry Millot, Jean-Loup Heuzé <i>Fast characterization of HCF properties of a cast copper-aluminum alloy by self-heating measurements under cyclic loadings</i>	66
Yosef Katz, Henry Alush <i>Insights beside assessments into small volume cyclic response of elastic-plastic systems</i>	67
Andrey Shaniavskiy <i>Bifurcation diagram for in-service fatigued metals.....</i>	68
 Session 2: Crack initiation	
Zhefeng Zhang, Peng Zhang, Shen Qu, Qiqiang Duan, Shouxin Li, Zhongguang Wang <i>Review on fatigue cracking mechanisms of f.c.c. crystalline materials</i>	69
Jiří Man, Miroslav Valtr, Anja Weidner, Martin Petrenek, Karel Obrtlík, Jaroslav Polák <i>AFM study of surface relief evolution in 316L steel fatigued at low and high temperatures</i>	70
Pengfei Mu, Veronique Aubin <i>Microcrack initiation in low-cycle fatigue of an austenitic stainless steel.....</i>	71
Helge Knobbe, Philipp Köster, Hans-Jurgen Christ, Claus-Peter Fritzen, Martin Riedler <i>Initiation and propagation of short fatigue cracks in forged Ti6Al4V.....</i>	72
Christopher Szczepanski, S. Lee Semiatin, James Larsen <i>The role of microtexture on fatigue lifetime variability and crack initiation mechanisms.....</i>	73
Ingrid Picas, Núria Cuadrado, Daniel Casellas, Alexey Goez, Luis Llanes <i>Microstructural effects on the fatigue crack nucleation in cold work tool steels.....</i>	74
Hsin Shen Ho, Marion Risbet, Xavier Feaugas, Jérôme Favergeon, Gérard Moulin <i>Fundamental mechanisms of surface damage associated to the localization of the plastic deformation in fatigue.</i>	75
Daniel Leidermark, Johan Moverare, Kjell Simonsson, Sören Sjöström, Sten Johansson <i>Fatigue crack initiation in a notched single-crystal component</i>	76
Tzu-Yin Jean Hsu, Zhirui Wang <i>Fatigue crack initiation at notch root under compressive cyclic loading.....</i>	77

Andrea Cini, Philip E. Irving	
<i>Transformation of defects into fatigue cracks; the role of K_t and defect scale on fatigue life of non pristine components.....</i>	78
Mohamad Nor Berhan, Imran Ismail	
<i>The effect of tempering temperatures to crack nucleation in sintered steel under biaxial cyclic loading.....</i>	79
 Session 3: Growth of short and long cracks	
Yukitaka Murakami, Yoji Mine, Toshihiko Kanezaki, Saburo Matsuoka	
<i>Effects of hydrogen content and cyclic frequency on fatigue crack growth of austenitic stainless steels</i>	80
Thomas Mottitschka, Gerhard Pusch, Horst Biermann, Lutz Zybell, Meinhard Kuna	
<i>Influence of overloads on the fatigue crack growth in nodular cast iron: Experiments & numerical simulation</i>	81
Masahiko Natsume, Yoshiichirou Hayashi, Hiroyuki Akebono, Masahiko Kato, Atsushi Sugeta	
<i>Fatigue properties and crack propagation behavior of stainless cast steel for turbine runner of hydraulic power generation</i>	82
Loris Molent, Simon Barter	
<i>The lead fatigue crack concept for aircraft structural integrity.....</i>	83
Michel Chaussumier, Majid Shahzad, Catherine Mabru, R. Chieragatti, Farhad Rezai-Aria	
<i>A fatigue multi-site cracks model using coalescence, short and long crack growth laws, for anodized aluminium alloys</i>	84
Adriano Francisco Siqueira, Carlos Antonio Reis Pereira Baptista, O. L. C. Guimarães, C. O. F. T. Ruckert	
<i>Describing the total fatigue crack growth curves for aluminum alloys with an exponential equation.....</i>	85
Mustapha Benachour, Abdelhamid Hadjoui, Mohamed Benguediab, Nadja Benachour	
<i>Effect of the amplitude loading on fatigue crack growth</i>	86
Magnus Hörnqvist, Tomas Mansson	
<i>Fatigue crack growth in Ti-2624 under elasto-plastic loading conditions</i>	87
Sushant Jha, Michael Caton, James Larsen	
<i>The role of the small-crack regime in the effect of dwell-time on fatigue lifetime variability in a Ni-base superalloy</i>	88
David Gustafsson, Johan Moverare, Sten Johansson, Magnus Hörnqvist, Kjell Simonsson, Sören Sjöström, Babak Sharifimajda	
<i>Fatigue crack growth behaviour of Inconel 718 with high temperature hold times</i>	89
Masood Shah, Catherine Mabru, Farhad Rezai-Aria	
<i>Investigation of crack propagation in X38CrMoV5 (AISI H11) tool steel at elevated temperatures.....</i>	90
Emilie Rezig, Philip E. Irving, Michael J. Robinson	
<i>Development and early growth of fatigue cracks from corrosion damage in a high strength stainless steel</i>	91
Luca Collini	
<i>Fatigue crack growth in ECAPed commercially pure UFG copper</i>	92
Stefanie Stanzl-Tschegg, Bernd Schönbauer	
<i>Near-threshold fatigue crack propagation and internal cracks in steel.....</i>	93
Takashi Nakamura, Hiroyuki Oguma, Yuto Shinohara	
<i>The effect of vacuum-like environment inside sub-surface fatigue crack on the formation of ODA fracture surface in high strength steel.....</i>	94

Jean Petit, Christine Sarrazin-Baudoux, F Lorenzi <i>Fatigue crack propagation in thin wires of ultra high strength steels</i>	95
Roi A. Meiom, D. H. Alsem, Trevor C. Clark, Robert O. Ritchie, Christopher L. Muhlstein <i>The role of microstructural stability in the fatigue crack growth behavior of nanograined platinum films</i>	96
Jaroslav Polák, Tomáš Kruml, Karel Obrtlík, Jiří Man, Martin Petrevec <i>Short crack growth in polycrystalline materials</i>	97
Michael Marx, Wolfgang Schaef, Horst Vehoff <i>Interaction of short cracks with the local microstructure</i>	98
Xianfeng Ma, Huiji Shi, Jialin Gu, Guofeng Chen, Oliver Luesebrink, Harald Harders <i>In-situ observations of the effects of orientation and carbide on low cycle fatigue crack propagation in a single crystal superalloy</i>	99
Ingmar Roth, Martin Kuebbeler, Ulrich Krupp, Hans-Jurgen Christ, Claus-Peter Fritzen <i>Crack initiation and short crack growth in metastable austenitic stainless steel in the high cycle fatigue regime</i>	100
Fernando Antunes, Dulce Rodrigues, Ricardo Branco <i>An analytical model of plasticity induced crack closure</i>	101

Session 4: Crack growth thresholds

Mirco D. Chapetti <i>Prediction of threshold for very high cycle fatigue ($N > 10^7$ cycles)</i>	102
Hans-Gerd Lambers, Bernhard Gorny, Sergej Tschumak, Hans Jurgen Maier, Demircan Canadinc <i>Crack growth behavior of low-alloy bainitic 51CrV4 steel</i>	103
Thomas Klünsner, Stefan Marsoner, Reinhold Ebner, Reinhard Pippan, Johannes Glätzle, Arndt Püschel <i>Effect of microstructure on fatigue properties of WC-Co hard metals</i>	104
Golta Khatibi, Jelena Horky, Brigitte Weiss, Michael Zehetbauer <i>Fatigue crack growth behaviour of ultrafine grained copper processed by high pressure torsion</i>	105
Jan Klusák, Tomáš Profant, Michal Kotoul <i>Determination of the threshold values of orthotropic bi-material notches</i>	106

Session 5: Crack closure and shielding

David Nowell, Paulo de Matos <i>Application of digital image correlation to the investigation of crack closure following overloads</i>	107
K. Vor, Christine Sarrazin-Baudoux, C Gardin, Jean Petit <i>Wake history effect on closure of short and long fatigue crack in 304L stainless steel</i>	108
Steffen Brinckmann, Thomas Siegmund <i>Closure during fatigue crack propagation: Numerical study using a micro-mechanical based cohesive zone model</i>	109
Ji-Ho Song, Youn-Il Chung <i>A review of crack closure measurements by compliance techniques and the normalized-extended ASTM method as a currently most refined, Practical and simple one</i>	110

Yoshinori Yamada, James Newman	
<i>Crack closure under high load ratio and K_{max} test conditions</i>	111
Igor Varfolomeev, Michael Luke, Sergii Moroz	
<i>Experimental and numerical investigations of fatigue crack growth in various specimen geometries</i>	112
 Session 6: Fatigue modelling and simulation	
Rajesh Prasannavenkatesan, David McDowell	
<i>Microstructure-sensitive modeling of high cycle fatigue in martensitic gear steels</i>	113
Toshihiko Hoshide	
<i>Life prediction based on biaxial fatigue crack growth simulated in different microstructures modeled by using voronoi-polygons</i>	114
Vladimir Kornev	
<i>Two-scale model of low-cycle fatigue. Embrittlement of pre-fracture zone material</i>	115
Alfonso Fernández-Canteli, Enrique Castillo, Manuel López-Aenlle, Stanislav Seitzl	
<i>Using statistical compatibility to derive advanced probabilistic fatigue models</i>	116
Craig Przybyla, David McDowell	
<i>Simulation-based extreme value marked correlations in fatigue of advanced engineering alloys</i>	117
Julien Schwartz, Olivier Fandeur, Colette Rey	
<i>Fatigue crack initiation modeling of 316LN steel based on non local plasticity theory</i>	118
Yibin Xue, Tong Li	
<i>Micromechanical simulations for fatigue damage incubation mechanisms of LENS-TM processed steel</i>	119
Dobromil Pryl, Jan Červenka, Radomir Pukl	
<i>Material model for finite element modelling of fatigue crack growth in concrete</i>	120
Artur Ganczarski, Marcin Cegielski	
<i>Continuous damage deactivation in modelling of cycle fatigue of engineering materials</i>	121
Shehzad Khan, Dieter Hellmann, Olaf Kintzel, Joern Mosler	
<i>An experimental and numerical lifetime assessment of Al 2024 sheet</i>	122
Zahid H. Khokhar, Mamdouh A. Al-Harthi	
<i>Dynamic Monte Carlo simulation of crack propagation at T-joint along pipe: an earlier arrest</i>	123
Denis Aubry, Guillaume Puel	
<i>CCF modelling with use of a two-timescale homogenization model</i>	124
Dmitrij Kryzhevich, Konstantin Zolnikov, Sergey Psakhie	
<i>Simulation of plastic deformation initiation in crystall materials under dynamic loading</i>	125
Marion Geuffrard, Luc Remy, Alain Koster	
<i>Prediction of lifetime to crack initiation at casting pores in a single crystal superalloy at high temperature</i>	126
Ahmed El Bartali, Pierre Evrard, Veronique Aubin, S. Herenú, Alvares Armas, Alberto F Armas, Suzanne Degallaix-Moreuil	
<i>Strain heterogeneities between phases in a duplex stainless steel. Comparison between measures and simulation</i>	127

Patrick Golden, Reji John, W. John Porter <i>Investigation of variability in fatigue crack nucleation and propagation in Alpha+Beta Ti-6Al-4V</i>	128
Denis Benasciutti, Eugenio Brusa, Gianluca Bazzaro <i>Finite elements prediction of thermal stress in work roll of hot rolling mills</i>	129
Mathias Brieu, Julie Diani, Christian Mignot, Christophe Moriceau <i>Stress softening of carbon black filled SBRs submitted to various large strain uniaxial tension cycles</i>	130
Ali Cetin, Gunnar Härkegard <i>Fatigue life prediction for large threaded components</i>	131
Habib Zambrano, Gunnar Härkegard <i>Self-arresting fatigue cracks at notches in nodular cast iron</i>	132
François Hamon, Gilbert Hénaff, Damien Halm, Mikael Guéguen, Thomas Billaudeau <i>CDM approach applied to fatigue crack propagation on airframe structural alloys</i>	133
Rian Seghir, Eric Charkaluk, Philippe Dufrénoy, Laurence Bodelot <i>Thermomechanical couplings in crystalline plasticity under fatigue loading</i>	134
Angelika Brueckner-Foit, Frank Zeismann, Benjamin Bode, Anna Xue <i>Fatigue cracks in a thermal-mechanically processed high-strength steel</i>	135
Philipp Köster, Helge Knobbe, Claus-Peter Fritzen, Hans-Jurgen Christ, Martin Riedler <i>Simulation of stage I short crack propagation in forged Ti6Al4V</i>	136
Pavel Hutař, Martin Ševčík, Luboš Náhlík, Michal Zouhar, Stanislav Seitl, Zdeněk Knésl, Alfonso Fernández Canteli <i>Fracture mechanics of the three-dimensional crack front: Vertex singularity versus out of plane constraint descriptions</i>	137
Vladimír Stavrovský, Jan Papuga, Milan Růžička <i>Multiaxial approach for local elastic stress analysis</i>	138
Rémi Munier, Cédric Doudard, Sylvain Calloch, Bastien Weber <i>Towards a faster determination of high cycle fatigue properties taking into account the influence of a plastic pre-strain from self-heating measurements</i>	139
Yibin Xue, Benjamin Bode, Angelika Brueckner-Foit <i>Micromechanical simulation for texture induced uncertainty in fatigue damage incubation using crystal plasticity model</i>	140
Matthieu Maziere, Bernard Fedelich <i>Simulation of fatigue crack growth by crack tip plastic blunting using cohesive zone elements</i>	141
 Session 7: Life prediction methodology, software development	
Craig McClung, Yi-Der Lee, Wuwei Liang, Michael Enright, Simeon Fitch <i>Automated fatigue crack growth analysis of components</i>	142
Jun-Hyub Park, Ji-Ho Song, Taeyoung Lee, Kwang Soo Lee <i>Implementation of expert system on estimation of fatigue properties from monotonic mechanical properties including hardness</i>	143
Robert Basan, Domagoj Rubeša, Marina Franulović, Božidar Križan <i>A novel approach to the estimation of strain-life fatigue parameters</i>	144
Roland Schneider, U. Wuttke, Christina Berger <i>Fatigue analysis of threaded connections using the local strain approach</i>	145
Gunnar Härkegard <i>A shift from empirical to mechanism-based fatigue design criteria</i>	146

Juraj Gerlici, Tomáš Lack	
<i>Contact geometry influence on the rail /wheel surface stress distribution</i>	147
Mehdi Shirani, Gunnar Härkegard, N. Morin	
<i>Fatigue life prediction of components made of spheroidal graphite cast iron.....</i>	148
Rok Potočnik, Peter Göncz, Jože Flašker, Srečko Glodež	
<i>Fatigue life of double-row slewing ball bearing with irregular geometry.....</i>	149
Russell J. McDonald, Darrell F. Socie	
<i>An improved multiaxial method to estimate the elastic-plastic behavior from a purely elastic solution.....</i>	150
Cristiana Delprete, Raffaella Sesana, Andrea Vercelli	
<i>Multiaxial damage assessment and life estimation: Application to an automotive exhaust manifold.....</i>	151
Georges Ayoub, Moussa Nait-Abdelaziz, Fahmi Zairi, Jean-Michel Gloaguen	
<i>Multiaxial fatigue life prediction of rubber-like materials using the continuum damage mechanics approach</i>	152
Mauro Filippini, Stefano Foletti, Giuseppe Pasquero	
<i>Assessment of multiaxial fatigue life prediction methodologies for Inconel 718.....</i>	153
 Session 8: Damage evaluation and fatigue design	
Mamoru Mizuno, Yuta Enomoto, Mitsuhiro Okayasu	
<i>Fatigue life of piezoelectric ceramics and evaluation of internal damage</i>	154
Bo Yang, Christian Motz, Wolfgang Grosinger, Gerhard Dehm	
<i>Cyclic loading behavior of micro-sized polycrystalline copper wires</i>	155
Kazuaki Shiozawa, Tomoki Kashiwagi, Tsutomu Murai, Tooru Takahashi	
<i>Fatigue behaviour and fractography of extruded AZ80 magnesium alloys in very high cycle regime.....</i>	156
Yuuji Shimatani, Kazuaki Shiozawa, Takehiro Nakada, Takashi Yoshimoto	
<i>Effect of surface residual stress and inclusion size on fatigue failure mode of matrix HSS in very high cycle regime.....</i>	157
Daniela Schwerdt, Brita Pyttel, Christina Berger	
<i>Fatigue strength and failure mechanism for the aluminium wrought alloy EN AW 6056 in the VHCF-region and influence of notch and compressive residual stresses</i>	158
Abdelghani May, Mohamed Amine Belouchrani, Sofiane Taharboucht, Ayoub Boudras	
<i>Influence of heat treatment on the fatigue behaviour of two aluminium alloys 2024 and 2024 plated</i>	159
Majid Shahzad, Michel Chaussumier, Catherine Mabru, R. Chieragatti, Farhad Rezai-Aria	
<i>Influence of anodizing process on fatigue life of a machined aluminium alloy</i>	160
Xiang Zhang, Billy Chan, Sunder Lama, Viral Satikumar, Shanglu Shi, Rui Bao	
<i>Influence of impact dents on the fatigue strength of aluminium alloy friction stir welds</i>	161
Andre Luis Moreira de Carvalho, Juliana de Paula Martins, Herman J. C. Voorwald	
<i>Fatigue damage accumulation in aluminum 7050-T7451 alloy subjected to block programs loading under step-down sequence</i>	162
Brita Pyttel, Daniela Schwerdt, Christina Berger	
<i>Fatigue strength and failure mechanisms in the VHCF-region for quenched and tempered steel 42CrMoS4 and consequences to fatigue design.....</i>	163
Petr Brož	
<i>Contemporary fatigue damage aspects</i>	164

Sven Spanrad, Jie Tong <i>Characterization of foreign object damage (FOD) and early fatigue crack growth in laser shock peened Ti-6AL-4V aerofoil specimens.....</i>	165
Brent Fillery, Xiao-Zhi Hu <i>User friendly assessment of stress intensity factor in thermal shocked cracked structures with finite boundary restraint</i>	166
Piet Stroeven <i>Low-cycle compression fatigue of reinforced concrete structures</i>	167
Marcelino P. Nascimento, Herman J. C. Voorwald <i>Considerations about the weld repair effects on structural integrity of an airframe critical to the flight-safety.....</i>	168
Fabio Vigano, Andrea Manes, Marco Giglio <i>Effect of cold driving process on fatigue life of helicopter fuselage joints</i>	169
Artur Mariano de Sousa Malafaia, Marcelo Tadeu Milan, Marcelo Falcão de Oliveira, Dirceu Spinelli <i>Evaluation of dynamic defect detection in FSSW welded joints under fatigue tests</i>	170
Masaki Nakajima, Masayuki Akita, Yoshihiko Uematsu, Keiro Tokaji <i>Effect of strain-induced martensitic transformation on fatigue behavior of type 304 stainless steel</i>	171
Yutaka Tsuchida, Takahiro Watanabe, Tsuyoshi Kato, Tomomi Seto <i>Effect of hydrogen absorption on strain-induced low-cycle fatigue of low carbon steel.....</i>	172

Session 9: Variable amplitude loads, multiaxial and mixed mode fatigue

Shelby Highsmith, Steven Johnson, Richard Pettit, Gregory Swanson, Tarek Sayyah <i>Crack path deflection in Inconel 718 under proportional and non-proportional mixed-mode fatigue.....</i>	173
Karolina Walat, Tadeusz Łagoda <i>Application of the covariance on the critical plane for determination of fatigue life under cyclic loading</i>	174
Abílio M. P. de Jesus, António L. L. da Silva <i>Identification of the net effective strain-life model for a puddle iron from the Portuguese Fão riveted road bridge.....</i>	175
Audrey Jardin, Jean-Baptiste Leblond, Daniel Berghezan, Maude Portigliatti <i>Definition and experimental validation of a new model for the fatigue of elastomers incorporating deviations from Miners linear law of cumulative damage.....</i>	176

Session 10: New materials (MMCs, CMCs, intermetallics, composites)

Anja Weidner, Alexander Glage, Horst Biermann <i>In-situ characterization of the microstructure evolution during cyclic deformation of a novel cast TRIP steel</i>	177
Koh-Ichi Sugimoto, Daiki Fuji, Nobuo Yoshikawa <i>Fatigue strength of newly developed high-strength low alloy TRIP-aided steels with good hardenability.....</i>	178
Alexander Glage, Anja Weidner, Horst Biermann <i>Effect of austenite stability on the low cycle fatigue behavior and microstructure of high alloyed metastable austenitic cast TRIP-steels</i>	179

Yoshikazu Nakai, Kohei Fujihara, Naoki Sei, Kunihiro Ando, Bok-Key Kim <i>Fatigue strength of sharp notched plate of Zr-based bulk metallic glass</i>	180
Werner Riehemann, Zuzana Trojanová, Agnieszka Milczarek <i>Fatigue in magnesium alloy AZ91-alumina fiber composite studied by internal friction measurements.....</i>	181
Masaki Hojo, Yusuke Yoshida, Michinaka Sugano, Taiji Adachi, Yasuhiro Inoue, Koji Shikimachi, Naoki Hirano, Shigeo Nagaya <i>Fatigue behavior of YBCO coated high-temperature superconductor with additional Cu layer at 77K.....</i>	182
Andrej Abdrashitov, Dmitrij Kryzhevich, Konstantin Zolnikov, Sergey Psakhie <i>Simulation of nanoparticles with block structure formation by electric dispersion of metal wire</i>	183
Stefano Masaggia <i>The development of ADI and IDI in Italy.....</i>	184
Session 11: Microelectronic devices and packaging	
Jane Howell, Suzanne Mohny, Christopher L. Muhlstein <i>Thermomechanical fatigue of micromachined lines on silicon substrates.....</i>	185
Eva Baumert, Pierre-Olivier Theillet, Olivier Pierron <i>Static and cyclic fatigue properties of monocrystalline silicon thin films.....</i>	186
Michael Budnitzki, Olivier Pierron <i>Influence of harsh environment and nanometer-scale coating on the very high-cycle fatigue properties of polycrystalline silicon films</i>	187
James Collins, Yi Wang, Zi-Kui Liu, Andy Minor, Christopher L. Muhlstein <i>Cyclic stabilization of micro- and ultrafine-grained nickel films.....</i>	188
Chung-Youb Kim, Ji-Ho Song, Yun Hwangbo, Heung-Soo Shim <i>Plastic deformation behavior of Cu thin films during fatigue testing</i>	189
Benoit Dompierre, Veronique Aubin, Eric Charkaluk, Wilson Carlos Maia Filho, Michel Brizoux <i>Influence of thermal ageing on cyclic mechanical properties of SnAgCu alloys for microelectronic assemblies.....</i>	190
Golta Khatibi, Martin Lederer, Brigitte Weiss, Thomas Licht, Johannes Bernardi, Herbert Danninger <i>Accelerated mechanical fatigue testing and lifetime of interconnects in microelectronics</i>	191
Session 12: Advanced coating systems	
Martin Juliš, Karel Obrtlík, Simona Pospíšilová, Tomáš Podrábský, Jaroslav Polák <i>Effect of Al-Si diffusion coating on the fatigue behaviour of cast Inconel 713LC at 800°C</i>	192
Hironari Okada, Yoshihiko Uematsu, Keiro Tokaji <i>Fatigue behaviour in AZ80A magnesium alloy with DLC/thermally splayed WC-12Co hybrid coating</i>	193
