

Table of contents

Invited

<u>L. Stadler</u> and G. Vogl New Ways to Look Into the Atomistics of Diffusion	13
H. Ipser Nonstoichiometry in Intermetallics	14
A. Kulovits, W.A. Soffa, W. Püschl and <u>W. Pfeiler</u> Long-Range Ordering in Anisotropic L1₀-Ordered FePd	15
N. Stolwijk Possible Sublattice Interference Effects During Dopant Diffusion in Compound Semiconductors	23
<u>W. Gąsior</u> and Z. Moser Application of Galvanic Cels for Determination of Chemical Diffusion Coefficients in Solid Alloys	31
P. Miodownik Basic Principles of the Calphad Method and Some Recent Developments	40
<u>M. Stan</u> and J. A. Mitchell Limitations of Diffusion Models	50
H. Mehrer Diffusion in Quasicrystalline Alloys	51
<u>D. L. Beke</u> , Z. Erdélyi, Z. Papp, K. Kapta, G. Katona, G. Langer, M. Kis-Varga, C. Cserhádi and I. A. Szabó Diffusion in Nanoscale	52
<u>Chr. Herzig</u> , M. Lohman and S. Divinski Grain Boundary Diffusion and Solute Segregation Behaviour in Cu Poly- and Bicrystals	60
T. Voss, A. Strohm and <u>W. Frank</u> Diffusion in a Si-B-C-N-Based Polymer-Derived Ceramic	71
<u>T. Okino</u> , T. Shimozaki and C.-G. Lee Behavior of Native Defects and Oxygen Atoms in Silicon Resulting from the Diffusion Phenomena	72

Contributed

A. Kushida, K. Tanaka and <u>H. Numakura</u> Diffusion in L1₀-Ordered FePt	79
E. Partyka, D. Kmiec, S. Czekaj and <u>R. Kozubski</u> Ordering Kinetics in B₂, L1₂ and L1₀ Intermetallics	83
<u>G. Erdélyi</u> , A. Sági and W. Löser Point Defect Concentrations and Diffusion in B₂ NiAl Alloys Under Pressure	87
Ü. Ugaste The Problem of Experimental Investigation of Interdiffusion in Ternary Systems: Effective Interdiffusion Coefficients	91
<u>P. Brož</u> , J. Buršík, J. Sopoušek and R. Picha Simulated Element Redistributions in Ni-Based Superalloys Weldments	95
J. Svoboda Diffusion Laws in Multi-Component Systems with Non-Ideal Sources and Sinks for Vacancies	99
V. V. Popov Interdiffusion of Substitution Elements in Iron Based Solid Solutions	103
J. Vřešťál, J. Houserová and <u>M. Šob</u> Ab initio Calculations of Stability of Phases and Construction of Phase Diagrams	107
A. Kroupa The Experimental and Theoretical Study of the Ti-V-C-N System	111
<u>J. Leitner</u> , A. Strejc, D. Sedmidubský and K. Růžicka High Temperature Enthalpy and Heat Capacity of GaN	115
G. P. Vassilev, <u>E. S. Dobrev</u> , J.-C. Tedenac and T. Czeppe Phase Diagrams of Ti-Containing Solders	119
<u>J. Janovec</u> , P. Ševc, A. Výrostková, V. Vokál and J. Krest'anková Thermodynamics of Grain Boundary Segregation	123
<u>V. Paidar</u> and J. Kroc Grain Boundary Migration Affected by Triple Junction	127
<u>H. Schmidt</u> , W. Gruber, G. Borchardt, H. Baumann, A. Müller and J. Bill Diffusion of Ion-Implanted Hydrogen in Amorphous Si-(B-)C-N Ceramics	131
<u>M. Svoboda</u> , J. Sopoušek and J. Vřešťál Structure Changes in Superaustenitic Steel During Long-Term Annealing	135

<u>A. M. Gusak</u> and K. N. Tu Theory of Flux-Driven Ripening	139
<i>Posters</i>	
<u>C. Cserhádi</u> , A. A. Kodentsov, M. J. H. van Dal and F. J. J. van Loo Intrinsic Diffusion in Ni₃Al System	143
<u>A. Gazda</u> , V. Rothová and J. Čermák Comparison of Al/Ni and Co/Ni Interdiffusion Coefficients in Pseudobinary Sections of Ni₃Al-Co Alloys	148
<u>G. Erdélyi</u> , J. Nyéki and D. L. Beke Ni Grain Boundary Self Diffusion in B-Doped Ni₃Al	152
J. Čermák and <u>V. Rothová</u> Diffusion of Ni and Ga Along High-Diffusivity Paths in Polycrystalline Ni₃Ga	156
J. Drápala, K. Barabaszová, <u>M. Losertová</u> and P. Kubíček Methods of Interdiffusion Coefficients Determination in the System Ni₃Si – Ni	160
L. Hyspecká, <u>M. Losertová</u> , J. Drápala and M. Sozańska Diffusion Processes in Ni/Ni₃Al Welded Joint After the High Temperature Annealing	164
K. Adamaszek, <u>Z. Jurasz</u> and J. Kučera Long-Time Oxidation of Carbon Steel Grade 55 and Bearing Steel LH15 at High Temperatures	168
J. Kučera, K. Adamaszek and <u>M. Hajduga</u> Oxidation of Fe and Steels at High Temperatures in Ambient Air	172
<u>P. Krukovsky</u> , K. Tadya, A. Rybnikov, I. Krukov, N. Mogaiskaya, V. Kolarik and M. Juez-Lorenzo Combined Experimental and Theoretical Approach for Long Time High Temperature Oxidation and Diffusion Processes in MCrAlY Coatings Investigation	176
J. Kučera, P. Michalička, B. Million, A. Rek and K. Stránský The Influence of High Temperatures on the Direction of Carbon Diffusion Flux in Steel Weldments	180
J. Kučera, K. Adamaszek and Z. Jurasz Long-Time Oxidation of γFe and LH15 Steel at High Temperatures in Air	184
A. Ullrich, <u>M. Bobeth</u> and W. Pompe Monte Carlo Study of Vacancy Kinetics at Coherent Interfaces in a Phase Separating Model System	188

<u>G. L. Katona</u> , C. Cserhádi and D. L. Beke Effect of Thickness on Order-Disorder Transition Temperature in Thin Films	192
<u>K. Gargul</u> , P. Jarosz and W. Gierlotka The Application of Cubic Spline Functions in Thermodynamical Description of Binary Liquid Solutions	196
Yu. Lyashenko Prediction of the Two-Phase Zone Formation in the Ternary Systems - Thermodynamic Approach and Modeling	200
V. V. Popov Simulation of Diffusion Controlled Precipitate Evolution in Steels at Heat Treatment	204
<u>L. Řeháčková</u> , B. Million, J. Dobrovská and K. Stránský Contribution to Modelling the Diffusion Phenomena in the Welded Joints of Steels	208
Ü. Ugaste Generation of Concentration Profiles Using Effective Interdiffusion Coefficients	212
T. Zaporoghets MD-Simulation of Diffusion and Structural Transformations Under Pulse Loading	216
<u>D. Zivkovic</u> and Z. Zivkovic Predicting of Thermodynamic Properties for Ternary Na-Hg-Pb Alloys Exhibiting Strong Negative Deviation From Ideal Behaviour	221
<u>P. Jarosz</u> , K. Gargul and W. Gierlotka Density and Viscosity of the Binary Hg-Tl Solutions	225
<u>S. V. Kornienko</u> , L. N. Paritskaya and V. V. Bogdanov Two-Phase Zone Formation During Interdiffusion in Ternary Cu-Ni-5% at Sn System	229
<u>A. Kostov</u> , Z. Zivkovic and D. Zivkovic Differential Thermal Analysis of the Reversible Martensitic Transformation in Cu-Al-Zn Shape Memory Alloys	233
<u>I. Mucha</u> , W. Gaweł and Z. Sztuba Thermal Analysis of the System Thallium(I) Selenide – Thallium(I) Telluride	237
<u>S. Prokofjev</u> , V. Zhilin, E. Johnson, M. Levinsen, J. S. Andersen, U. Dahmen, T. Radetic and J. Turner A TEM Study of the Mobility of Liquid Pb Particles Pinned at Dislocations in Solid Al	241
<u>D. Sedmidubský</u> , A. Strejc and J. Leitner Thermochemical Properties, Oxygen Stoichiometry and Phase Stability of SrMnO_{3.8}	245

<u>T. Shimozaki</u> , K. Sakamoto, T. Okino and C.-G. Lee Diffusion Controlled Oxide Film Growth on GaAlAs Surface Due to Light Irradiation	249
<u>I. A. Szabó</u> , V. Palyok, S. Kökényesi and D. L. Beke Light-Induced Diffusion in Chalcogenide Multilayers	252
W. Zakulski Experimental Studies in the Al-Sr System	256
<u>E. Zaleska</u> , Z. Sztuba and W. Gawel Comparison of Phase Relations in the Quasi-Binary Thallium(I) Telluride Systems	260
