

CONTENT

Using of the LDA method for effective apparatus length stating at swirling annular flow K. Bošek.....	3
Using of the LDA method for effective apparatus length stating at swirling annular flow M. Domanová, F. Dzianik, K. Jelemenský.....	9
Using liquid environment in process of forming A. Englárt, J. Moravec.....	19
The comparison of the computation and measurement by PIV method of radial impeller M. Haluza, P. Zubík.....	25
Measurement in model of internal combustion cylinder at steady flow condition using PIV P. Hatschbach.....	33
History and velocity field measurements in WALTER a.s. company P. Hečl, M. Kořánek.....	37
LDA measurements of two-velocity components in a pipe Z. Chára.....	41
Characteristics of spray generated by effervescent atomizer J. Jedelský, M. Jícha, J. Sláma.....	47
Turbulent power spectra and dissipation length scale M. Jirsák, R. Ulman.....	56
New method of simultaneous measurements of velocity and size of droplets L. Klaboch.....	62
Verification of suitability of PIV method for analysis of a liquid stream coming from a jet M. Kotouč, J. Matěcha.....	68
Effect of PDA setting on measurements of local velocities of suspension in a vertical pipe B. Kysela, Z. Chára, P. Ditl.....	74
Flame flow field parameters measured by PIV method A. Marhula, A. Hemmer, J. Novotný.....	82

Verification of the possibility of using PIV method for research in the field of hemodynamics	
J. Matěcha, J. Novotný, J. Adamec.....	88
Simultaneous measurement of velocity and molar concentration in a gas-mixture turbulent flow using a dual heated-sensors probe	
Part I. Principle of measuring method	
O. Mazur, V. Uruba, P. Jonáš.....	92
Part II. Probe calibration in the Helium/air mixture	
P. Jonáš, O. Mazur, V. Uruba.....	100
Part III. Method of measurement and evaluation of results	
V. Uruba, P. Jonáš, O. Mazur.....	108
Measurement of velocity field near inlet opening by UVP monitor	
J. Pařílková, Z. Zachoval.....	116
Two electronic methods of dike status monitoring	
J. Pařílková, Z. Zachoval, I. Krejčí.....	121
Distribution of vertical velocities for different bed roughness measured by UVP Monitor	
J. Pařílková, Z. Zachoval.....	127
The measurement of flow parameters in square cross section bend	
J. Šulc, P. Zubík.....	131
Behaviour of vortex structures in an impinging air jet	
J. Vejražka, J. Tihon, V. Sobolík.....	139
The possibilities of Laser Doppler Anemometry (LDA) in finding out the number of blood elements in a discharged peritoneal solution	
P. Zubík, K. Ševela, J. Svojanovský, A. Zharfbín.....	146
The uncertainty of the measurement	
M. Žoužela.....	150
