# Contents

Preface 5

1. *Menzerath-Altmann's Text Model: Recapitulation* 7
   - 1.1 Text Structure 7
   - 1.2 Text as an Observed Entity 9
   - 1.3 The Fundamental Law 10
   - 1.4 Zipf-Alekseev Distribution 14
   - 1.5 Words in a Context 15
   - 1.6 Human Mind and Text 19
   - 1.7 Word Frequencies and Their Interpretation 20
   - 1.8 Measurement in Texts 23
   - 1.9 Dimension 26

2. *Word Location* 29
   - 2.1 Time and Text 29
   - 2.2 Larger Contexts ("Aggregates") 30
   - 2.3 Distances Between Subsequent Occurrences of a Lexeme 32
   - 2.4 Sequential Compactness 34
   - 2.5 Symmetry 36
   - 2.6 Random Numbers and Noise 38

3. *Hurst's Indicator* 42
   - 3.1 Hurst's Exponent 44
   - 3.2 Increasing Text 46
   - 3.3 The Length of the Series 51
   - 3.4 R/S and Lag *s* 53
   - 3.5 $R_s/S_s$ as a Point Diagram 58
   - 3.6 Random Numbers 61
   - 3.8 Syllables 63

4. *Minkowski Saussages and Text Sequences* 66
   - 4.1 Relative Distance Once More 66
   - 4.2 Continuities and Breaks Inside of the Series 68
   - 4.3 Order of Growth 73
   - 4.4 Dimension Δ(E) 75

5. *Probability and Word Location* 77
   - 5.1 Competence 77
   - 5.2 Frequency and Location 78
   - 5.3 Chains of Consequences 82
   - 5.4 Randomness and Intentionality 83

6. *Cyclic Forms in Positional Series* 86
   - 6.1 Noise and Semantics 86

6.2 Moving Average 88
6.3 Differences and Distances 92

7. *Strategy in Sequences* 108
7.1 Seeking a Strategy 108
7.2 Sequential Mean 108
7.3 Mean Values and Sequences 110

8. *Lyapunov Exponent* 116
8.1 Definition 116
8.2 Application to Text Sequences 118
8.3 Computation 119
8.4 $\lambda_i$ as a Characteristic of Sequences 122
8.5 A Comparison of the Sequences 123
