

TABLE OF CONTENTS

Table of contents	iii
Preface	vi
Programme of the meeting	viii
List of participants	xii
 Section I) REFERENCE FRAMES	 1
 L. V. Morrison (<i>invited</i>): Highlights of IAU23 Joint Discussion 7 on the new International Celestial Reference Frame	 3
A.-M. Gontier, E. F. Arias, C. Mercuri-Moreau (<i>invited</i>): Maintenance of the ICRS realization	9
A. Kovalchuk, G. Pinigin, Yu. Protsyuk, A. Shulga: Position determination of 12–14 magnitudes stars in the selected fields around extragalactic radio-sources with the automatic AMC	14
E. I. Yagudina: The FK5 zero-point determination from optical and radar data of near Earth asteroids	18
J.-F. Bange, A. Bec-Borsenberger, M.-L. Bougeard: The extragalactic–planetary frame tie derived from the HIPPARCOS minor planet data	22
Yu. V. Batrakov, Yu. A. Chernetenko, G. K. Gorel, L. A. Gudkova: On determination of zero-points of FK5 using observations of minor planets in Nikolaev	23
L. V. Morrison, S. T. Garrington, R. W. Argyle, R. J. Davis: Future control of the Hipparcos frame using MERLIN	24
 SECTION II) RELATIVISTIC EFFECTS IN ASTROMETRY, REFERENCE SYSTEMS AND SOLAR SYSTEM DYNAMICS	 25
 M. Soffel, S. Klioner (<i>invited</i>): The present status of Einsteinian relativistic celestial mechanics	 27
S. Klioner (<i>invited</i>): Astronomical reference frames in the PPN formalism	32
M. S. De Biasi, E. F. Arias: Some considerations about the arclength method of reduction of astrometric data	38
X. Moisson: Nouvelle solution pour le mouvement des planètes.....	42
D. Vokrouhlický, G. Métris: Testing relativity theory using Lageos satellites	46
V. Mioc, M. Stavinschi: The Schwarzschild problem: A model for certain motions in the solar system	51
 Section III) PRECESSION, NUTATION AND ASTRONOMICAL CONSTANTS	 53
 V. Dehant (<i>invited</i>): Summary of the Joint Discussion on precession, nutation and astronomical constants for the dawn of the 21 st century	 55
P. Bretagnon: Proposals for a new solution of the precession-nutation.....	61
J. Getino: Nutations of a non-rigid Earth.....	65
P. Defraigne, V. Dehant: New theoretical model for nutations and comparison with VLBI observations.....	69
Ch. Bizouard, A. Brzeziński, S. Petrov: Variability of nutations: Can it be driven by the atmosphere?.....	73

D. D. McCarthy (<i>invited</i>): New precession/nutation and astronomical constants	77
N. Capitaine: Formulation of precession and nutation for precise astrometric data.....	83
V. E. Zharov: Nutation of the Earth and atmospheric tides	87
V. V. Bobylev: Corrections to the new precession constant obtained from comparison of Pulkovo absolute proper motions with PPM.....	91
V. V. Paschkevich: Numerical model of the rotational motion of the Earth.....	95
T. V. Ivanova: A trigonometric solution of the secular lunar system intended for long-term theory of the Earth's rotation.....	99
F. Chollet: Corrections to the main terms of nutation.....	103
E. Eisop, D. Gambis: The combined solutions of IERS/CB	104
J. Hefty, R. Weber, T. Springer: Possibilities of observation of atmospheric tides by GPS.....	105
J. Nastula, O. Kotreleva: Effects of variations of regional atmospheric angular momentum on polar motion.....	106
S. D. Petrov, A. Brzezinski, Ch. Bizouard: Time domain comparison of the VLBI nutation series and observed changes of the atmospheric angular momentum	107
O. Titov: Modern accuracy of the EOP from VLBI data analysis.....	108
S. Rudenko: Terrestrial reference frame realization from the analysis of the 13-year LAGEOS-1 & LAGEOS-2 SLR world network data.....	109
Z. Šíma: The geopotential scale factor R_0 and its predominance over a_0	110

Section IV) SCIENTIFIC APPLICATIONS OF THE HIPPARCOS CATALOGUE 111

Ya. S. Yatskiv (<i>invited</i>): On the use of long series of ground-based astrometric data	113
J. Vondrák, C. Ron, I. Pešek, A. Čepek: Solution of Earth orientation parameters in the Hipparcos reference frame.....	118
G. Gontcharov, A. Andronova: Comparison of ground-based astrometry with those of HIPPARCOS.....	122
A. S. Kharin: Conception of creation of the IR reference system after HIPPARCOS	126
B. Viateau, M. Rapaport: Contribution of HIPPARCOS data to the improvement of orbits and masses of asteroids	130
G. Gontcharov, E. Kornilov: Non-linear motions of stars: A challenge for astrometry	134
M. L. Bougeard: New parallel algorithms for constrained L_1 and robust fits: Fitting large astrometric data sets, especially Hipparcos minor planet data	138
S. Zwanzig: Application of HIPPARCOS data: A new statistical method for star reduction.....	142
M. J. Martinez, F. J. Marco, J. A. Lopez: Homogenization of astrometrical catalogs in a band.....	145
V. V. Vityazev: The Gabor and wavelet analysis of the EOP in the system of HIPPARCOS	149
V. V. Vityazev, E. I. Yagudina: The motion of dynamical equinox: Present day status and proposals for the post-HIPPARCOS era.....	153
J. Palouš (<i>invited</i>): Gould's belt: Models with HIPPARCOS data	157
M. Geffert: Kinematics of globular clusters using HIPPARCOS reference stars	163
S. Söderhjelm: Double-star studies using HIPPARCOS data	167
A. Tsvetkov: The local stellar system: Kinematics derived from proper motions of the HIPPARCOS catalogue	171
G. Damjanović: Long period oscillations of BLZ latitude series.....	175
A. Korsuń, G. Kurbasova, J. Vondrák: New analysis of Earth orientation parameters in HIPPARCOS Catalogue (1900–1992).....	176

L. D. Kostina, N. O. Miller, N. R. Persijaninova, E. Ja. Prudnikova, V. V. Vityazev, L. A. Zykov: Some results of the latitude observations with the ZTF-135 at Pulkovo for 1904–1994 obtained in the HIPPARCOS Catalogue system	177
I. Pešek, C. Ron: Comparison of proper motions of the HIPPARCOS Catalogue with the optical astrometry in 1900–1992	178
R. L. Smart, R. Drimmel, M. G. Lattanzi, J. Binney: Investigating selection effects in observations of the galactic warp.....	179
Section V) WORKSHOP ON PRESENT AND FUTURE ASTROMETRY.....	181
U. Bastian (<i>invited</i>): The small astrometric interferometer satellite DIVA: Beyond HIPPARCOS and towards GAIA.....	183
M. Stavinschi (<i>invited</i>): Is there a future for the classical astrometry?.....	189
S. Débarbat: Ground-based astrometric observations in the space era: The case of the Danjon astrolabe	194
G. Daigne: Reference stars and very narrow-angle ground-based interferometry: Needed astrometric accuracy	197
A. Prades, J. Núñez, O. Fors, A. Olle: The use of image reconstruction for astrometry	199
A. Gozhy, M. Tyshchuk: On the principles of the astrooptical observations continuation for the changes of coordinate stations nowadays and in the future.....	202
A. Lopez Garcia, L. I. Yagudin: Proper motions for 2 million GSC stars in northern hemisphere.....	205
L. V. Morrison: Planetary ephemerides: The continuing need for optical astrometry.....	207
P. Popescu, R. Popescu, P. Paraschiv: The single image modernised astrolabe of Bucharest observatory	210
K. Kurzyńska, A. Gabryszewska: Possibilities of one-image Poznan astrolabe in making astrometric observations.....	213
F. Chollet: Astrometrie au sol. Cas des astrolabes	216
V. Protić-Benišek, I. Pakvor, G. Damljanović: Progress report on the Belgrade astrometrical instruments and the possibilities of re-integration in modern ground-based observations	219
Y. Réquière, J. F. Le Campion, B. Viateau, J. M. Mazurier, M. Rapaport, G. Daigne, P. Benevides-Soares, R. Texeira: Contribution of the CCD meridian circles to modern astrometry	222
G. Pinigin: CCD meridian telescopes in modern astrometry	226
G. Gontcharov: Proposals for observations of faint celestial objects with ground-based meridian telescopes	229
V. I. Kiyaev: Optical positions of radio stars	231
I. Guseva: CCD astrometry of the GSC stars near the north pole	234
V. S. Kislyuk, A. I. Yatsenko, Ya. S. Yatskiv: Project "FON" in post-Hipparcos era	235
Z. Moravec, J. Tichá, M. Tichý: Astrometry of asteroids with USNO-SA 1.0 Catalog	236
D. Polojentsev: Pulkovo fundamental astrometry in post-Hipparcos period	237
A few conclusions of the general discussion.....	238
Postface.....	240
