

# Contents

1.1.	Maxwell's Equations and Electromagnetic Wave Propagation	5
1.2.	The Dielectric Function of the Free Electron Gas	11
1.3.	The Dispersion of the Free Electron Gas and Volume Plasmons	15
1.4.	Real Metals and Interband Transitions	17
1.5.	The Energy of the Electromagnetic Field in Metals	18
2.1.	The Wave Equation	21
2.2.	Surface Plasmon Polaritons at a Single Interface	25
2.3.	Multilayer Systems	30
2.4.	Energy Confinement and the Effective Mode Length	34
3.1.	Excitation upon Charged Particle Impact	39
Dedication		v
List of Figures		xi
Foreword		xix
Preface		xxiii
Acknowledgments		xxv
Part I Fundamentals of Plasmonics		
Introduction		3
1. ELECTROMAGNETICS OF METALS		5
2. SURFACE PLASMON POLARITONS AT METAL / INSULATOR INTERFACES		21
3. EXCITATION OF SURFACE PLASMON POLARITONS AT PLANAR INTERFACES		39

3.2. Prism Coupling	42
3.3. Grating Coupling	44
3.4. Excitation Using Highly Focused Optical Beams	47
3.5. Near-Field Excitation	48
3.6. Coupling Schemes Suitable for Integration with Conventional Photonic Elements	50
<b>4. IMAGING SURFACE PLASMON POLARITON PROPAGATION</b>	<b>53</b>
4.1. Near-Field Microscopy	53
4.2. Fluorescence Imaging	57
4.3. Leakage Radiation	59
4.4. Scattered Light Imaging	62
<b>5. LOCALIZED SURFACE PLASMONS</b>	<b>65</b>
5.1. Normal Modes of Sub-Wavelength Metal Particles	66
5.2. Mie Theory	72
5.3. Beyond the Quasi-Static Approximation and Plasmon Lifetime	73
5.4. Real Particles: Observations of Particle Plasmons	77
5.5. Coupling Between Localized Plasmons	80
5.6. Void Plasmons and Metallic Nanoshells	85
5.7. Localized Plasmons and Gain Media	87
<b>6. ELECTROMAGNETIC SURFACE MODES AT LOW FREQUENCIES</b>	<b>89</b>
6.1. Surface Plasmon Polaritons at THz Frequencies	90
6.2. Designer Surface Plasmon Polaritons on Corrugated Surfaces	93
6.3. Surface Phonon Polaritons	101
<b>Part II Applications</b>	
<b>Introduction</b>	<b>107</b>
<b>7. PLASMON WAVEGUIDES</b>	<b>109</b>
7.1. Planar Elements for Surface Plasmon Polariton Propagation	110
7.2. Surface Plasmon Polariton Band Gap Structures	114
7.3. Surface Plasmon Polariton Propagation Along Metal Stripes	116
7.4. Metal Nanowires and Conical Tapers for High-Confinement Guiding and Focusing	124
7.5. Localized Modes in Gaps and Grooves	129

7.6. Metal Nanoparticle Waveguides	131
7.7. Overcoming Losses Using Gain Media	138
<b>8. TRANSMISSION OF RADIATION THROUGH APERTURES AND FILMS</b>	<b>141</b>
8.1. Theory of Diffraction by Sub-Wavelength Apertures	141
8.2. Extraordinary Transmission Through Sub-Wavelength Apertures	144
8.3. Directional Emission Via Exit Surface Patterning	150
8.4. Localized Surface Plasmons and Light Transmission Through Single Apertures	153
8.5. Emerging Applications of Extraordinary Transmission	157
8.6. Transmission of Light Through a Film Without Apertures	157
<b>9. ENHANCEMENT OF EMISSIVE PROCESSES AND NONLINEARITIES</b>	<b>159</b>
9.1. SERS Fundamentals	159
9.2. SERS in the Picture of Cavity Field Enhancement	163
9.3. SERS Geometries	165
9.4. Enhancement of Fluorescence	170
9.5. Luminescence of Metal Nanostructures	173
9.6. Enhancement of Nonlinear Processes	175
<b>10. SPECTROSCOPY AND SENSING</b>	<b>177</b>
10.1. Single-Particle Spectroscopy	178
10.2. Surface-Plasmon-Polariton-Based Sensors	188
<b>11. METAMATERIALS AND IMAGING WITH SURFACE PLASMON POLARITONS</b>	<b>193</b>
11.1. Metamaterials and Negative Index at Optical Frequencies	194
11.2. The Perfect Lens, Imaging and Lithography	198
<b>12. CONCLUDING REMARKS</b>	<b>201</b>
