

# Contents

<b>Preface</b>	<b>iii</b>
<b>1 Descriptive statistics</b>	<b>1</b>
1.1 General aspects of statistical techniques . . . . .	1
1.2 Basic concepts . . . . .	2
1.3 Frequency distributions and charts . . . . .	4
1.4 Statistical measures . . . . .	12
<b>2 Correlation</b>	<b>30</b>
2.1 Functional and correlative relationship . . . . .	30
2.2 Types of correlation . . . . .	31
2.3 Linear correlation, coefficients of correlation and determination	33
2.4 Spearman's rank correlation coefficient . . . . .	41
<b>3 Regression</b>	<b>43</b>
3.1 The task of a regression . . . . .	43
3.2 Linear regression . . . . .	44
3.3 Quadratic regression . . . . .	45
3.4 Exponential regression . . . . .	47
3.5 Error estimation of regression . . . . .	49
3.6 The use of software . . . . .	49

<b>4</b>	<b>Time series</b>	<b>50</b>
4.1	Basic concepts . . . . .	50
4.2	Patterns in time series . . . . .	51
4.3	Time series trend . . . . .	54
4.4	Time series model . . . . .	56
<b>5</b>	<b>Index numbers</b>	<b>60</b>
5.1	Basic concepts . . . . .	60
5.2	Individual indices . . . . .	61
5.3	Aggregate indices . . . . .	63
<b>6</b>	<b>Consumer's mathematics</b>	<b>64</b>
6.1	Percents . . . . .	64
6.2	Simple and compound interest . . . . .	66
6.3	Depreciation . . . . .	72
6.4	Present value . . . . .	75
6.5	Installment buying and mortgages . . . . .	77
6.6	Annuities . . . . .	79
<b>7</b>	<b>Mathematics to model economic relationships</b>	<b>83</b>
7.1	Overview of mathematical tools . . . . .	83
7.2	Applications . . . . .	96
	<b>References</b>	<b>116</b>
	<b>Index</b>	<b>118</b>
