Appendices	235
<i>Latin abbreviations and phrases</i>	235
<i>Word class: a brief explanation</i>	238
<i>Word table</i>	241
Index	251

You don't know enough words.

You can't learn new words using a dictionary because you don't know the words to look them up.

- This book gives you around 2,000 key academic words, with definitions and important word information given for over 1,000 of these. The words presented are appropriate for formal and clear writing at university level.
- The words are presented within 35 common assignment writing functions or contexts, and are listed under these sections in the word table at the back of the book. This means that you can start by looking up what you want to do and then find the words you need to do it.
