Preface	x
To get started – three videos on digital supply chains	xii
In a nutshell – ten theses on digital supply chains	xiii
PART 1	
Why supply chain complexity matters	1
1 The complexity issue	3
2 Need for a framework	6
Literature	8
PART 2	
Where we come from	11
1 Existing approaches	13
2 Resilient understanding	17
2.1 Roots	17
2.2 Integration as core	18
2.3 Complex eco-systems	20
2.4 Key enablers: technology and change	22
3 Frame of reference: digital twin of supply chains	26
Literature	31

PART 3**What a digital supply chain is**

1 Cultural aspects	37
1.1 Supply chain philosophy	37
1.2 Mindset, openness, orientation and attitude	40
2 Supply chain information	46
2.1 Complexity, information and coordination	46
2.2 Pattern recognition	49
2.3 Big data, predictive analytics and sensors	51
2.4 Master data and contextualization	54
3 Supply chain planning	57
3.1 Target setting	57
3.2 Basic supply chain strategies	63
3.2.1 Competitive advantage	64
3.2.2 Sales & operations planning	70
3.2.3 Learning	74
3.3 Functional strategies	82
3.3.1 Configuration	82
3.3.2 Transport	89
3.3.3 Packaging	97
3.3.4 Warehousing	101
3.3.5 Information logistics	108
3.3.6 Logistics for the circular economy	122
Literature	127
4 Relevance of the digital twin of a product	128
4.1 Marketing logistics	128
4.2 Service competition and pioneer marketing	131
5 Coordination along the chain	135
5.1 Supply chain coupling	135
5.2 Mastering the digital twin	136
Literature	139

PART 4**How to develop digital supply chains** 147**1 Typical paths of supply chain evolution** 149

- 1.1 Trend-sonar digital supply chains 149
- 1.2 Market development and supply chain evolution 151
- 1.3 Technology development and supply chain evolution 156
- 1.4 New business models and digital supply chains 157
- 1.5 LogTechs – start-ups in the logistics service provider market 158
 - 1.5.1 Asset-light business models 158
 - 1.5.2 Typical LogTech clusters 160

2 Key principles of supply chain evolution 162

- 2.1 Perspectives of organizational theory 162
 - 2.1.1 Industry perspective 162
 - 2.1.2 Corporate perspective 165
 - 2.1.3 Self-organization and autopoiesis 169
 - 2.1.4 Cybernetics 172
- 2.2 Integration of perspectives and key design principles 174
 - 2.2.1 Umbrella for key design principles 174
 - 2.2.2 Design principles of self-organization 175
 - 2.2.3 Supply chain fitness 177
 - 2.2.4 Strategies of supply chain evolution 179

3 Next steps for the digital supply chain 181

- 3.1 Overall approach to digitalization of the supply chain 181
- 3.2 Baselinining and assessing maturity 182
- 3.3 Defining the target operating model 182
- 3.4 Planning the implementation roadmap 185
 - Literature 189

PART 5**Over and beyond digital supply chains** 195**The ten biggest errors as to digital supply chains** 197**Index** 199
