

Table of Contents

Preface	I
Program Committee.....	II
LTL to Büchi Automata: Improved Once Again	1
<i>Tomáš Babiak</i>	
On Verification of Disjunctive Modal Transition Systems	2
<i>Nikola Beneš, Jan Křetínský</i>	
Digital Biological Cell Approach - A Unified Modeling Platform for Biological Processes	4
<i>Tomáš Bílý, Vojtěch Bednář</i>	
Equivalence checking on counter machines.....	6
<i>Stanislav Böhm</i>	
Some recent progress in on-line chain partitioning	8
<i>Bartłomiej Bosek, Tomasz Krawczyk</i>	
Prefix vs. unordered bucketing	10
<i>Jan Bulánek</i>	
Provability in Hilbert-style calculi for non-classical logics and ATP	11
<i>Karel Chvalovský</i>	
Graph sharing games: complexity and connectivity	12
<i>Josef Cibulka, Jan Kynčl, Viola Mészáros, Rudolf Stolař, Pavel Valtr</i>	
Faithful Representations of Graphs by Islands in the Extended Grid	14
<i>Michael D. Coury, Pavol Hell, Jan Kratochvíl, Tomáš Vyskočil</i>	
Constructive fragment of the modal μ -calculus.....	15
<i>Marek Czarnecki</i>	
Fault-tolerant Message Sequence Graphs	16
<i>Clemens Dubslaff</i>	
Improvements in Safety Verification of Hybrid Systems	18
<i>Tomáš Dzetkulič</i>	
Frequency Analysis Using Abstract Interpretation.....	19
<i>Javier Esparza, Andreas Gaiser</i>	

Automated optimization and assembly of medium-grained mapped functions on GPUs	21
<i>Jan Fousek, Jiří Filipovič, Matúš Madžin</i>	
Algorithmic applications of linear rank-width	23
<i>Robert Ganian</i>	
Compressed word problems in finitely generated groups	24
<i>Niko Haubold</i>	
Some examples of universal and generic partial orders	26
<i>Jan Hubička</i>	
Switching to H -Free Graphs [*]	28
<i>Eva Jelínková, Jan Kratochvíl</i>	
The Decidability of RPTL	30
<i>Fahad Khan</i>	
Fuzzy attribute implications in a generalized framework	32
<i>Jan Konečný</i>	
Bisimilarity of BPA and BPP and some related problems	33
<i>Martin Kot</i>	
Less Naive Type Theory	35
<i>Agnieszka Kozubek</i>	
Schemik: Implicitly Parallel Programming Language for Multi-core Computers	37
<i>Petr Krajča</i>	
Game extension of Continuous-Time Markov Chains with Time-Bounded Reachability	39
<i>Jan Krčál, Jan Křetínský</i>	
Timed Automata Objectives in Stochastic Real-Time Games	41
<i>Jan Krčál, Jan Křetínský</i>	
From Model-based Design to Model-based Optimization of Embedded Systems	43
<i>Stefan Kugele</i>	
Complexity of locally injective homomorphism to the Theta graphs	45
<i>Bernard Lidický, Marek Tesař</i>	
Infinitary λ -Calculus as a Metric Completion of the Finitary One	46
<i>Libor Nentvich</i>	

Triadic concept analysis in fuzzy setting	47
<i>Petr Osička</i>	
Modal Logic over Higher Dimensional Automata (extended abstract)	49
<i>Cristian Prisacariu</i>	
Parameterized Reoptimization	51
<i>Felix Reidl</i>	
Antimagic labelling of graphs with special dominating subgraphs	53
<i>Radek Slůva</i>	
Non-representability of finite projective planes by convex sets	54
<i>Martin Tancer</i>	
Safe Commits for Transactional Featherweight Java	55
<i>Thi Mai Thuong Tran</i>	
Counter-based Abstraction for Symbolic Execution	57
<i>Marek Trtík</i>	
A Dual Adjunction Approach to Completeness of Coalgebraic Modal Logics	58
<i>Toby Wilkinson</i>	
Formal Semantics of Framed Temporal Logic Programming Language MSVL	60
<i>Xiaoxiao Yang</i>	
Additive colourings of graphs	62
<i>Wiktor Żelazny</i>	
Author Index	65
