## CHAPTER 1

### The Nature of Econometrics and Economic Data 1

---

1.1 What Is Econometrics?	1
1.2 Steps in Empirical Economic Analysis	2
1.3 The Structure of Economic Data	5
<i>Cross-Sectional Data</i>	5
<i>Time Series Data</i>	8
<i>Pooled Cross Sections</i>	9
<i>Panel or Longitudinal Data</i>	10
<i>A Comment on Data Structures</i>	12
1.4 Causality and the Notion of <i>Ceteris Paribus</i> in Econometric Analysis	12
Summary	17
Key Terms	17
Problems	17
Computer Exercises	18

---

## PART 1

### Regression Analysis with Cross-Sectional Data 21

---

## CHAPTER 2

### The Simple Regression Model 22

---

2.1 Definition of the Simple Regression Model	22
2.2 Deriving the Ordinary Least Squares Estimates	27
<i>A Note on Terminology</i>	35
2.3 Properties of OLS on Any Sample of Data	36
<i>Fitted Values and Residuals</i>	36
<i>Algebraic Properties of OLS Statistics</i>	37
<i>Goodness-of-Fit</i>	40
2.4 Units of Measurement and Functional Form	41
<i>The Effects of Changing Units of Measurement on OLS Statistics</i>	41
<i>Incorporating Nonlinearities in Simple Regression</i>	43
<i>The Meaning of "Linear" Regression</i>	46

2.5 Expected Values and Variances of the OLS Estimators	46
<i>Unbiasedness of OLS</i>	47
<i>Variances of the OLS Estimators</i>	52
<i>Estimating the Error Variance</i>	56
2.6 Regression through the Origin	58
Summary	59
Key Terms	60
Problems	61
Computer Exercises	64
Appendix 2A	66

---

## CHAPTER 3

### Multiple Regression Analysis: Estimation 68

---

3.1 Motivation for Multiple Regression	68
<i>The Model with Two Independent Variables</i>	68
<i>The Model with <math>k</math> Independent Variables</i>	71
3.2 Mechanics and Interpretation of Ordinary Least Squares	73
<i>Obtaining the OLS Estimates</i>	73
<i>Interpreting the OLS Regression Equation</i>	74
<i>On the Meaning of "Holding Other Factors Fixed" in Multiple Regression</i>	77
<i>Changing More Than One Independent Variable Simultaneously</i>	77
<i>OLS Fitted Values and Residuals</i>	77
<i>A "Partialling Out" Interpretation of Multiple Regression</i>	78
<i>Comparison of Simple and Multiple Regression Estimates</i>	79
<i>Goodness-of-Fit</i>	80
<i>Regression through the Origin</i>	83
3.3 The Expected Value of the OLS Estimators	84
<i>Including Irrelevant Variables in a Regression Model</i>	89
<i>Omitted Variable Bias: The Simple Case</i>	89
<i>Omitted Variable Bias: More General Cases</i>	93
3.4 The Variance of the OLS Estimators	94
<i>The Components of the OLS Variances: Multicollinearity</i>	95

<i>Variances in Misspecified Models</i>	99
<i>Estimating <math>\sigma^2</math>: Standard Errors of the OLS Estimators</i>	101
3.5 Efficiency of OLS: The Gauss-Markov Theorem	102
Summary	104
Key Terms	105
Problems	105
Computer Exercises	110
Appendix 3A	113

---

## CHAPTER 4

### Multiple Regression Analysis: Inference 117

---

4.1 Sampling Distributions of the OLS Estimators	117
4.2 Testing Hypotheses about a Single Population Parameter: The $t$ Test	120
<i>Testing against One-Sided Alternatives</i>	123
<i>Two-Sided Alternatives</i>	128
<i>Testing Other Hypotheses about <math>\beta_j</math></i>	130
<i>Computing <math>p</math>-Values for <math>t</math> Tests</i>	133
<i>A Reminder on the Language of Classical Hypothesis Testing</i>	135
<i>Economic, or Practical, versus Statistical Significance</i>	135
4.3 Confidence Intervals	138
4.4 Testing Hypotheses about a Single Linear Combination of the Parameters	140
4.5 Testing Multiple Linear Restrictions: The $F$ Test	143
<i>Testing Exclusion Restrictions</i>	143
<i>Relationship between <math>F</math> and <math>t</math> Statistics</i>	149
<i>The <math>R</math>-Squared Form of the <math>F</math> Statistic</i>	150
<i>Computing <math>p</math>-Values for <math>F</math> Tests</i>	151
<i>The <math>F</math> Statistic for Overall Significance of a Regression</i>	152
<i>Testing General Linear Restrictions</i>	153
4.6 Reporting Regression Results	154
Summary	156
Key Terms	158
Problems	159
Computer Exercises	163

---

## CHAPTER 5

### Multiple Regression Analysis: OLS Asymptotics 167

---

5.1 Consistency	167
<i>Deriving the Inconsistency in OLS</i>	170

5.2 Asymptotic Normality and Large Sample Inference	172
<i>Other Large Sample Tests: The Lagrange Multiplier Statistic</i>	176
5.3 Asymptotic Efficiency of OLS	179
Summary	180
Key Terms	181
Problems	181
Computer Exercises	181
Appendix 5A	182

---

## CHAPTER 6

### Multiple Regression Analysis: Further Issues 184

---

6.1 Effects of Data Scaling on OLS Statistics	184
<i>Beta Coefficients</i>	187
6.2 More on Functional Form	189
<i>More on Using Logarithmic Functional Forms</i>	189
<i>Models with Quadratics</i>	192
<i>Models with Interaction Terms</i>	197
6.3 More on Goodness-of-Fit and Selection of Regressors	199
<i>Adjusted <math>R</math>-Squared</i>	200
<i>Using Adjusted <math>R</math>-Squared to Choose between Nonnested Models</i>	201
<i>Controlling for Too Many Factors in Regression Analysis</i>	203
<i>Adding Regressors to Reduce the Error Variance</i>	205
6.4 Prediction and Residual Analysis	206
<i>Confidence Intervals for Predictions</i>	206
<i>Residual Analysis</i>	209
<i>Predicting <math>y</math> When <math>\log(y)</math> Is the Dependent Variable</i>	210
Summary	215
Key Terms	215
Problems	216
Computer Exercises	218
Appendix 6A	223

---

## CHAPTER 7

### Multiple Regression Analysis with Qualitative Information: Binary (or Dummy) Variables 225

---

7.1 Describing Qualitative Information	225
----------------------------------------	-----

7.2	A Single Dummy Independent Variable	226
	<i>Interpreting Coefficients on Dummy Explanatory Variables When the Dependent Variable Is <math>\log(y)</math></i>	231
7.3	Using Dummy Variables for Multiple Categories	233
	<i>Incorporating Ordinal Information by Using Dummy Variables</i>	235
7.4	Interactions Involving Dummy Variables	238
	<i>Interactions among Dummy Variables</i>	238
	<i>Allowing for Different Slopes</i>	239
	<i>Testing for Differences in Regression Functions across Groups</i>	243
7.5	A Binary Dependent Variable: The Linear Probability Model	246
7.6	More on Policy Analysis and Program Evaluation	251
	Summary	254
	Key Terms	255
	Problems	255
	Computer Exercises	258

## CHAPTER 8

### Heteroskedasticity 264

8.1	Consequences of Heteroskedasticity for OLS	264
8.2	Heteroskedasticity-Robust Inference after OLS Estimation	265
	<i>Computing Heteroskedasticity-Robust LM Tests</i>	269
8.3	Testing for Heteroskedasticity	271
	<i>The White Test for Heteroskedasticity</i>	274
8.4	Weighted Least Squares Estimation	276
	<i>The Heteroskedasticity Is Known up to a Multiplicative Constant</i>	277
	<i>The Heteroskedasticity Function Must Be Estimated: Feasible GLS</i>	282
	<i>What If the Assumed Heteroskedasticity Function Is Wrong?</i>	287
	<i>Prediction and Prediction Intervals with Heteroskedasticity</i>	289
8.5	The Linear Probability Model Revisited	290
	Summary	293
	Key Terms	294
	Problems	294
	Computer Exercises	296

## CHAPTER 9

### More on Specification and Data Issues 300

9.1	Functional Form Misspecification	300
-----	----------------------------------	-----

	<i>RESET as a General Test for Functional Form Misspecification</i>	303
	<i>Tests against Nonnested Alternatives</i>	305
9.2	Using Proxy Variables for Unobserved Explanatory Variables	306
	<i>Using Lagged Dependent Variables as Proxy Variables</i>	310
	<i>A Different Slant on Multiple Regression</i>	312
9.3	Models with Random Slopes	313
9.4	Properties of OLS under Measurement Error	315
	<i>Measurement Error in the Dependent Variable</i>	316
	<i>Measurement Error in an Explanatory Variable</i>	318
9.5	Missing Data, Nonrandom Samples, and Outlying Observations	322
	<i>Missing Data</i>	322
	<i>Nonrandom Samples</i>	323
	<i>Outliers and Influential Observations</i>	325
9.6	Least Absolute Deviations Estimation	330
	Summary	331
	Key Terms	332
	Problems	332
	Computer Exercises	334

## PART 2

### Regression Analysis with Time Series Data 339

## CHAPTER 10

### Basic Regression Analysis with Time Series Data 340

10.1	The Nature of Time Series Data	340
10.2	Examples of Time Series Regression Models	342
	<i>Static Models</i>	342
	<i>Finite Distributed Lag Models</i>	342
	<i>A Convention about the Time Index</i>	345
10.3	Finite Sample Properties of OLS under Classical Assumptions	345
	<i>Unbiasedness of OLS</i>	345
	<i>The Variances of the OLS Estimators and the Gauss-Markov Theorem</i>	349
	<i>Inference under the Classical Linear Model Assumptions</i>	351
10.4	Functional Form, Dummy Variables, and Index Numbers	353

10.5 Trends and Seasonality	360
<i>Characterizing Trending Time Series</i>	360
<i>Using Trending Variables in Regression Analysis</i>	363
<i>A Detrending Interpretation of Regressions with a Time Trend</i>	365
<i>Computing R-Squared when the Dependent Variable Is Trending</i>	366
<i>Seasonality</i>	368
Summary	370
Key Terms	371
Problems	371
Computer Exercises	373

---

## CHAPTER 11

### Further Issues in Using OLS with Time Series Data 377

---

11.1 Stationary and Weakly Dependent Time Series	377
<i>Stationary and Nonstationary Time Series</i>	378
<i>Weakly Dependent Time Series</i>	379
11.2 Asymptotic Properties of OLS	381
11.3 Using Highly Persistent Time Series in Regression Analysis	388
<i>Highly Persistent Time Series</i>	388
<i>Transformations on Highly Persistent Time Series</i>	393
<i>Deciding Whether a Time Series Is I(1)</i>	394
11.4 Dynamically Complete Models and the Absence of Serial Correlation	396
11.5 The Homoskedasticity Assumption for Time Series Models	399
Summary	400
Key Terms	401
Problems	401
Computer Exercises	404

---

## CHAPTER 12

### Serial Correlation and Heteroskedasticity in Time Series Regressions 408

---

12.1 Properties of OLS with Serially Correlated Errors	408
<i>Unbiasedness and Consistency</i>	408
<i>Efficiency and Inference</i>	409
<i>Goodness-of-Fit</i>	410

<i>Serial Correlation in the Presence of Lagged Dependent Variables</i>	411
12.2 Testing for Serial Correlation	412
<i>A t Test for AR(1) Serial Correlation with Strictly Exogenous Regressors</i>	412
<i>The Durbin-Watson Test under Classical Assumptions</i>	415
<i>Testing for AR(1) Serial Correlation without Strictly Exogenous Regressors</i>	416
<i>Testing for Higher Order Serial Correlation</i>	417
12.3 Correcting for Serial Correlation with Strictly Exogenous Regressors	419
<i>Obtaining the Best Linear Unbiased Estimator in the AR(1) Model</i>	419
<i>Feasible GLS Estimation with AR(1) Errors</i>	421
<i>Comparing OLS and FGLS</i>	423
<i>Correcting for Higher Order Serial Correlation</i>	425
12.4 Differencing and Serial Correlation	426
12.5 Serial Correlation-Robust Inference after OLS	428
12.6 Heteroskedasticity in Time Series Regressions	432
<i>Heteroskedasticity-Robust Statistics</i>	432
<i>Testing for Heteroskedasticity</i>	432
<i>Autoregressive Conditional Heteroskedasticity</i>	433
<i>Heteroskedasticity and Serial Correlation in Regression Models</i>	435
Summary	437
Key Terms	437
Problems	438
Computer Exercises	438

## PART 3

### Advanced Topics 443

---

## CHAPTER 13

### Pooling Cross Sections across Time: Simple Panel Data Methods 444

---

13.1 Pooling Independent Cross Sections across Time	445
<i>The Chow Test for Structural Change across Time</i>	449
13.2 Policy Analysis with Pooled Cross Sections	450
13.3 Two-Period Panel Data Analysis	455
<i>Organizing Panel Data</i>	461

13.4 Policy Analysis with Two-Period Panel Data	462	15.4 IV Solutions to Errors-in-Variables Problems	525		
13.5 Differencing with More Than Two Time Periods	465	15.5 Testing for Endogeneity and Testing Overidentifying Restrictions	527		
<i>Potential Pitfalls in First Differencing Panel Data</i>	470	<i>Testing for Endogeneity</i>	527		
Summary	471	<i>Testing Overidentification Restrictions</i>	529		
Key Terms	471	15.6 2SLS with Heteroskedasticity	531		
Problems	471	15.7 Applying 2SLS to Time Series Equations	531		
Computer Exercises	473	15.8 Applying 2SLS to Pooled Cross Sections and Panel Data	534		
Appendix 13A	478	Summary	536		
<b>CHAPTER 14</b>					
<b>Advanced Panel Data Methods 481</b>					
14.1 Fixed Effects Estimation	481	Key Terms	536		
<i>The Dummy Variable Regression</i>	485	Problems	536		
<i>Fixed Effects or First Differencing?</i>	487	Computer Exercises	539		
<i>Fixed Effects with Unbalanced Panels</i>	488	Appendix 15A	543		
14.2 Random Effects Models	489	<b>CHAPTER 16</b>			
<i>Random Effects or Fixed Effects?</i>	493	<b>Simultaneous Equations Models 546</b>			
14.3 Applying Panel Data Methods to Other Data Structures	494	16.1 The Nature of Simultaneous Equations Models	546		
Summary	496	16.2 Simultaneity Bias in OLS	550		
Key Terms	496	16.3 Identifying and Estimating a Structural Equation	552		
Problems	497	<i>Identification in a Two-Equation System</i>	552		
Computer Exercises	498	<i>Estimation by 2SLS</i>	557		
Appendix 14A	503	16.4 Systems with More Than Two Equations	559		
<b>CHAPTER 15</b>					
<b>Instrumental Variables Estimation and Two Stage Least Squares 506</b>					
15.1 Motivation: Omitted Variables in a Simple Regression Model	507	<i>Identification in Systems with Three or More Equations</i>	559		
<i>Statistical Inference with the IV Estimator</i>	510	<i>Estimation</i>	560		
<i>Properties of IV with a Poor Instrumental Variable</i>	514	16.5 Simultaneous Equations Models with Time Series	560		
<i>Computing R-Squared after IV Estimation</i>	516	16.6 Simultaneous Equations Models with Panel Data	564		
15.2 IV Estimation of the Multiple Regression Model	517	Summary	566		
15.3 Two Stage Least Squares	521	Key Terms	567		
<i>A Single Endogenous Explanatory Variable</i>	521	Problems	567		
<i>Multicollinearity and 2SLS</i>	523	Computer Exercises	570		
<i>Multiple Endogenous Explanatory Variables</i>	524	<b>CHAPTER 17</b>			
<i>Testing Multiple Hypotheses after 2SLS Estimation</i>	525	<b>Limited Dependent Variable Models and Sample Selection Corrections 574</b>			
17.1 Logit and Probit Models for Binary Response	575	17.1 Logit and Probit Models for Binary Response	575		
<i>Specifying Logit and Probit Models</i>	575	<i>Maximum Likelihood Estimation of Logit and Probit Models</i>	578		
<i>Testing Multiple Hypotheses</i>	579	<i>Testing Multiple Hypotheses</i>	579		

<i>Interpreting the Logit and Probit Estimates</i>	580
17.2 The Tobit Model for Corner Solution Responses	587
<i>Interpreting the Tobit Estimates</i>	589
<i>Specification Issues in Tobit Models</i>	594
17.3 The Poisson Regression Model	595
17.4 Censored and Truncated Regression Models	600
<i>Censored Regression Models</i>	601
<i>Truncated Regression Models</i>	604
17.5 Sample Selection Corrections	606
<i>When Is OLS on the Selected Sample Consistent?</i>	607
<i>Incidental Truncation</i>	608
Summary	612
Key Terms	613
Problems	614
Computer Exercises	615
Appendix 17A	620
Appendix 17B	621

---

## CHAPTER 18

### Advanced Time Series Topics 623

---

18.1 Infinite Distributed Lag Models	624
<i>The Geometric (or Koyck) Distributed Lag</i>	626
<i>Rational Distributed Lag Models</i>	628
18.2 Testing for Unit Roots	630
18.3 Spurious Regression	636
18.4 Cointegration and Error Correction Models	637
<i>Cointegration</i>	637
<i>Error Correction Models</i>	643
18.5 Forecasting	645
<i>Types of Regression Models Used for Forecasting</i>	646
<i>One-Step-Ahead Forecasting</i>	647
<i>Comparing One-Step-Ahead Forecasts</i>	651
<i>Multiple-Step-Ahead Forecasts</i>	652
<i>Forecasting Trending, Seasonal, and Integrated Processes</i>	655
Summary	660
Key Terms	661
Problems	661
Computer Exercises	663

---

## CHAPTER 19

### Carrying Out an Empirical Project 668

---

19.1 Posing a Question	668
------------------------	-----

19.2 Literature Review	670
19.3 Data Collection	671
<i>Deciding on the Appropriate Data Set</i>	671
<i>Entering and Storing Your Data</i>	672
<i>Inspecting, Cleaning, and Summarizing Your Data</i>	673
19.4 Econometric Analysis	675
19.5 Writing an Empirical Paper	678
<i>Introduction</i>	678
<i>Conceptual (or Theoretical) Framework</i>	679
<i>Econometric Models and Estimation Methods</i>	679
<i>The Data</i>	682
<i>Results</i>	682
<i>Conclusions</i>	683
<i>Style Hints</i>	684
Summary	687
Key Terms	687
Sample Empirical Projects	687
List of Journals	692
Data Sources	693

---

## APPENDIX A

### Basic Mathematical Tools 695

---

A.1 The Summation Operator and Descriptive Statistics	695
A.2 Properties of Linear Functions	697
A.3 Proportions and Percentages	699
A.4 Some Special Functions and Their Properties	702
<i>Quadratic Functions</i>	702
<i>The Natural Logarithm</i>	704
<i>The Exponential Function</i>	708
A.5 Differential Calculus	709
Summary	711
Key Terms	711
Problems	711

---

## APPENDIX B

### Fundamentals of Probability 714

---

B.1 Random Variables and Their Probability Distributions	714
<i>Discrete Random Variables</i>	715
<i>Continuous Random Variables</i>	717
B.2 Joint Distributions, Conditional Distributions, and Independence	719
<i>Joint Distributions and Independence</i>	719
<i>Conditional Distributions</i>	721
B.3 Features of Probability Distributions	722

<i>A Measure of Central Tendency: The Expected Value</i>	722	<i>Method of Moments</i>	760
<i>Properties of Expected Values</i>	724	<i>Maximum Likelihood</i>	761
<i>Another Measure of Central Tendency: The Median</i>	725	<i>Least Squares</i>	762
<i>Measures of Variability: Variance and Standard Deviation</i>	726	C.5 Interval Estimation and Confidence Intervals	762
<i>Variance</i>	726	<i>The Nature of Interval Estimation</i>	762
<i>Standard Deviation</i>	728	<i>Confidence Intervals for the Mean from a Normally Distributed Population</i>	764
<i>Standardizing a Random Variable</i>	728	<i>A Simple Rule of Thumb for a 95% Confidence Interval</i>	768
<i>Skewness and Kurtosis</i>	729	<i>Asymptotic Confidence Intervals for Nonnormal Populations</i>	768
B.4 Features of Joint and Conditional Distributions	729	C.6 Hypothesis Testing	770
<i>Measures of Association: Covariance and Correlation</i>	729	<i>Fundamentals of Hypothesis Testing</i>	770
<i>Covariance</i>	729	<i>Testing Hypotheses about the Mean in a Normal Population</i>	772
<i>Correlation Coefficient</i>	731	<i>Asymptotic Tests for Nonnormal Populations</i>	774
<i>Variance of Sums of Random Variables</i>	732	<i>Computing and Using <i>p</i>-Values</i>	776
<i>Conditional Expectation</i>	733	<i>The Relationship between Confidence Intervals and Hypothesis Testing</i>	779
<i>Properties of Conditional Expectation</i>	734	<i>Practical versus Statistical Significance</i>	780
<i>Conditional Variance</i>	736		
B.5 The Normal and Related Distributions	737	C.7 Remarks on Notation	781
<i>The Normal Distribution</i>	737	<i>Summary</i>	782
<i>The Standard Normal Distribution</i>	738	<i>Key Terms</i>	782
<i>Additional Properties of the Normal Distribution</i>	740	<i>Problems</i>	783
<i>The Chi-Square Distribution</i>	741		
<i>The <i>t</i> Distribution</i>	741		
<i>The <i>F</i> Distribution</i>	743		
Summary	744		
Key Terms	744		
Problems	745		

---

<b>APPENDIX C</b>	<b>Fundamentals of Mathematical Statistics</b>	<b>747</b>	
C.1 Populations, Parameters, and Random Sampling	747	D.1 Basic Definitions	788
<i>Sampling</i>	748	D.2 Matrix Operations	789
C.2 Finite Sample Properties of Estimators	748	<i>Matrix Addition</i>	789
<i>Estimators and Estimates</i>	749	<i>Scalar Multiplication</i>	790
<i>Unbiasedness</i>	750	<i>Matrix Multiplication</i>	790
<i>The Sampling Variance of Estimators</i>	752	<i>Transpose</i>	791
<i>Efficiency</i>	754	<i>Partitioned Matrix Multiplication</i>	792
C.3 Asymptotic or Larger Sample Properties of Estimators	755	<i>Trace</i>	792
<i>Consistency</i>	755	<i>Inverse</i>	792
<i>Asymptotic Normality</i>	758		
C.4 General Approaches to Parameter Estimation	760		

---

D.3 Linear Independence and Rank of a Matrix	793
D.4 Quadratic Forms and Positive Definite Matrices	793
D.5 Idempotent Matrices	794
D.6 Differentiation of Linear and Quadratic Forms	795
D.7 Moments and Distributions of Random Vectors	795
<i>Expected Value</i>	795
<i>Variance-Covariance Matrix</i>	795
<i>Multivariate Normal Distribution</i>	796

## APPENDIX D

### Summary of Matrix Algebra 788

---

<i>Chi-Square Distribution</i>	796
<i>t Distribution</i>	797
<i>F Distribution</i>	797
Summary	797
Key Terms	797
Problems	798

---

**APPENDIX E****The Linear Regression Model in Matrix Form 799**

---

E.1 The Model and Ordinary Least Squares Estimation	799
E.2 Finite Sample Properties of OLS	801
E.3 Statistical Inference	805
E.4 Some Asymptotic Analysis	807
<i>Wald Statistics for Testing Multiple Hypotheses</i>	809
Summary	810
Key Terms	811
Problems	811

**APPENDIX F****Answers to Chapter Questions 813****APPENDIX G****Statistical Tables 823**

---
