

Contents

<i>Preface</i>	<i>iii</i>
1. Physical and Mechanical Properties	1
2. Corrosion of Metallic Materials	11
3. Carbon Steel	39
4. Low-Alloy Carbon Steels	53
5. Cast Iron and Cast Steel	69
6. Introduction to Stainless Steels	87
7. Corrosion of Stainless Steels	105
	v

8. Austenitic Stainless Steels	121
9. Superaustenitic Stainless Steels	159
10. Ferritic Stainless Steels	187
11. Superferritic Stainless Steels	201
12. Precipitation Hardening Stainless Steels	209
13. Martensitic Stainless Steels	235
14. Duplex Stainless Steels	255
15. Nickel and High Nickel Alloys	269
16. Comparative Corrosion Resistance of Stainless Steel and High Nickel Alloys	325
17. Cast Stainless Steel and Nickel Base Alloys	511
18. Copper and Copper Alloys	537
19. Aluminum and Aluminum Alloys	571
20. Zinc and Zinc Alloys	603
21. Titanium	627
22. Zirconium and Zirconium Alloys	647
23. Tantalum and Tantalum Alloys	667
24. Niobium (Columbium) and Niobium Alloys	683
25. Magnesium Alloys	691
26. Lead and Lead Alloys	695
<i>Index</i>	699
