

Contents at a Glance

Introduction	1
Part 1: Vital Statistics about Statistics	7
CHAPTER 1: Statistics in a Nutshell	9
CHAPTER 2: The Statistics of Everyday Life	23
CHAPTER 3: Taking Control: So Many Numbers, So Little Time	35
CHAPTER 4: Tools of the Trade	47
Part 2: Number-Crunching Basics	69
CHAPTER 5: Means, Medians, and More	71
CHAPTER 6: Getting the Picture: Graphing Categorical Data	95
CHAPTER 7: Going by the Numbers: Graphing Numerical Data	107
Part 3: Distributions and the Central Limit Theorem	133
CHAPTER 8: Random Variables and the Binomial Distribution	135
CHAPTER 9: The Normal Distribution	149
CHAPTER 10: The <i>t</i> -Distribution	165
CHAPTER 11: Sampling Distributions and the Central Limit Theorem	171
Part 4: Guesstimating and Hypothesizing with Confidence	187
CHAPTER 12: Leaving Room for a Margin of Error	189
CHAPTER 13: Confidence Intervals: Making Your Best Guesstimate	201
CHAPTER 14: Claims, Tests, and Conclusions	223
CHAPTER 15: Commonly Used Hypothesis Tests: Formulas and Examples	237
Part 5: Statistical Studies and the Hunt for a Meaningful Relationship	255
CHAPTER 16: Polls, Polls, and More Polls	257
CHAPTER 17: Experiments: Medical Breakthroughs or Misleading Results?	275
CHAPTER 18: Looking for Links: Correlation and Regression	293
CHAPTER 19: Two-Way Tables and Independence	311
Part 6: The Part of Tens	333
CHAPTER 20: Ten Tips for the Statistically Savvy Sleuth	335
CHAPTER 21: Ten Surefire Exam Score Boosters	349
Appendix: Tables for Reference	365
Index	375

Table of Contents

INTRODUCTION	1
About This Book	1
Conventions Used in This Book	2
What You're Not to Read	3
Foolish Assumptions	3
How This Book Is Organized	3
Part 1: Vital Statistics about Statistics	3
Part 2: Number-Crunching Basics	4
Part 3: Distributions and the Central Limit Theorem	4
Part 4: Guesstimating and Hypothesizing with Confidence	4
Part 5: Statistical Studies and the Hunt for a Meaningful Relationship	5
Part 6: The Part of Tens	5
Icons Used in This Book	6
Where to Go from Here	6
 PART 1: VITAL STATISTICS ABOUT STATISTICS	 7
CHAPTER 1: Statistics in a Nutshell	9
Thriving in a Statistical World	10
Designing Appropriate Studies	11
Surveys	11
Experiments	12
Collecting Quality Data	13
Selecting a good sample	13
Avoiding bias in your data	14
Creating Effective Summaries	14
Descriptive statistics	15
Charts and graphs	15
Determining Distributions	16
Performing Proper Analyses	17
Margin of error and confidence intervals	18
Hypothesis tests	19
Correlation, regression, and two-way tables	20
Drawing Credible Conclusions	21
Reeling in overstated results	21
Questioning claims of cause and effect	21
Becoming a Sleuth, Not a Skeptic	22

CHAPTER 2: The Statistics of Everyday Life	23
Statistics and the Media: More Questions than Answers?	24
Probing popcorn problems	24
Venturing into viruses	24
Comprehending crashes	25
Mulling malpractice	26
Belaboring the loss of land	26
Scrutinizing schools	27
Studying sports	28
Banking on business news	28
Touring the travel news	29
Surveying sexual stats	29
Breaking down weather reports	30
Musing about movies	30
Highlighting horoscopes	31
Using Statistics at Work	31
Delivering babies — and information	31
Posing for pictures	32
Poking through pizza data	32
Statistics in the office	33
CHAPTER 3: Taking Control: So Many Numbers, So Little Time	35
Detecting Errors, Exaggerations, and Just Plain Lies	36
Checking the math	36
Uncovering misleading statistics	37
Looking for lies in all the right places	44
Feeling the Impact of Misleading Statistics	44
CHAPTER 4: Tools of the Trade	47
Statistics: More than Just Numbers	47
Grabbing Some Basic Statistical Jargon	49
Data	50
Data set	51
Variable	51
Population	51
Sample, random, or otherwise	52
Statistic	54
Parameter	54
Bias	55
Mean (Average)	55
Median	56
Standard deviation	56
Percentile	57

Standard score.....	57
Distribution and normal distribution.....	58
Central Limit Theorem.....	59
z-values.....	60
Experiments.....	60
Surveys (Polls).....	62
Margin of error.....	62
Confidence interval.....	63
Hypothesis testing.....	64
p-values.....	65
Statistical significance.....	66
Correlation versus causation.....	67
PART 2: NUMBER-CRUNCHING BASICS.....	69
CHAPTER 5: Means, Medians, and More.....	71
Summing Up Data with Descriptive Statistics.....	71
Crunching Categorical Data: Tables and Percents.....	72
Measuring the Center with Mean and Median.....	75
Averaging out to the mean.....	75
Splitting your data down the median.....	77
Comparing means and medians: Histograms.....	78
Accounting for Variation.....	80
Reporting the standard deviation.....	81
Being out of range.....	84
Examining the Empirical Rule (68-95-99.7).....	85
Measuring Relative Standing with Percentiles.....	87
Calculating percentiles.....	88
Interpreting percentiles.....	89
Gathering a five-number summary.....	93
Exploring interquartile range.....	94
CHAPTER 6: Getting the Picture: Graphing Categorical Data ...	95
Take Another Little Piece of My Pie Chart.....	96
Tallying personal expenses.....	96
Bringing in a lotto revenue.....	97
Ordering takeout.....	98
Projecting age trends.....	99
Raising the Bar on Bar Graphs.....	101
Tracking transportation expenses.....	101
Making a lotto profit.....	103
Tipping the scales on a bar graph.....	104
Pondering pet peeves.....	105

CHAPTER 7:	Going by the Numbers: Graphing Numerical Data	107
	Handling Histograms	108
	Making a histogram	108
	Interpreting a histogram	111
	Putting numbers with pictures	115
	Detecting misleading histograms	117
	Examining Boxplots	120
	Making a boxplot	120
	Interpreting a boxplot	121
	Tackling Time Charts	127
	Interpreting time charts	127
	Understanding variability: Time charts versus histograms	128
	Spotting misleading time charts	128

PART 3: DISTRIBUTIONS AND THE CENTRAL LIMIT THEOREM 133

CHAPTER 8:	Random Variables and the Binomial Distribution	135
	Defining a Random Variable	136
	Discrete versus continuous	136
	Probability distributions	137
	The mean and variance of a discrete random variable	138
	Identifying a Binomial	139
	Checking binomial conditions step by step	140
	No fixed number of trials	140
	More than success or failure	141
	Trials are not independent	141
	Probability of success (p) changes	141
	Finding Binomial Probabilities Using a Formula	142
	Finding Probabilities Using the Binomial Table	144
	Finding probabilities for specific values of X	145
	Finding probabilities for X greater-than, less-than, or between two values	146
	Checking Out the Mean and Standard Deviation of the Binomial	146
CHAPTER 9:	The Normal Distribution	149
	Exploring the Basics of the Normal Distribution	150
	Meeting the Standard Normal (Z-) Distribution	152
	Checking out Z	153
	Standardizing from X to Z	153
	Finding probabilities for Z with the Z-table	155
	Finding Probabilities for a Normal Distribution	156

Finding X When You Know the Percent	158
Figuring out a percentile for a normal distribution	159
Translating tricky wording in percentile problems.....	161
Normal Approximation to the Binomial.....	162
CHAPTER 10: The <i>t</i>-Distribution.....	165
Basics of the <i>t</i> -Distribution.....	165
Comparing the <i>t</i> - and Z-distributions	165
Discovering the effect of variability on <i>t</i> -distributions.....	167
Using the <i>t</i> -Table	167
Finding probabilities with the <i>t</i> -table	168
Figuring percentiles for the <i>t</i> -distribution	168
Picking out <i>t</i> *-values for confidence intervals.....	169
Studying Behavior Using the <i>t</i> -Table.....	170
CHAPTER 11: Sampling Distributions and the Central Limit Theorem.....	171
Defining a Sampling Distribution	172
The Mean of a Sampling Distribution.....	174
Measuring Standard Error	174
Sample size and standard error	175
Population standard deviation and standard error.....	176
Looking at the Shape of a Sampling Distribution.....	178
Case 1: The distribution of X is normal.....	178
Case 2: The distribution of X is not normal—enter the Central Limit Theorem.....	178
Finding Probabilities for the Sample Mean	181
The Sampling Distribution of the Sample Proportion	183
Finding Probabilities for the Sample Proportion	185
PART 4: GUESSTIMATING AND HYPOTHESIZING WITH CONFIDENCE	187
CHAPTER 12: Leaving Room for a Margin of Error.....	189
Seeing the Importance of That Plus or Minus.....	190
Finding the Margin of Error: A General Formula.....	191
Measuring sample variability.....	191
Calculating margin of error for a sample proportion.....	193
Reporting results.....	194
Calculating margin of error for a sample mean	195
Being confident you're right.....	197
Determining the Impact of Sample Size.....	197
Sample size and margin of error.....	198
Bigger isn't always (that much) better!.....	198
Keeping margin of error in perspective	199

CHAPTER 13:	Confidence Intervals: Making Your Best Guesstimate	201
	Not All Estimates Are Created Equal	202
	Linking a Statistic to a Parameter	203
	Getting with the Jargon	203
	Interpreting Results with Confidence	204
	Zooming In on Width	205
	Choosing a Confidence Level	206
	Factoring In the Sample Size	208
	Counting On Population Variability	209
	Calculating a Confidence Interval for a Population Mean	210
	Case 1: Population standard deviation is known	210
	Case 2: Population standard deviation is unknown and/or n is small	212
	Figuring Out What Sample Size You Need	213
	Determining the Confidence Interval for One Population Proportion	214
	Creating a Confidence Interval for the Difference of Two Means	216
	Case 1: Population standard deviations are known	216
	Case 2: Population standard deviations are unknown and/or sample sizes are small	218
	Estimating the Difference of Two Proportions	219
	Spotting Misleading Confidence Intervals	221
CHAPTER 14:	Claims, Tests, and Conclusions	223
	Setting Up the Hypotheses	224
	Defining the null	224
	What's the alternative?	225
	Gathering Good Evidence (Data)	226
	Compiling the Evidence: The Test Statistic	226
	Gathering sample statistics	227
	Measuring variability using standard errors	227
	Understanding standard scores	228
	Calculating and interpreting the test statistic	228
	Weighing the Evidence and Making Decisions: p-Values	229
	Connecting test statistics and p-values	229
	Defining a p-value	230
	Calculating a p-value	230
	Making Conclusions	231
	Setting boundaries for rejecting H_0	232
	Testing varicose veins	233
	Assessing the Chance of a Wrong Decision	233
	Making a false alarm: Type-1 errors	234
	Missing out on a detection: Type-2 errors	234

CHAPTER 15: Commonly Used Hypothesis Tests: Formulas and Examples	237
Testing One Population Mean	238
Handling Small Samples and Unknown Standard Deviations: The t-Test	240
Putting the t-test to work	241
Relating t to Z	241
Handling negative t-values	242
Examining the not-equal-to alternative	242
Testing One Population Proportion	243
Comparing Two (Independent) Population Averages	245
Testing for an Average Difference (The Paired t-Test)	247
Comparing Two Population Proportions	251

PART 5: STATISTICAL STUDIES AND THE HUNT FOR A MEANINGFUL RELATIONSHIP 255

CHAPTER 16: Polls, Polls, and More Polls	257
Recognizing the Impact of Polls	258
Getting to the source	258
Surveying what's hot	260
Impacting lives	260
Behind the Scenes: The Ins and Outs of Surveys	262
Planning and designing a survey	263
Selecting the sample	266
Carrying out a survey	268
Interpreting results and finding problems	271
CHAPTER 17: Experiments: Medical Breakthroughs or Misleading Results?	275
Boiling Down the Basics of Studies	276
Looking at the lingo of studies	276
Observing observational studies	277
Examining experiments	278
Designing a Good Experiment	278
Designing the experiment to make comparisons	279
Selecting the sample size	281
Choosing the subjects	283
Making random assignments	283
Controlling for confounding variables	284
Respecting ethical issues	286
Collecting good data	287
Analyzing the data properly	289
Making appropriate conclusions	290
Making Informed Decisions	292

CHAPTER 18:	Looking for Links: Correlation and Regression . . .	293
	Picturing a Relationship with a Scatterplot	294
	Making a scatterplot	295
	Interpreting a scatterplot	296
	Quantifying Linear Relationships Using the Correlation	297
	Calculating the correlation	297
	Interpreting the correlation	298
	Examining properties of the correlation	300
	Working with Linear Regression	301
	Figuring out which variable is X and which is Y	301
	Checking the conditions	302
	Calculating the regression line	302
	Interpreting the regression line	304
	Putting it all together with an example: The regression line for the crickets	306
	Making Proper Predictions	306
	Explaining the Relationship: Correlation versus Cause and Effect	308
CHAPTER 19:	Two-Way Tables and Independence	311
	Organizing a Two-Way Table	312
	Setting up the cells	313
	Figuring the totals	314
	Interpreting Two-Way Tables	315
	Singling out variables with marginal distributions	315
	Examining all groups — a joint distribution	317
	Comparing groups with conditional distributions	321
	Checking Independence and Describing Dependence	324
	Checking for independence	324
	Describing a dependent relationship	327
	Cautiously Interpreting Results	329
	Checking for legitimate cause and effect	329
	Projecting from sample to population	330
	Making prudent predictions	331
	Resisting the urge to jump to conclusions	332
	PART 6: THE PART OF TENS	333
CHAPTER 20:	Ten Tips for the Statistically Savvy Sleuth	335
	Pinpoint Misleading Graphs	335
	Pie charts	336
	Bar graphs	336
	Time charts	337
	Histograms	339

Uncover Biased Data.....	339
Search for a Margin of Error	340
Identify Non-Random Samples	341
Sniff Out Missing Sample Sizes	342
Detect Misinterpreted Correlations	343
Reveal Confounding Variables.....	344
Inspect the Numbers	344
Report Selective Reporting.....	345
Expose the Anecdote	346
CHAPTER 21: Ten Surefire Exam Score Boosters.....	349
Know What You Don't Know, and then Do Something about It	350
Avoid "Yeah-Yeah" Traps	351
Yeah-yeah trap #1	352
Yeah-yeah trap #2.....	352
Make Friends with Formulas	354
Make an "If-Then-How" Chart	355
Figure Out What the Question Is Asking	357
Label What You're Given.....	358
Draw a Picture	360
Make the Connection and Solve the Problem.....	361
Do the Math — Twice	362
Analyze Your Answers.....	363
APPENDIX: TABLES FOR REFERENCE.....	365
INDEX.....	375
