Foreword	3
THE NATIONAL PROGRAMME ON CONSERVATION AND UTILIZATION OF PLANT, ANIMAL AND MICROBIAL GENETIC RESOURCES IMPORTANT FOR FOOD AND AGRICULTURE FOR THE PERIOD 2018–2022	6
1. Introduction	6
2. The definition of biological diversity	6
3. The role of biodiversity in the agricultural sector	6
4. Genetic resources for food and agriculture and their value	7
5. The international strategic and legal framework of the National Programme	7
6. The European strategic and legal framework of the National Programme	8
7. The national strategic and legal framework of the National Programme	8
8. The objective and goals of the National Programme	9
9. The content of the National Programme	9
10. The structure of the National Programme	10
11. The organization of the National Programme	11
12. Financing	11
13. Duration of the National Programme	12
14. Action plan for implementing the National Programme	12
SPECIFIC PART – SUBPROGRAMMES	14
A. The National Programme on Conservation and Utilization of Plant Genetic Resources and Agrobiodiversity	14
1. Mission and aims	14
2. The state of the collections	14
3. Structure and organisation	15
4. Specific methodological activities	16
5. Conditions for inclusion in the National Programme for Plant GR	18
6. International cooperation	18
7. Utilization of GR and the services provided	19
8. Plan of specific activities	20
B. The National Programme on Conservation and Utilization of Animal Genetic Resources Important for Food and Agriculture	24
1. Mission and aims	24
2. The current state of animal GR	24

3. Structure and organization	27
4. Specific methodological activities	28
5. Monitoring and evaluation of animal GR	29
6. Inventory, characterization and documentation	30
7. International cooperation	32
8. Use of animal GR and the services provided	33
9. Plan of specific activities	33

C. The National Programme on Conservation and Utilization of Microbial Genetic Resources and Invertebrates of Agricultural Importance37

1. Mission and aim	37
2. The current state of collections	37
3. Structure and organization	38
4. Specific methodological activities	39
5. International cooperation	41
6. Utilization of GR and the services provided	41
7. Plan of specific activities	42

D. ANNEXES46

1. Participants to the National Programme on Plant GR	46
2. Participants to the National Programme on Animal GR	49
3. Participants to the National Programme on Microbial GR	52
4. List of acronyms and abbreviations	55
