

Preface	VII
List of participants	IX
Contents of the volume Differential Geometry and Its Applications (communications)	XI
Alternative Lagrangians in particle dynamics	
M. Crampin	1
Characteristic classes and numbers for fibre bundles over noncompact manifolds	
J. Eichhorn	13
Applications of the Poincaré-Cartan form in higher order field theories	
M. Ferraris, M. Francaviglia	31
Differential geometry problems in integral geometry	
G. Gindikin	53
Remarks on Wente's example of an immersed torus in E^3	
S.I. Goldberg, G. Toth	71
Almost symplectic structures in dynamics	
J. Klein	79
Some natural operators in differential geometry	
I. Kolář	91
Regular Lagrangians and Lepagean forms	
D. Krupka	111
Natural transformations of Riemannian metrics on manifolds to metrics on linear frame bundles - classification	
O. Kowalski, M. Sekizawa	149
Almost tangent geometry and higher order mechanical systems	
M. de León, P.R. Rodrigues	179
Remarks on the Frölicher-Nijenhuis bracket	
P.W. Michor	197
Conservation laws in continuum dynamics	
F. Mimura, T. Nôno	221

New results on the theory of connections: Systems, overconnections and prolongations	
M. Modugno	243
Explicit calculation of certain differential identities used in mathematical physics	
J.F. Pommaret	271
Geometrical structures related to second-order equations	
W. Sarlet	279
Cartan's method of equivalence and the calculus of variations	
W.F. Shadwick	301
Connections and conformal structure in affine differential geometry	
U. Simon	315
Ambiguities of quantization procedure and choice of the Hamiltonian	
V.D. Skarzhinski	329
Symmetries and homogeneous Kähler manifolds	
L. Vanhecke	339
Geometric singularities of solutions of nonlinear partial differential equations	
A.M. Vinogradov	359
Index	383
