

Contents

Introduction	vii
Chapter I. Invariant Differentiation	1
§ 1. Vector Fields, Trajectories, Invariants	1
§ 2. Lie Differentiation in a Non-holonomic Basis	5
§ 3. Some Applications	12
Chapter II. Connection in the Bundle	19
§ 4. Translation of Fibres	19
§ 5. Linear Connection	26
§ 6. Morphism of Bundles with Connections	32
Chapter III. Ordinary Differential Equations	41
§ 7. Operator of Total Differentiation	41
§ 8. Prolongation of a Differential Equation	48
§ 9. Shadows on Illuminated Surfaces	67
Chapter IV. Partial Differential Equations	91
§10. Multidimensional Time	91
§11. Characteristic Vector Fields	101
Chapter V. Higher Order Differential Geometry	115
§12. Differential Invariants of Mappings	115
§13. Iterations of the Tangent Functor	143
§14. The Highest Connections	155
Index	169
