

Riemannian Geometry

V.V. Balashchenko

The algebra of canonical affinor structures on homogeneous k -symmetric spaces 3

A.R. Chouikha

Ricci tensor of pseudo-cylindric metrics 15

M. Goto

When is a diffeomorphism of a hyperbolic space isotopic to the identity? 23

A.M. Ionescu

Skew-symmetric frames and constant curvature 27

E. Loubeau and Y.-L. Ou

The characterization of biharmonic morphisms 31

J. Mikeš and O. Pokorná

On holomorphically projective mappings onto almost Hermitian spaces 43

Geometric Structures

R.J. Alonso-Blanco

On the local structure of A -jet spaces 51

A. Cabras and I. Kolář

On the covariant exterior differentiation on Weil bundles 63

B. Doubrov

Contact trivialization of ordinary differential equations 73

I. Kolář

On the geometry of fiber product preserving bundle functors 85

B. Kruglikov

Examples of symplectic $Q^3 \times S^1$ 93

B. Langerock

Connections in sub-Riemannian geometry 105

N. Nakanishi

Projectability of left-invariant Nambu–Poisson tensors on a Lie group 115

P. Popescu and M. Popescu	
<i>On modules with differential</i>	123
I. Sánchez-Rodríguez	
<i>Intersection of G-structures of first or second order</i>	135
P. Somberg	
<i>On the passage from orthogonal (conformal) to symplectic (contact) from the point of view of spinor theory</i>	141
E. Winterroth	
<i>A K-theory for certain multisymplectic vector bundles</i>	153

Analysis on Manifolds and Differential Equations

A. Asada	
<i>Logarithm of differential forms and regularization of volume forms</i>	165
C.V. Jensen	
<i>Geometric structures on solution spaces of integrable distributions</i>	175
S Jiménez, J. Muñoz and J. Rodríguez	
<i>On the reduction of some systems of partial differential equations to first order systems with only one unknown function</i>	187
L. Klapka	
<i>Functional equations for metric geodesic arcs</i>	197
L. Kozma, A. Kristály and C. Varga	
<i>Isometry-invariant geodesics with Lipschitz obstacle</i>	203
J. Kurek and W.M. Mikulski	
<i>The natural operators lifting 1-forms to the r-jet prolongation of the cotangent bundle</i>	215
R. Léandre	
<i>Browder operations and heat kernel homology</i>	229
G.E. Prince and M. Jerie	
<i>Generalising Raychaudhuri's equation</i>	235
A. Sergyeyev	
<i>On a class of inhomogeneous extensions for integrable evolution systems</i>	243

Geometric Methods in Physics

W. Borgiel	
<i>The gravitational field of spacetime of constant curvature</i>	255
K. Grabowska and J. Kijowski	
<i>Canonical gravity and gravitational energy</i>	261
D. Iglesias Ponte	
<i>$\mathcal{E}^1(M)$-Dirac structures and Jacobi structures</i>	275
J. Janyška and M. Modugno	
<i>Covariant pre-quantum operators</i>	285
I.V. Kanatchikov	
<i>Geometric (pre)quantization in the polysymplectic approach to field theory</i>	309

P. Klepáč	
<i>On spacetimes with 3-parameter isometry group in string-inspired theory of gravity</i>	323
R.G. McLenaghan, R.G. Smirnov and D. The	
<i>The 1881 problem of Morera revisited</i>	333
R.C. Nostre Marquez, P. Piccione and D.V. Tausk	
<i>On the Morse and the Maslov index for periodic geodesics of arbitrary causal character</i>	343
J. Rybníčková	
<i>Energy of some Gödel type models</i>	359
P. Volný and O. Krupková	
<i>Hamilton equations for non-holonomic systems</i>	369

The Calculus of Variations

M. Castrillón López and P.L. García Pérez	
<i>Multidimensional Euler–Poincaré equations</i>	383
V.G. Cristea	
<i>Euler’s superequations</i>	393
L. Fatibene, M. Francaviglia and M. Raiteri	
<i>Gauge natural field theories and applications to conservation laws</i>	401
M. Francaviglia, M. Palese and E. Winterroth	
<i>A new geometric proposal for the Hamiltonian description of classical field theories</i>	415
M. Juráš	
<i>Towards a solution of the inverse problem of the calculus of variations for scalar ordinary differential equations</i>	425
G. Manno and R. Vitolo	
<i>Variational sequences on finite order jets of submanifolds</i>	435
R. Matsyuk	
<i>Autoparallel variational description of the free relativistic top third order dynamics</i>	447
W. Sarlet, T. Mestdag and E. Martínez	
<i>Lagrangian equations on affine Lie algebroids</i>	461
C. Tejero Prieto	
<i>Variational problems defined by local data</i>	473
Cs. Vincze	
<i>Conservative semisprays on Finsler manifolds II</i>	485
List of participants	491
