

Preface	ix
List of Participants	xi
 Part I. RIEMANNIAN GEOMETRY	
<i>Alekseevsky D.V., Marchiafava S., Pontecorvo M.</i>	1
Some geometric aspects of compatible complex structures on a quaternion Kähler manifold	
<i>Balashchenko V.V.</i>	13
Naturally reductive almost product manifolds	
<i>Barrera-Yanez E.</i>	23
The Moduli space $\mathcal{M}(M)$ of certain non-orientable manifolds of even dimension	
<i>Baum H.</i>	29
Twistor spinors on Lorentzian manifolds, CR-geometry and Fefferman spaces	
<i>Chouikha A.R.</i>	39
On the properties of certain metrics with constant scalar curvature	
<i>Deshmukh S.</i>	47
Curvature bounds for the spectrum of a compact Einstein-like manifold	
<i>Dotti I.G., Druetta M.J.</i>	61
Osserman- P spaces of Iwasawa type	
<i>Gilkey P.B.</i>	73
Riemannian manifolds whose skew-symmetric curvature operator has constant eigenvalues II	
<i>Loubeau E.</i>	89
Pluriharmonic morphisms between complex manifolds	
<i>Oproiu V., Papaghiuc N.</i>	99
Locally symmetric space structures on the tangent bundle	

<i>Rodionov E.D., Slavskii V.V.</i>	111
Curvatures estimations of left invariant Riemannian metrics on three dimensional Lie groups	
<i>Saralegi-Aranguren M., Wolak R.A.</i>	127
Basic cohomology for Riemannian foliations	
<i>Semmelmann U.</i>	137
A short proof of eigenvalue estimates for the Dirac operator on Riemannian and Kähler manifolds	
<i>Tanaka M.S.</i>	141
Geometry of compact symmetric spaces	
<i>Tsukada K.</i>	149
The moduli space of locally homogeneous spaces and locally homogeneous spaces which are not locally isometric to globally homogeneous spaces	

Part II. GEOMETRY OF SURFACES AND SUBMANIFOLDS

<i>Akivis M.A., Goldberg V.V.</i>	161
The geometry of lightlike hypersurfaces on manifolds endowed with a conformal structure of Lorentzian signature	
<i>Ferapontov E.V.</i>	171
Surfaces in projective differential geometry and integrable systems	
<i>Gavrilenko M.L., Kinzerska N.N.</i>	185
Infinitesimal geodesic deformations of the totally geodesic manifolds	
<i>Hájková V.</i>	191
Deformations of hypersurfaces in $\mathbb{R}^4$	
<i>Igarashi M.</i>	195
Some examples of the Hermite-Liouville structure on the classical Hopf surface	
<i>Miyaoka R.</i>	203
A global correspondence between CMC-surfaces in S^3 and pairs of non-conformal harmonic maps into S^2	
<i>Moriya K.</i>	207
On a variety of Weierstrass data for branched minimal surfaces in Euclidean space	
<i>Riives K.</i>	215
On the special class of curves on some four-dimensional semiparallel submanifolds	

Part III. JETS AND WEIL BUNDLES

<i>Doupovec M.</i>	223
On the symplectic structure of some natural bundles	
<i>Kolář I.</i>	231
Bundle functors of the jet type	
<i>Kureš M.</i>	239
Affinors and connections in higher order geometry	
<i>Lubaś K., Zajtz A.</i>	247
Estimates of the action order of some jet groups	
<i>Muñoz J., Muriel F.J., Rodriguez J.</i>	255
The canonical isomorphism between the prolongation of the symbols of a nonlinear Lie equation and its attached linear Lie equation	
<i>Muñoz J., Muriel F.J., Rodriguez J.</i>	263
The contact system on the spaces of (m, ℓ) -velocities	
<i>Ortaçgil E.</i>	273
On a diagram in the theory of connections	
<i>Panák M.</i>	285
Natural operators on the bundle of Cartan connections	
<i>Tomáš J.</i>	293
Natural T -functions on the cotangent bundles of some Weil bundles	

Part IV. FURTHER GEOMETRIC STRUCTURES

<i>Arvanitoyeorgos A.</i>	303
The Duistermaat-Heckman integration formula on generalized flag manifolds	
<i>Asada A.</i>	309
Clifford bundles over mapping spaces	
<i>Bureš J.</i>	319
The higher spin Dirac operators	
<i>Cheptea D.</i>	335
Some remarks on floor homology invariants	
<i>Craioveanu M., Pop C., Puta M.</i>	347
Geometrical aspects in the dynamics of an automobil with two trailers	
<i>Kalnitski V.S.</i>	355
Symmetry fields of geodesic vector field	

<i>Kolář M.</i>	361
On local convexifiability of type four domains in $\mathbb{C}^2$	
<i>Lakomá L., Mikeš J., Mikušová L.</i>	371
The decomposition of tensor spaces	
<i>Miatello R.J., Rossetti J.P.</i>	379
Hantzsche-Wendt manifolds of dimension 7	
<i>Multarzyński P.</i>	391
On some differential structures for function spaces	
<i>Rukimbira P.</i>	399
Topology and characteristic closures of K-contact manifolds	
<i>Rybicki T.</i>	413
The flux homomorphism in the foliated case	
<i>Sabinin L.V.</i>	419
Methods of non-associative algebra in differential geometry	
<i>Sawon J.</i>	429
The Rozansky-Witten invariants of hyperkähler manifolds	
<i>Sbitneva L.V.</i>	437
Transsymmetric spaces. New results	

Part V. THE CALCULUS OF VARIATIONS

<i>Abadoglu E.</i>	443
A remark on first nonlinear Spencer sequence	
<i>Alonso R.J.</i>	451
Decomposition of higher order tangent fields and calculus of variations	
<i>Castrillón-López M.</i>	461
Gauge invariant variationally trivial $U(1)$ -problems	
<i>Francaviglia M., Palese M., Vitolo R.</i>	469
Superpotentials in variational sequences	
<i>Grigore D.R.</i>	481
Fock space methods and the Lagrangian formalism on finite jet bundle extensions	
<i>Kašparová J.</i>	493
A representation of the 1st-order variational sequence in field theory	
<i>Klapka L.</i>	503
Local expressions for Poisson manifolds of geodesic arcs in Lagrangian mechanics	

<i>Krbek M., Musilová J.</i>	511
A note to the representation of the variational sequence in mechanics	
<i>Krupka D.</i>	525
Variational sequences and variational bicomplex	
<i>Krupková O.</i>	533
On the geometry of non-holonomic mechanical systems	
<i>Matsyuk R.Y.</i>	547
Hamilton–Ostrohradskyj approach to relativistic free spherical top dynamics	
<i>Mráz M., Musilová J.</i>	553
Translationally invariant Lagrange structures	
<i>Sarlet W.</i>	563
Integrability aspects of the inverse problem of the calculus of variations	
<i>Saunders D.J.</i>	575
The geometry of non-holonomic Lagrangian systems	

Part VI. GEOMETRIC METHODS IN PHYSICS

<i>Casati P.</i>	581
The bihamiltonian structure of the Drinfel'd-Sokolov hierarchies related to the affine twisted Lie algebras	
<i>Gotay M.J.</i>	593
Nonexistence of finite-dimensional quantizations of a noncompact symplectic manifold	
<i>Hall G.S.</i>	597
Sectional curvature and Einstein's equations	
<i>Janyška J., Modugno M.</i>	601
On the graded Lie algebra of quantisable forms	
<i>Lopez Almorox A., Tejero Prieto C.</i>	621
Geometric quantization of the Landau problem on hyperbolic Riemann surfaces	
<i>Piccione P.</i>	631
Causal trajectories between submanifolds in Lorentzian geometry	
<i>Putu M., Lazureanu C.</i>	645
Integration of the rigid body equations with quadratic controls	
<i>Vitolo R.</i>	653
Quantizing a rigid body
