## Learn to program SAS° by example!

Learning SAS\* by Example, A Programmer's Guide, Second Edition, teaches SAS programming from very basic concepts to more advanced topics. Because most programmers prefer examples rather than reference-type syntax, this book uses short examples to explain each topic. The second edition has brought this classic book on SAS programming up to the latest SAS version, with new chapters that cover topics such as PROC SGPLOT and Perl regular expressions. This book belongs on the shelf (or e-book reader) of anyone who programs in SAS, from those with little programming experience who want to learn SAS to intermediate and even advanced SAS programmers who want to learn new techniques or identify new ways to accomplish existing tasks.

In an instructive and conversational tone, author Ron Cody clearly explains each programming technique and then illustrates it with one or more real-life examples, followed by a detailed description of how the program works. The text is divided into four major sections: Getting Started, DATA Step Processing, Presenting and Summarizing Your Data, and Advanced Topics. Subjects addressed include

- Reading data from external sources
- Learning details of DATA step programming
- Subsetting and combining SAS data sets
- Understanding SAS functions and working with arrays
- Creating reports with PROC REPORT and PROC TABULATE
- Getting started with the SAS macro language
- Leveraging PROC SQL
- · Generating high-quality graphics
- Using advanced features of user-defined formats and informats
- Restructuring SAS data sets
- Working with multiple observations per subject
- Getting started with Perl regular expressions

You can test your knowledge and hone your skills by solving the problems at the end of each chapter.

Photo Credit: Jan Cod

RON CODY, EdD, is a retired professor from the Rutgers Robert Wood Johnson Medical School who now works as a national instructor for SAS and as an author of books on SAS and statistics. A SAS user since 1977, Ron's extensive knowledge and innovative style have made him a popular presenter at local, regional, and national SAS conferences. He has authored or co-authored numerous books, as well as countless articles in medical and scientific journals.

"Ron Cody's newest book can serve not only as a textbook for a SAS programming course, but also as a reference for intermediate-level programmers. The book begins with basic data input methods and advances through merging data sets and more complex tasks.

I would recommend Learning SAS by Example: A Programmer's Guide to anyone wishing to learn or refresh his/her SAS programming skills."

KAROL H. KATZ, M.S. Programmer Analyst Yale University School of Medicine

List o	of Programs	xi
	ice	
	rt This Book	
	t the Author	
	owledgments	
Par	t 1: Getting Started	1
Cha	pter 1: What Is SAS?	3
1.1	Introduction	
1.2	Getting Data into SAS	
1.3	A Sample SAS Program	
1.4	SAS Names	
1.5	SAS Data Sets and SAS Data Types	7
1.6	The SAS Windowing Environment, SAS Enterprise Guide, and the SAS University Edition	
1.7	Problems	8
Cha	pter 2: Writing Your First SAS Program	0
2.1	A Simple Program to Read Raw Data and Produce a Report	
2.2	Enhancing the Program	
2.3	More on Comment Statements	
2.4	How SAS Works (a Look inside the "Black Box")	
2.5	Problems	
Par	t 2: DATA Step Processing	. 23
Cha	pter 3: Reading Raw Data from External Files	25
3.1	Introduction	
3.2	Reading Data Values Separated by Blanks	
3.3	Specifying Missing Values with List Input	
3.4	Reading Data Values Separated by Commas (CSV Files)	
3.5	Using an alternative Method to Specify an External File	
3.6	Reading Data Values Separated by Delimiters Other Than Blanks or Commas	
3.7	Placing Data Lines Directly in Your Program (the DATALINES Statement)	30
3.8	Specifying INFILE Options with the DATALINES Statement	30
3.9	Reading Raw Data from Fixed Columns – Method 1: Column Input	31
3.10	Reading Raw Data from Fixed Columns – Method 2: Formatted Input	
3.11	Using a FORMAT Statement in a DATA Step versus in a Procedure	
3.12	Using Informats with List Input	
3.13	Supplying an INFORMAT Statement with List Input	
3.14	Using List Input with Embedded Delimiters	
3.15	Problems	38

Cha	pter 4: Creating Permanent SAS Data Sets	43
4.1	Introduction	
4.2	SAS Libraries – The LIBNAME Statement	43
4.3	Why Create Permanent SAS Data Sets?	45
4.4	Examining the Descriptor Portion of a SAS Data Set Using PROC CONTENTS	45
4.5	Listing All the SAS Data Sets in a SAS Library Using PROC CONTENTS	48
4.6	Viewing the Descriptor Portion of a SAS Data Set Using a Point-and-Click Approach	
4.7	Viewing the Data Portion of a SAS Data Set Using PROC PRINT	51
4.8	Using a SAS Data Set as Input to a DATA Step	52
4.9	DATA _NULL_: A Data Set That Isn't	53
4.10	Problems	55
Cha	pter 5: Creating Labels and Formats	57
5.1	Adding Labels to Your Variables	
5.2	Using Formats to Enhance Your Output	58
5.3	Regrouping Values Using Formats	
5.4	More on Format Ranges	
5.5	Storing Your Formats in a Format Library	
5.6	Permanent Data Set Attributes	
5.7	Accessing a Permanent SAS Data Set with User-Defined Formats	
5.8	Displaying Your Format Definitions	
5.9	Problems	
Cha	pter 6: Reading and Writing Data from an Excel Spreadsheet	71
6.1	Introduction	
6.2	Using the Import Wizard to Convert a Spreadsheet to a SAS Data Set	
6.3	Creating an Excel Spreadsheet from a SAS Data Set	
6.4	Using an Engine to Read an Excel Spreadsheet	
6.5	Using the SAS Output Delivery System to Convert a SAS Data Set to an	
	Excel Spreadsheet	
6.6	A Quick Look at the Import Utility in SAS Studio	80
6.7	Problems	
Cha	pter 7: Performing Conditional Processing	87
7.1	Introduction	
7.2	The IF and ELSE IF Statements	87
7.3	The Subsetting IF Statement	
7.4	The IN Operator	91
7.5	Using a SELECT Statement for Logical Tests	92
7.6	Using Boolean Logic (AND, OR, and NOT Operators)	93
7.7	A Caution When Using Multiple OR Operators	94
7.8	The WHERE Statement	95
7.9	Some Useful WHERE Operators	96
7.10	Problems	
Cha	apter 8: Performing Iterative Processing: Looping	99
8.1	Introduction	
8.2	DO Groups	
8.3	The Sum Statement	

8.4	The Iterative DO Loop	
8.5	Other Forms of an Iterative DO Loop	
8.6	DO WHILE and DO UNTIL Statements	
8.7	A Caution When Using DO UNTIL Statements	
8.8	LEAVE and CONTINUE Statements	
8.9	Problems	117
Chap	pter 9: Working with Dates1	21
9.1	Introduction	
9.2	How SAS Stores Dates	
9.3	Reading Date Values from Text Data	122
9.4	Computing the Number of Years between Two Dates	
9.5	Demonstrating a Date Constant	
9.6	Computing the Current Date	
9.7	Extracting the Day of the Week, Day of the Month, Month, and Year from a SAS Date	
9.8	Creating a SAS Date from Month, Day, and Year Values	
9.9	Substituting the 15th of the Month when the Day Value Is Missing	
9.10	Using Date Interval Functions	
9.11	Problems	
Char	oter 10: Subsetting and Combining SAS Data Sets	27
_		
10.1	Introduction	
10.2	Subsetting a SAS Data Set	
10.3	Creating More Than One Subset Data Set in One DATA Step	
10.4	Adding Observations to a SAS Data Set	
10.5	Interleaving Data Sets	
10.6	Combining Detail and Summary Data	
10.7	Merging Two Data Sets	
10.8	Omitting the BY Statement in a Merge	146
10.9	Controlling Observations in a Merged Data Set	
	More Uses for IN= Variables	
	When Does a DATA Step End?	
	Merging Two Data Sets with Different BY Variable Names	
	Merging Two Data Sets with Different BY Variable Data Types	
	One-to-One, One-to-Many, and Many-to-Many Merges	
10.15	Updating a Master File from a Transaction File	
10.16	Problems	158
Chap	oter 11: Working with Numeric Functions	61
11.1	Introduction	161
11.2	Functions That Round and Truncate Numeric Values	161
11.3	Functions That Work with Missing Values	163
11.4	Setting Character and Numeric Values to Missing	163
11.5	Descriptive Statistics Functions	164
11.6	Computing Sums within an Observation	166
11.7	Mathematical Functions	
11.8	Computing Some Useful Constants	168
11.9	Generating Random Numbers	
11.10	Special Functions	172
11.11	Functions That Return Values from Previous Observations	174

11.12	Sorting Within an Observations—a Game Changer
	ter 12: Working with Character Functions 181
	ter 12: Working with Character Functions 181
12.1	Introduction181
12.2	Determining the Length of a Character Value182
12.3	Changing the Case of Characters182
12.4	Removing Characters from Strings183
12.5	Joining Two or More Strings Together184
12.6	Removing Leading or Trailing Blanks185
12.7	Using the COMPRESS Function to Remove Characters from a String186
12.8	Searching for Characters189
12.9	Searching for Individual Characters190
12.10	Searching for Words in a String191
12.11	Searching for Character Classes192
12.12	Using the NOT Functions for Data Cleaning193
12.13	Extracting Part of a String194
12.14	Dividing Strings into Words196
12.15	Performing a Fuzzy Match197
12.16	Substituting Strings or Words199
12.17	Problems
Cha	oter 13: Working with Arrays 205
13.1	Introduction205
13.2	Setting Values of 999 to a SAS Missing Value for Several Numeric Variables206
13.3	Setting Values of NA and ? to a Missing Character Value207
13.4	Converting All Character Values to Propercase208
13.5	Using an Array to Create New Variables209
13.6	Changing the Array Bounds210
13.7	Temporary Arrays210
13.8	Loading the Initial Values of a Temporary Array from a Raw Data File211
13.9	Using a Multidimensional Array for Table Lookup212
	Problems215
Par	t 3: Presenting and Summarizing Your Data 217
	pter 14: Displaying Your Data 219
14.1	Introduction219
14.2	The Basics
14.2	Changing the Appearance of Your Listing
14.4	Changing the Appearance of Values222
	Controlling the Observations That Appear in Your Listing
14.5	
14.6	Adding Titles and Footnotes to Your Listing
14.7	Changing the Order of Your Listing
14.8	Sorting by More Than One Variable228
14.9	Labeling Your Column Headings
14.10	
14.11	
14.12	Adding the Number of Observations to Your Listing234

17.4 Using Formats to Label the Output			
Chapter 15: Creating Customized Reports         237           15.1         Introduction         237           15.2         Using PROC REPORT         238           15.3         Selecting the Variables to Include in Your Report         239           15.4         Comparing Detail and Summary Reports         240           15.5         Producing a Summary Report         241           15.6         Demonstrating the FLOW Option of PROC REPORT         242           15.7         Using Two Grouping Variables         243           15.8         Changing the Order of Variables in the COLUMN Statement         244           15.9         Changing the Order of Rows in a Report         245           15.0         Applying the ORDER Usage to Two Variables         246           15.10         Applying the ORDER Usage to Two Variables         246           15.11         Creating a Nonprinting Variable to Order a Report         247           15.12         Producing Report Breaks         248           15.13         Using a Nonprinting Variable with PROC REPORT         251           15.14         Computing a Character Variable in a COMPUTE Block         253           15.15         Orputing a Character Variable in a COMPUTE Block         253           15.16         Creating an ACRO	14.13	Listing the First n Observations of Your Data Set	234
15.1 Introduction       237         15.2 Using PROC REPORT       238         15.3 Selecting the Variables to Include in Your Report       239         15.4 Comparing Detail and Summary Reports       240         15.5 Producing a Summary Report       241         15.6 Demonstrating the FLOW Option of PROC REPORT       242         15.7 Using Two Grouping Variables       243         15.8 Changing the Order of Variables in the COLUMN Statement       244         15.9 Changing the Order of Rows in a Report       245         15.10 Applying the ORDER Usage to Two Variables       246         15.11 Creating a Multi-Column Report       247         15.12 Producing Report Breaks       248         15.13 Using a Nonprinting Variable to Order a Report       251         15.14 Computing a New Variable with PROC REPORT       252         15.15 Computing a Character Variable in a COMPUTE Block       253         15.16 Creating an ACROSS Variable with PROC REPORT       254         15.17 Using an ACROSS Usage to Display Statistics       255         15.18 Problems       256         Chapter 16: Summarizing Your Data       261         16.1 Introduction       261         16.2 PROC MEANS—Starting from the Beginning       261         16.3 Adding a BY Statement to PROC MEANS       264			
15.2       Using PROC REPORT       238         15.3       Selecting the Variables to Include in Your Report       239         15.4       Comparing Detail and Summary Reports       240         15.5       Producing a Summary Report       241         15.6       Demonstrating the FLOW Option of PROC REPORT       242         15.7       Using Two Grouping Variables       243         15.8       Changing the Order of Variables in the COLUMN Statement       244         15.9       Changing the Order of Rows in a Report       245         15.10       Applying the ORDER Usage to Two Variables       246         15.11       Creating a Multi-Column Report       245         15.12       Producing Report Breaks       248         15.13       Using a Nonprinting Variable to Order a Report       251         15.14       Computing a New Variable with PROC REPORT       252         15.15       Computing a Character Variable in a COMPUTE Block       253         15.16       Computing a Character Variable in a COMPUTE Block       253         15.17       Using an ACROSS Usage to Display Statistics       255         15.18       Problems       256         Chapter 16: Summarizing Your Data       261         16.1       Introduction			
15.3       Selecting the Variables to Include in Your Report.       239         15.4       Comparing Detail and Summary Reports.       240         15.5       Producing a Summary Report       241         15.6       Demonstrating the FLOW Option of PROC REPORT       242         15.7       Using Two Grouping Variables       243         15.8       Changing the Order of Variables in the COLUMN Statement       244         15.9       Changing the Order of Rows in a Report       245         15.0       Applying the ORDER Usage to Two Variables       246         15.10       Creating a Multi-Column Report       247         15.12       Producing Report Breaks       248         15.13       Using a Nonprinting Variable to Order a Report       251         15.14       Computing a New Variable with PROC REPORT       251         15.15       Computing a Character Variable in a COMPUTE Block       253         15.16       Creating an ACROSS Variable with PROC REPORT       254         15.17       Using an ACROSS Usage to Display Statistics       255         15.18       Problems       255         15.19       Problems       256         15.10       Introduction       261         16.2       Problems       251 <td></td> <td></td> <td></td>			
15.4   Comparing Detail and Summary Reports			
15.5   Producing a Summary Report   241			
15.6   Demonstrating the FLOW Option of PROC REPORT   242			
15.7       Using Two Grouping Variables       243         15.8       Changing the Order of Variables in the COLUMN Statement.       224         15.9       Changing the Order of Rows in a Report       245         15.10       Applying the ORDER Usage to Two Variables       246         15.11       Creating a Multi-Column Report       247         15.12       Producing Report Breaks       248         15.13       Using a Nonprinting Variable to Order a Report       251         15.14       Computing a New Variable with PROC REPORT       252         15.15       Computing a Character Variable in a COMPUTE Block       253         15.16       Creating an ACROSS Variable with PROC REPORT       254         15.17       Using an ACROSS Usage to Display Statistics       255         15.18       Problems       255         Chapter 16: Summarizing Your Data       261         16.2       PROC MEANS—Starting from the Beginning       261         16.3       Adding a BY Statement to PROC MEANS       263         16.4       Using a CLASS Statement with PROC MEANS       264         16.5       Applying a Format to a CLASS Variable       265         16.6       Deciding between a BY Statement and a CLASS Statement       266         16.7			
15.8       Changing the Order of Rows in a Report       245         15.10       Applying the Order of Rows in a Report       246         15.11       Creating a Multi-Column Report       247         15.12       Producing Report Breaks       248         15.13       Using a Nonprinting Variable to Order a Report       251         15.14       Computing a New Variable with PROC REPORT       252         15.15       Computing a Character Variable in a COMPUTE Block       253         15.16       Creating an ACROSS Variable with PROC REPORT       254         15.17       Using an ACROSS Usage to Display Statistics       255         15.18       Problems       256         Chapter 16: Summarizing Your Data       261         16.1       Introduction       261         16.2       PROC MEANS — Starting from the Beginning       261         16.3       Adding a BY Statement to PROC MEANS       263         16.4       Using a CLASS Statement with PROC MEANS       264         16.5       Applying a Format to a CLASS Variable       265         16.6       Deciding between a BY Statement and a CLASS Statement       266         16.7       Creating Summary Data Sets Using PROC MEANS       266         16.7       Creating Summary Data			
15.9       Changing the Order of Rows in a Report       245         15.10       Applying the ORDER Usage to Two Variables       246         15.11       Creating a Multi-Column Report       247         15.12       Producing Report Breaks       248         15.13       Using a Nonprinting Variable to Order a Report       251         15.14       Computing a New Variable with PROC REPORT       252         15.15       Computing a Character Variable in a COMPUTE Block       253         15.16       Creating an ACROSS Variable with PROC REPORT       254         15.17       Using an ACROSS Usage to Display Statistics       255         15.18       Problems       256         Chapter 16: Summarizing Your Data       261         16.1       Introduction       261         16.2       PROC MEANS—Starting from the Beginning       261         16.3       Adding a BY Statement to PROC MEANS       263         16.4       Using a CLASS Statement with PROC MEANS       264         16.5       Decling between a BY Statement and a CLASS Statement       266         16.7       Creating Summary Data Sets Using PROC MEANS       266         16.8       Decling between a BY Statement and a CLASS Statement       266         16.9       Asking
