<i>Preface</i>	ix
<i>List of abbreviations</i>	xi
<i>Table of cases</i>	xv
1 Introduction: regulation of biotechnology, between anxieties and trust in scientific progress	1
1 Modern biotechnology from an international regulatory perspective	1
2 Opportunities and risks of biotechnology	5
2.1 Biotechnology and agriculture ('green' biotechnology)	5
2.2 Biotechnology and health ('red' biotechnology)	10
2.3 Reproductive medicine	13
2.4 Biotechnology in industrial processes ('white' biotechnology)	14
2.5 Biotechnology and environmental protection ('grey' biotechnology)	15
2.6 Biotechnology and the exploitation of marine resources ('blue' biotechnology)	15
2 Law and ethics: an intriguing interplay	17
1 The interaction between legal and ethical standards	17
2 The impact of religious concepts: clash of cultural approaches?	18
3 Neutrality of the secular State	21
4 Common standards of rationality: consistency and proportionality as legal and ethical values	22
5 Selection of empirical criteria for value judgments and differentiations	26
6 The difficult quest for international standards of bioethics: the clash of socio-culturally entrenched values	26
7 Turning ethics into international law: activist treaty interpretation	29

3	Risks, perceptions and the law: regulatory approaches to risk	32
1	Possible regulatory approaches: socio-cultural influences	32
2	Risk assessment and risk management	32
3	Variance of risk perceptions: reliance on scientific evidence, popular risk perceptions of genetic engineering and the socio-economic context	34
4	The regulation of genetic engineering from a transatlantic perspective in relation to marketing biotech products, including labelling	37
4.1	The 'product approach' ('vertical approach')	38
4.2	The 'process approach' ('horizontal approach')	40
4.3	New methods of genetic engineering	45
5	Socio-economic considerations in international and EU instruments	49
4	The biotech challenge to human dignity, life and freedom of choice: human rights	51
1	Treaties and other international instruments addressing human rights	51
2	Human dignity: a guiding light for the biotech age or Trojan horse for ideological campaigns?	54
3	Bioethical dimension of specific human rights	57
3.1	Right to life	57
3.2	Right to health	60
3.2.1	The right to health in international human rights instruments: an overview	60
3.2.2	The right to health in the specific context of medical research	62
(a)	The Nuremberg Code of 1947	62
(b)	The Oviedo Convention of 1997 and the Additional Protocol on Biomedical Research of 2005	63
(c)	Protection beyond the framework of the Oviedo Convention	64
3.3	Right to adequate food	64

3.4	Right to personal autonomy and self-determination: the principle of informed consent	66
3.4.1	Meaning and scope of informed consent in international Conventions and other instruments	66
3.4.2	Informed consent and the collection of genetic data	69
3.4.3	The collection of genetic data from populations and community consent	69
3.5	Right to privacy and information	71
3.6	Right to family life	73
3.7	Biotechnology and non-discrimination	75
3.8	Equal access to the benefits of biotechnology	77
5	From test tube babies to human clones: salient issues in the international law of biomedicine	80
1	Reproductive medicine and IVF	80
2	Use of human embryos for research and therapeutic purposes	82
3	Somatic gene therapy, other advanced biomedical therapies and intervention in the germline	88
4	Human cloning	95
6	GMOs, crops and precaution: biotechnology and international protection of the environment	101
1	Preliminary remarks	101
2	The precautionary principle	102
3	Convention on biological diversity	105
4	Cartagena Protocol on Biosafety (2000)	107
5	Nagoya–Kuala Lumpur Supplementary Protocol on Liability and Redress (2010)	109
6	The coexistence of different forms of agriculture (organic, conventional and GM agriculture)	110
7	Combating biopiracy: access to genetic resources	114
1	Preliminary remarks	114
2	Convention on Biological Diversity	115
3	Nagoya Protocol on Access and Benefit Sharing	119
4	International Treaty on Plant Genetic Resources for Food and Agriculture (2001) (FAO Seed Treaty)	120
5	The rights of indigenous communities and biological resources	121

8	Phantom risks and legitimate concerns: biotechnology and international trade law	125
1	Biotechnology and international trade law: a complex relationship	125
2	The General Agreement on Tariffs and Trade	126
2.1	Non-discrimination: the determination of 'likeness' between biotech and conventional products	127
2.2	Biotech products and the justifications of trade restrictions	130
2.2.1	The public morals exception	131
2.2.2	The public health exception	132
2.2.3	'Socio-economic considerations'	134
3	The Agreement on the Application of Sanitary and Phytosanitary Measures	135
3.1	The requirement of scientific evidence	137
3.2	The requirement of non-discrimination	139
3.3	Procedural requirements	140
4	The Agreement on Technical Barriers to Trade	140
5	Regional trade agreements (CETA AND CPTTP)	144
9	Inventors' claims to life: intellectual property rights and biotechnological inventions	147
1	Preliminary remarks	147
2	TRIPS Agreement	150
2.1	Article 27: scope of patentability	151
2.2	Compulsory licensing	152
3	EU law: Directive 98/44/EC on Biotechnological Inventions	156
4	Patents on animals, plants and other living organisms	158
5	Patents on DNA sequences	161
5.1	Patentability of DNA sequences	161
5.2	Functional limitation of patents on DNA sequences	166
6	Patents involving an 'essentially biological process'	167
7	Patents and ethics: exceptions on the ground of public policy	168
8	Traditional (indigenous) knowledge	172
10	Conclusion: legal values, individual rights and democratic choices in a pluralist world	174
	<i>Index</i>	179
