Mini-Course

J.F. Cariñena, J. Clemente-Gallardo and G. Marmo

Introduction to Quantum Mechanics and the Quantum-Classical transition	3
--	---

Invited lectures

E.A. Bergshoeff, M. de Roo, S.F. Kerstan, A. Kleinschmidt and F. Riccioni

The Symmetries of M-Theory	45
--------------------------------------	----

M. Brozos-Vázquez, P. Gilkey, E. García-Río and R. Vázquez-Lorenzo

Completeness, Ricci blowup, the Osserman and the conformal Osserman condition for Walker signature (2, 2) manifolds	57
---	----

R.L. Fernandes

The Symplectization Functor	67
---------------------------------------	----

A. Swann

T is for Twist	83
--------------------------	----

I. Vaisman

Generalized Complex Structures in Classical Terms	95
---	----

J.C. Wood

Infinitesimal deformations of harmonic maps	105
---	-----

Communications

J. Brajerčík and D. Krupka

Cohomology and local variational principles	119
---	-----

R. Ferreira Pérez

Local anomaly cancellation and equivariant cohomology of jet bundles .	125
--	-----

A. Fino and S. Chiossi

Nearly integrable $SO(3)$ structures	131
--	-----

M.A. González León and J.L. Hernández Pastora	
Dynamical and Geometrical Stability on Lorentzian Mechanical Systems	137
K. Grabowska and P. Urbański	
AV-differential geometry and calculus of variations	144
S. Izumiya and M.C. Romero Fuster	
The total lightcone Gauss-Kronecker curvature on codimension two space-like submanifolds in Lorentz space	153
I. Kolář	
On the formal bracket of Lie algebroids	161
O. Krupková	
The canonical distribution in nonholonomic mechanics and field theory	167
E. Miranda	
Some rigidity results for Symplectic and Poisson group actions	177
A. Tomassini and L. Vezzoni	
Some Families of Special Generalized Calabi-Yau Structures	184
A. Viña	
Lower Bounds for $\sharp\pi_1(\text{Ham}(M))$	190

Posters

L. Abrunheiro, M. Camarinha and J. Clemente-Gallardo	
Geometry of a second order optimal control problem. Riemannian cubic polynomials.	199
E. Aguirre, V. Fernández Mateos and J. Lafuente	
On the Conformal Geometry of Transverse Riemann-Lorentz Manifolds	205
N. Aizawa, R. Chakrabarti, S.S. Naina Mohammed, and J. Segar	
Representations of Quantum Supergroups and Basic Hypergeometric Functions	212
K. Arslan, C. Murathan, K. Olszak and Z. Olszak	
On almost Hermitian structures induced on leaves of the canonical foliation on certain almost contact metric manifolds	218
M. Barbero-Liñán, A. Echeverría-Enríquez, D. Martín de Diego, M.C. Muñoz-Lecanda and N. Román-Roy	
Skinner-Rusk formalism for optimal control	225
E. Bibbona, L. Fatibene and M. Francaviglia	
Gauge-natural PVPs, Superpotentials and Trivial Lagrangians	231

A.H. Bilge, S. Koçak and S. Uğuz	
Construction of Canonical Bases for Real Representations of Clifford Algebras	237
R. Bos	
Geometric quantization of Hamiltonian actions of Lie algebroids	245
G. Calvaruso and R.A. Marinosci	
Homogeneous geodesics of three-dimensional Lorentzian Lie groups . . .	252
A. Cañete	
The isoperimetric problem in surfaces of revolution	260
J.M. Casas	
On Cohomology of Lie–Rinehart Algebras	266
J. Fastenakels	
Constant angle surfaces	272
A. Fino and S. Chiossi	
G_2 geometry, solvable Lie groups and (super)symmetries	277
E. Fiorani and G. Sardanashvily	
Noncommutative integrability on noncompact invariant manifolds . . .	282
M. Grebenyuk	
On Normalization of Surfaces in Non-Euclidean Space	287
S. Haesen, F.J. Palomo and A. Romero	
Null congruence spacetimes	293
I. Hinterleitner	
Conformally-projective harmonic diffeomorphisms of equidistant manifolds	298
J. Mikeš and M. Škodová	
Concircular vector fields on compact manifolds with affine connections .	304
I.M. Mladenov and J. Oprea	
On some deformations of the mylar balloon	310
A. De Nicola and W.M. Tulczyjew	
A note on a variational formulation of electrodynamics	316
J.M. Nunes da Costa and F. Petalidou	
Characteristic foliation of twisted Jacobi manifolds	324
M. Palese and E. Winterroth	
Variational derivatives and Noether identities in gauge-natural theories	330
M.M. Rodríguez	
Minimal surfaces with genus zero	337

M.E. Rosado María

Invariance of second order Covariant Hamiltonians on the bundle of linear frames	343
--	-----

C. Rosales

The isoperimetric problem in the Heisenberg group $\mathbb{H}^1$	349
--	-----

I. Salavessa

Residue Formulas for Minimal Submanifolds	355
---	-----

J. Van der Veken

Parallel and higher order parallel surfaces in three-dimensional homogeneous spaces	361
---	-----
