Preface	V
Bibliography	XI
Abbreviations	XXIII
I. Introduction	1
II. Technological Developments and Standardization	5
A. Expansion of New Infrastructures	5
B. Technological Standardization	8
1. Origins of and Organizations for Standardization	8
2. Benefits of Standardization	9
3. Challenges of Standardization	10
4. Standardization for New Network Infrastructures	11
III. Foundations of Law and Regulatory Models	13
A. Law and Regulation as Societal Tools	13
1. Structural and Open System	13
2. Relative Autonomy and Flexibility of Law	14
3. Substance and Change of Law	15
4. Regulatory Strategies and Quality	16
B. First Generation Regulatory Models	17
1. Lex Informatica	18
2. Code as Regulator	19
3. Formalized Standards and Networks	21
4. Informal Law-making	24
5. Normative Expectations	26
C. Second Generation Regulatory Models	27
1. Polycentric Regulation	28

2. Hybrid and Mesh Regulation	29
3. Global Legal Pluralism Approach	31
4. New Experimentalist Model	31
D. Impacts of Theories on the Normative Framework	33
1. Conversion of Theoretical Concepts into Policies and Rule-making	33
2. Digital Constitutionalism	36
3. Transnationalism	37
4. Cosmopolitanism	37
IV. Substantive Governance Principles	41
A. Legitimacy and Participation	41
1. Legitimacy: Traditional Foundation and Understanding	41
1.1. Notion and Contents	41
1.2. Normative Character	42
1.3. Concretization for Internet Governance	43
2. Participation: Multistakeholderism as New Concept	44
2.1. Notion and Foundation of Multistakeholderism	45
2.2. Forms and Legal Framework of Decision-Making	46
2.3. Concretization for Internet Governance	49
2.4. Participation Issues in ICANN	52
2.5. Participation in Other Internet Governance Bodies	56
B. Transparency	61
1. Notion and Types of Transparency	61
2. Enhancing Transparency for the Future of Internet Governance	63
2.1. Transparency Issues in ICANN	63
2.2. Transparency in Other Internet Governance Bodies	67
C. Accountability	70
1. Notion and Elements of Accountability	70
2. Enhancing Accountability for the Future of Internet Governance	71
2.1. Accountability Issues in ICANN	71

2.2. <u>Accountability in Other Internet Governance Bodies</u>	77
D. <u>Analysis: Taking Stock and Looking Ahead</u>	79
<u>V. Revitalization of International Legal Concepts</u>	83
A. <u>Infrastructural Perspectives</u>	83
1. <u>Internet Integrity and Stability of Cyberspace</u>	83
2. <u>Cybersecurity Framework</u>	84
3. <u>Avoidance of Fragmentation</u>	87
B. <u>Realization of Common Values</u>	89
1. <u>Duty of Co-operation</u>	90
2. <u>Global Public Goods</u>	92
3. <u>Shared Spaces</u>	93
4. <u>Due Diligence</u>	94
5. <u>State Responsibility</u>	95
6. <u>Further Concepts</u>	96
C. <u>Concluding Remarks</u>	97
<u>VI. Outlook</u>	99
