

# Abbreviated Contents

---

Chapter 1. Structure and Bonding	1
Chapter 2. Dative (L-Type) Ligands	27
Chapter 3. Covalent (X-Type) Ligands Bound Through Metal–Carbon and Metal–Hydrogen Bonds	85
Chapter 4. Covalent (X-Type) Ligands Bound Through Metal–Heteroatom Bonds	147
Chapter 5. Ligand Substitution Reactions	217
Chapter 6. Oxidative Addition of Nonpolar Reagents	261
Chapter 7. Oxidative Addition of Polar Reagents	301
Chapter 8. Reductive Elimination	321
Chapter 9. Migratory Insertion Reactions	349
Chapter 10. Elimination Reactions	397
Chapter 11. Nucleophilic Attack on Coordinated Ligands	417
Chapter 12. Electrophilic Attack on Coordinated Ligands	453
Chapter 13. Metal–Ligand Multiple Bonds	481
Chapter 14. Principles of Catalysis (Written with Prof. Patrick J. Walsh)	539
Chapter 15. Homogeneous Hydrogenation	575
Chapter 16. Hydrofunctionalization and Oxidative Functionalization of Olefins	667
Chapter 17. Catalytic Carbonylation	745
Chapter 18. Catalytic C–H Functionalization	825
Chapter 19. Transition Metal-Catalyzed Coupling Reactions	877
Chapter 20. Allylic Substitution	967
Chapter 21. Metathesis of Olefins and Alkynes	1015
Chapter 22. Polymerization and Oligomerization of Olefins	1047
Contributor Listing	1101
Index	1103
