

Abbreviated Contents

Chapter 1. Structure and Bonding	1	1.1. π-Bonding in Organotransition Metal Compounds	19
Chapter 2. Dative (L-Type) Ligands	27	1.1.1. π-Bonding of CO and its Analogs	19
Chapter 3. Covalent (X-Type) Ligands Bound Through Metal–Carbon and Metal–Hydrogen Bonds	85	1.1.2. π-Bonding of Carbene and Carbyne Complexes	20
Chapter 4. Covalent (X-Type) Ligands Bound Through Metal–Heteroatom Bonds	147	1.1.3. π-Bonding in Olefin Complexes	21
Chapter 5. Ligand Substitution Reactions	217	1.1.4. π-Bonding and Other Unsaturated Ligands	22
Chapter 6. Oxidative Addition of Nonpolar Reagents	261	1.2. π-Donor Ligands	22
Chapter 7. Oxidative Addition of Polar Reagents	301	1.3. References and Notes	26
Chapter 8. Reductive Elimination	321	2. Dative Phosphorus Ligands	27
Chapter 9. Migratory Insertion Reactions	349	2.1. Introduction	27
Chapter 10. Elimination Reactions	397	2.2. Carbon Monoxide and Related Ligands	27
Chapter 11. Nucleophilic Attack on Coordinated Ligands	417	2.2.1. Properties of Free Carbon Monoxide	27
Chapter 12. Electrophilic Attack on Coordinated Ligands	453	2.3. Carbonyl Complexes	28
Chapter 13. Metal–Ligand Multiple Bonds	481	2.3.1. Bonding: Introduction of	28
Chapter 14. Principles of Catalysis (Written with Prof. Patrick J. Walsh)	539	2.3.2. Bonding in Terminal	28
Chapter 15. Homogeneous Hydrogenation	555	2.3.3. Reaction Data for	28
Chapter 16. Hydrofunctionalization and Oxidative Functionalization of Olefins	667	2.3.4. Steric and Electronic Properties	36
Chapter 17. Catalytic Carbonylation	745	2.3.5. Pathways for the Decomposition of Phosphorus	39
Chapter 18. Catalytic C–H Functionalization	825	2.3.6. NMR Spectroscopic Properties of	40
Chapter 19. Transition Metal-Catalyzed Coupling Reactions	877	2.3.7. Heavier Congeners of Phosphorus Ligands	41
Chapter 20. Allylic Substitution	967	2.4. Classes of Free and Coordinated Carbenes	41
Chapter 21. Metathesis of Olefins and Alkynes	1015	2.4.1. Properties of Free Carbenes	41
Chapter 22. Polymerization and Oligomerization of Olefins	1047	2.4.2. Properties of Carbene Complexes	41
Contributor Listing	1101	2.4.3. Bonding of Carbenes	44
Index	1103	2.4.4. Spectroscopic Characteristics of Carbene	45
		2.5. Transition Metal Carbyne Complexes	46
		2.5.1. Bonding and Structure of Carbyne	46
		2.5.2. Spectroscopic Characteristics of Carbyne	46
		2.6. Organic Ligands Bound Through more than	47
		One Atom	47
		2.6.1. Olefin Complexes	47
		2.6.1.1. Stability of Metal–Olefin Complexes	47
