About the Authors xxxix

PART I LINKING RESEARCH, THEORY, AND PRACTICE: THE FOUNDATIONS

1

- | | |
|--|---|
| 1 Nutrition Education for Today's Complex World 3 | 4 Enhancing Motivation and Empowerment for Behavior Change and Action 102 |
| 2 Determinants of Food Choice and Dietary Change: Implications for Nutrition Education 32 | 5 Facilitating the Ability to Change Behavior and Take Action 137 |
| 3 An Overview of Nutrition Education: Motivation, Ability, and Support for Successful Behavior Change 65 | 6 Creating Environmental Supports for Behavior Change 180 |

PART II USING RESEARCH AND THEORY IN PRACTICE: DESIGNING THEORY-BASED NUTRITION EDUCATION

215

- | | |
|---|--|
| 7 A Systematic Approach to Designing Nutrition Education: The DESIGN Procedure 217 | 12 Generating Educational Plans—A Focus on Enhancing Motivation for Behavior Change and Action: Step 5 308 |
| 8 Deciding Behavior Change Goals of the Intervention: Step 1 235 | 13 Generating Educational Plans—A Focus on Facilitating the Ability to Change Behavior and Take Action: Step 5 342 |
| 9 Exploring Determinants of Intervention Behavior Change Goals: Step 2 257 | 14 Nail Down the Evaluation Plan: Step 6 373 |
| 10 Selecting Theory and Clarifying Intervention Philosophy and Content: Step 3 273 | 15 Using the Nutrition Education DESIGN Procedure to Create Environmental Supports for Behavior Change Goals 404 |
| 11 Indicating Objectives: Translating Behavioral Theory into Educational Objectives: Step 4 291 | |

PART III RESEARCH AND THEORY IN ACTION: DELIVERING NUTRITION EDUCATION IN PRACTICE

433

- | | |
|---|---|
| 16 Delivering Nutrition Education Effectively in Group Settings 435 | 18 Working with Diverse Age, Cultural, and Literacy Population Groups 512 |
| 17 Media Supports and Other Channels for Nutrition Education 464 | 19 Nutrition Educators as Change Agents in the Environment 556 |

PART IV NUTRITION EDUCATION DESIGN PROCEDURE WORKBOOKS AND CASE STUDY 573

Nutrition Education DESIGN Procedure Workbook:
Educational Plans 575

Nutrition Education DESIGN Procedure
Workbook: Educational Plans – Abbreviated
Version 598

Nutrition Education DESIGN Procedure Workbook:
Environmental Support Plans 600

Glossary 684

Index 693

Nutrition Education DESIGN Procedure Case Study:
Educational Plans 617

Nutrition Education DESIGN Procedure Case Study:
Environmental Support Plans 661

PART I LINKING RESEARCH, THEORY, AND PRACTICE: THE FOUNDATIONS

1

1 Nutrition Education for Today's Complex World	3	A Contemporary Definition of Nutrition Education	12
Overview	3	Is "Nutrition Education" an Accurate Term?	14
Chapter Outline	3	Summary of a Contemporary Definition of Nutrition Education: The Three Components	15
Learning Objectives	3	Vision of Professional Associations	16
Introduction	4	Nutrition Education Effectiveness	17
Why Nutrition Education?	4	What Do Nutrition Educators Do? Settings, Audiences, and Scope for Nutrition Education	18
The Ultimate Goal Is to Improve Health and Well-being	4	Settings: Where Is Nutrition Education Provided?	18
Dietary and Physical Activity Patterns Are Not Optimal	6	Audiences for Nutrition Education	20
Our Current Food System Is Not Good for the Planet	7	Scope of Nutrition Education	21
Challenging Food Choice Environment	7	Nutrition Education Involves Many Disciplines	22
Complex Information Environment	7	Food and Nutrition Science Is Needed to Choose the Behavioral Focus and Content of the Intervention	23
Consumer Bewilderment and Concern	8	Psychology Is Needed to Provide Guidance on How to Motivate and Facilitate Behavior Change	23
The Challenge of Educating People About Eating Well	8	Education Theory Is Needed for Effective Design of Group Sessions, Interventions, and Materials	23
Biological Influences: Do We Have Body Wisdom?	9	Communication Principles Are Needed for the Effective Delivery of the Sessions, or Intervention	23
Cultural and Social Influences	9		
Family and Psychological Factors	10		
Sense of Empowerment: Individual and Community	10		
Material Resources and the Environmental Context	11		
Marketing, Social Structures, and Policy	11		

Collaboration Is Needed to Provide Environmental Supports for Behavior Change	23	Nutrition Education Addressing Person-Related Motivating and Facilitating Determinants	51
Skills of the Nutrition Educator	23	Nutrition Education Addressing Social and Environmental Determinants	52
Focus and Scope of This Book	24	Implications for Competencies and Skills Needed by Nutrition Educators	54
Purpose and Overview of This Book	24	The Society for Nutrition Education and Behavior's Competencies for Nutrition Educators	55
Learning a New Vocabulary	26	Academy of Nutrition and Dietetics Competencies	56
Overview of the Book	26	Chapter Summary	57
Questions and Activities	27	Biology and Personal Experience with Food	57
References	27	Person-Related Determinants	57
2 Determinants of Food Choice and Dietary Change: Implications for Nutrition Education	32	Social/Environmental Determinants	57
Overview	32	Knowledge and Skills Are Not Enough	57
Chapter Outline	32	Consequences for the Skills of Nutrition Educators	57
Learning Objectives	32	Questions and Activities	58
Determinants of Food Choice and Diet-Related Behavior: An Overview	33	References	58
Food-Related Determinants:		3 An Overview of Nutrition Education: Motivation, Ability, and Support for Successful Behavior Change	65
Biology and Experience	33	Overview	65
Biologically Determined Behavioral Predispositions	34	Chapter Outline	65
Experience with Food	35	Learning Objectives	65
Learning from Social-Affective Context: Social Conditioning	37	Introduction: What Makes Nutrition Education Successful at Changing Behavior	66
Summary of the Influence of Individual Experience with Food	41	Elements Contributing to Nutrition Education Success	67
Person-Related Determinants	41	Element of Success 1: Focusing on Behavior Change and Action	68
Intrapersonal Determinants	42	Focusing on Specific Behaviors or Actions Is Crucial for Success	68
Interpersonal Determinants	44	Element of Success 2: Addressing the Influences or Determinants of Behavior Change and Action	69
Social and Environmental Determinants	44	Motivators of Behavior Change	71
Food Environment	44		
Economic Environment	47		
Information Environment	48		
What Does All This Mean for Nutrition Educators?	50		
Knowledge or Nutrition Literacy Is Not Enough	50		
Nutrition Education Addressing Food-Related Motivating and Facilitating Determinants	51		

Facilitators of Change: “How-to”		Case Examples	93
Knowledge and Skills	72	FRESHFARM FoodPrints	93
Creating a Supportive Environment	73	Chapter Summary	96
Sisters Together	73	Element of Success 1: Focusing	
Determinants in Ecological		on Behavior Change and Actions	96
and Food History Context	74	Element of Success 2: Addressing	
The Importance of Culture	75	the Influences or Determinants	
Element of Success 3: Using Theory		of Behavior Change or Action	96
as a Guide for Nutrition Education	76	Element of Success 3: Use Theory as	
A Brief History of Using Theory		a Guide for Nutrition Education	97
for Behavioral Change	77	Element of Success 4: Use Theory-	
“Theory” in Outline	77	and Evidence-Based Behavior	
Theories Help Us Organize		Change Strategies to Design Nutrition	
Determinants to First Motivate		Education Activities	97
and Then Facilitate Action	77	Element of Success 5: Address Multiple	
An Analogy: The Rider and		Influences on Behavior Change with	
the Elephant	78	Sufficient Duration and Intensity—a	
Case Study: What Influences the		Socio-Ecological Framework	97
Behaviors of Alicia, Maria, and Ray?	79	Questions and Activities	97
Theory as a Structured Guide or Tool	81	References	98
Making Theory Explicit Is Extremely		4 Enhancing Motivation and	
Useful	82	Empowerment for Behavior Change	
Relationships Among Research,		and Action	102
Theory, and Practice	83	Overview	102
Key Features of Social Psychological		Chapter Outline	102
Theory	83	Learning Objectives	103
Basic Social Psychological Theory	85	Nutrition Education for Enhancing	
Element of Success 4: Using Theory-		Motivation and Empowerment:	
and Evidence-Based Behavior Change		Focus on Why to Take Action	103
Strategies to Design Nutrition Education		A Deeper Look at Theories of Motivation	
Activities	88	for Nutrition Education Success	104
Element of Success 5: Addressing Multiple		The Health Belief Model	105
Influences on Behavior Change with		Determinants of Behavior Change	
Sufficient Duration and Intensity—A		or Action According to the Model	105
Socio-Ecological Framework	90	Evidence From Research	106
Changing Behaviors Through		Take-Home Message About	
Gatekeepers	91	the Health Belief Model	108
Duration and Intensity of Intervention	91	Using the Health Belief Model in Nutrition	
Putting It All Together: Conceptual		Education to Enhance Motivation and	
Framework for Conducting		Activate Audiences	108
Nutrition Education	91	Increase Awareness of Risk, Concern,	
The Three Conceptual Components		or Need	109
of Nutrition Education	91		

Use Threat or Risk Effectively in Communications	109
Address Perceived Benefits and Barriers	109
Enhance Self-Efficacy	109
Provide Cues to Action	110
Examples of Interventions Using the Health Belief Model	110
The Case of Alicia: Using the Health Belief Model as a Tool	112

Theory of Planned Behavior:

The Reasoned Action Approach	115
Behavior	115
Behavioral Intention	117
Attitudes	117
Outcome Expectations—Beliefs About Expected Outcomes of Behavior	117
Conflicting Attitudes: Ambivalence	118
Perceived Norms	118
Perceived Behavioral Control/Self-Efficacy	119
The Behavioral Intention to Behavior Link	119

Extensions of the Theory of Planned

Behavior: A Focus on Additional Beliefs	119
Personal Moral Norms	119
Self-Depictions: Self-Identity and Self-Representations	120
Extensions of Outcome Expectations/Expected Outcomes Behavior:	
A Focus on Feelings and Emotions	121
From “I Intend” to “I Will”: The Importance of Implementation Intentions	121
Intentions Versus Habit	122
Understanding Jason and His Friends	122
Evidence for the Theory From Research and Intervention Studies	122
Global Values as Motivators of Food Choice and Dietary Behavior Change	124
Take-Home Message About the Theory of Planned Behavior and Its Extensions	125

Using the Theory of Planned Behavior in Nutrition Education to Enhance Motivation and Activate Audiences **125**

Designing Messages to Increase Beliefs About Expected Outcomes of Behavior and Attitudes	125
Enhancing Positive Feelings	127
Exploring Social Norms and Social Expectations	127
Identifying Personal Moral Norms	127
Increasing Self-Efficacy and Control: Overcoming Barriers and Difficulties	127
Exploring Beliefs About the Self	128
Recognizing Habits and Cultural Traditions	128
Making Decisions and Resolving Ambivalences	128
The Case of Maria: Nutrition Education Using the Theory of Planned Behavior	128

Chapter Summary **131**

The Health Belief Model	131
The Theory of Planned Behavior/Reasoned Action Approach and Its Extensions	131

Selecting Which Theory to Use for Enhancing Motivation **132**

Questions and Activities	133
References	133

5 Facilitating the Ability to Change Behavior and Take Action **137**

Overview	137
Chapter Outline	137
Learning Objectives	137
Nutrition Education to Facilitate the Ability to Change Behavior: Focus on How to Take Action	138
A Deeper Look at Theories for Facilitating Behavior Change for Nutrition Education Success	138

Social Cognitive Theory 138

Personal Motivational Determinants: A Focus on Human Agency and Empowerment	141
---	-----

Determinants That Facilitate Behavior Change	142
---	-----

Environmental Factors	145
-----------------------	-----

Evidence from Research and Intervention Studies	145
--	-----

Resources for Facilitating Behavior Change	147
---	-----

Theory-Based Interventions Involving Group Sessions	147
--	-----

Theory-Based Interventions Involving Media	148
---	-----

Take-Home Message About Social Cognitive Theory	148
--	-----

Using Social Cognitive Theory in Nutrition Education to Facilitate Behavior Change 150

Outcome Expectations	151
----------------------	-----

Self-Efficacy	152
---------------	-----

Behavioral Capability: Building Food- and Nutrition-Related Skills	152
---	-----

Strengthening Self-Regulation/ Self-Directed Behavior Change Skills	153
--	-----

Maintaining Change Through Skills in Self-Regulation or Self-Directed Change	155
--	-----

Environmental Supports for Change	158
-----------------------------------	-----

The Case of Ray: Nutrition Education Using Social Cognitive Theory	159
---	-----

The Health Action Process Approach: Building on Social Cognitive Theory 161

Motivational Phase	162
--------------------	-----

Moving from Intention to Behavior: Action Planning and Coping Planning	163
--	-----

Volitional or Action Phase	163
----------------------------	-----

Barriers and Resources	164
------------------------	-----

Stages of Change in the Health Action Process Approach	165
---	-----

Evidence from Research and Intervention Studies	166
--	-----

Take-Home Message About the Health Action Process Approach	170
---	-----

Using the Health Action Process Approach in Nutrition Education to Facilitate Behavior Change 171

Designing Activities for the Phases of Behavior Change	171
---	-----

Focusing on Self-Efficacy and Planning	172
---	-----

Addressing Stage of Change	172
----------------------------	-----

Chapter Summary 172

Social Cognitive Theory	172
-------------------------	-----

Health Action Process Approach	172
--------------------------------	-----

Selecting Which Theory to Use to Facilitate Behavior Change 172

Summary Model and Framework for Nutrition Education Involving Both Motivators and Facilitating Determinants	174
--	-----

Nutrition Education to Enhance Motivation and Facilitate Behavior Change and Action	174
---	-----

Questions and Activities	176
--------------------------	-----

References	176
------------	-----

6 Creating Environmental Supports for Behavior Change 180

Overview	180
----------	-----

Chapter Outline	180
-----------------	-----

Learning Objectives	180
---------------------	-----

Creating Environmental Supports to Make Individuals' Healthful Choices Easier 181

Defining Terms	181
----------------	-----

The Environment Affects What People Eat	182
--	-----

The Socio-Ecological Framework 182

Levels of the Socio-Ecological Framework	183
---	-----

Using the Socio-Ecological Framework to Understand the Dynamic Relationships Across the Levels	184	Building Environmental Supports Through Partnerships and Collaborations	201
Building Environmental Supports Through Families and Social Networks	185	Building Partnerships and Collaborations	202
Families	186	Community Capacity Building	203
Social Networks	188	Building Environmental Supports Through Changing Laws	205
Using the Socio-Ecological Framework to Design Interventions	190	A Logic Model Approach for Planning Nutrition Education	205
Building Environmental Supports Through Policy, System, and Environmental Approaches (PSEs)	191	Chapter Summary	208
Understanding PSEs	191	The Socio-Ecological Framework	208
Settings for Policy, Systems, and Environmental Supports	193	Family and Social Networks	209
PSEs Where People Live	193	Policy, System, and Environmental Approaches	209
PSEs Where People Learn	195	Partnerships and Collaborations	209
PSEs Where People Work	199	Changing Laws	209
PSEs Where People Play	200	A Logic Model Approach for Planning Nutrition Education	209
PSEs Where People Shop	201	Questions and Activities	209
PSEs Where People Eat	201	References	210

PART II USING RESEARCH AND THEORY IN PRACTICE: DESIGNING THEORY-BASED NUTRITION EDUCATION 215

A Systematic Approach to Designing Nutrition Education: The DESIGN Procedure	217	Designing Both Educational and Environmental Support Interventions	220
Overview	217	The DESIGN Procedure Integrates Several Disciplines for Effective Nutrition Education	220
Chapter Outline	217	Education Skills for the Nutrition Educator	222
Learning Objectives	217	The Nutrition Education DESIGN Procedure as Coaching	223
The Importance of a Systematic Process for Designing Effective Nutrition Education	218	Overview of the Nutrition Education DESIGN Procedure for Planning Theory-Based Nutrition Education	223
Using the Nutrition Education DESIGN Procedure for Planning Educational Activities and Environmental Supports	219	The Tasks and Products of the DESIGN Procedure	224
Designing Direct and Indirect Educational Activities	219		
Designing Environmental Support Activities	219		

Systematic Approaches Similar to the DESIGN Procedure	225	What Are the Current Behaviors of Your Audience That Contribute to the Problems to Solve?	241
Defining Terms	226	What Do General Sources Tell You About the Behaviors of Audiences Similar to Yours That Contribute to the Health Problems?	241
A Case Study: How the DESIGN Procedure Links Theory and Research to Practice at Every Step	226	What Are the Behaviors of Your Specific Audience That Contribute to the Identified Health Problem to Solve?	242
DESIGN Procedure Workbook and Modules for You to Use	231	Prioritizing the Behaviors: The Criteria	244
Chapter Summary	234	What Are Some Positive Behaviors of the Audience That Can Be Strengthened?	246
Questions and Activities	234	Decide the Behavior Change Goals of the Program for Your Audience	247
References	234	Prioritizing Behaviors or Actions in Practice	248
8 Deciding Behavior Change Goals of the Intervention: Step 1	235	Behavior Change Goals: How Specific Is Specific?	248
Overview	235	Behavior Change Goals Versus Behavioral Objectives	250
Chapter Outline	235	Behavior Change Goals Versus Educational Objectives	251
Learning Objectives	235	Behavior Change Goals Achievable in the Short Term and Long Term	251
Deciding on the Behavior Change Goals for a Given Audience or Population by Assessing Health Problems to Solve and Current Behaviors	236	Behavior Change Goals May Serve Larger Value Goals	251
“Behavior Change Goals” Versus “Topics” as the Basis of Nutrition Education	236	Completing the Nutrition Education DESIGN Procedure Step 1: Decide Behavior Module	252
Why Conducting Assessments of Your Audience Is Crucial	237	Case Study: The Nutrition Education DESIGN Procedure in Action—Step 1: Decide Behavior	253
Involving Participants Enhances Motivation, Empowerment, and Effectiveness	237	Case Study	253
Who Is Your Audience?	238	Questions and Activities	254
What Are the Health Problems to Solve of Your Audience?		References	255
Prioritize	239	9 Exploring Determinants of Intervention Behavior Change Goals: Step 2	257
What Do General Sources Tell You About the Potential Health Problems to Solve for Audiences Similar to Yours?	239	Overview	257
What Are the Health Problems to Solve for Your Specific Audience?	240	Chapter Outline	257
Prioritize and Select Health Problems to Solve	241	Learning Objectives	257

Understanding Your Audience and the Context of Their Lives		258	Summary Integrated Theory-Based Model for Nutrition Education		277
Exploring the Social and Cultural Contexts of Your Audience		259	Constructing Your Intervention Theory-Based Model		279
Exploring Relevant Individual and Community Strengths or Assets		261	Clarifying the Educational Philosophy of the Sessions or Intervention		281
Exploring Psychosocial Determinants of Behavior Change		261	Helping and Educating: Who Is Responsible for the Problem and Who Is the Solution?		281
Psychosocial Theory Provides Guidance		261	Other Considerations		283
Exploring Audience Motivators		262	Articulating the Intervention's Perspectives on How Food and Nutrition Content Will Be Addressed		284
Exploring Potential Facilitators of Behavior Change		264	Clarifying the Intervention's Perspectives on Use of Educational Resources from a Variety of Sources		285
Methods for Exploring Potential Psychosocial Determinants of Behavior Change		265	Thinking About Your Needs and Approach as a Nutrition Educator		286
Completing the Nutrition Education DESIGN Procedure Step 2: Explore Determinants Module		270	Concluding Reflections		286
Case Study: The Nutrition Education DESIGN Procedure in Action—Step 2: Explore Determinants		270	Completing the Nutrition Education DESIGN Procedure Step 3: Select Theory-Based Model Module		288
Determinants of Change as the Bridge Between Theory and Nutrition Education Practice		271	Case Study: The Nutrition Education DESIGN Procedure in Action—Step 3: Select Theory-Based Model and Clarify Philosophy and Content		289
Questions and Activities		271	Questions and Activities		289
References		272	References		290
10 Selecting Theory and Clarifying Intervention Philosophy and Content: Step 3		273	11 Indicating Objectives: Translating Behavioral Theory into Educational Objectives: Step 4		291
Overview		273	Overview		291
Chapter Outline		273	Chapter Outline		291
Learning Objectives		273	Learning Objectives		291
Preliminary Planning		274	Translating Behavioral Theory into Nutrition Education Activities Through Objectives		292
Selecting and Adapting an Appropriate Theory-Based Model		274	Writing Educational Objectives for Theory-Based Determinants to Achieve Behavior Change Goals		294
Psychosocial Theory in Sociocultural Context		275	Educational Objectives Are Based on Determinants from Theory-Based Models		294
Psychosocial Theories Especially Useful for Motivating Our Audiences		275			
Theories Especially Useful for Both Motivating Audiences and Facilitating the Ability to Take Action		276			

Considerations in Writing Educational Objectives	294	Gaining Audience Interest and Engagement	313
General Educational Objectives	295	Information Versus Learning Experiences	313
Specific Educational Objectives	295	Creating Opportunities for Active Participation and Learning	314
Ensuring Educational Objectives Engage Participants' Thinking, Feeling, and Doing	298	Using Behavior Change Strategies to Create Educational Activities to Enhance Motivation for Behavior Change: A Catalog of Strategies	315
Writing Educational Objectives That Reflect the Desired Complexity of Learning	298	Catalog of Behavior Change Strategies and Educational Activities for Enhancing Motivation	315
The Affective Domain in Nutrition Education	302	Behavior Change Strategies and Educational Activities for the Theory Determinants of Perceived Risk and Negative Outcomes of Current Behavior	315
Completing the Nutrition Education DESIGN Procedure—Step 4: Indicate Objectives Module	306	Behavior Change Strategies and Educational Activities for Theory Determinant of Perceived Benefits [Expected Positive Outcomes of Behavior Change]	319
Case Study: The Nutrition Education DESIGN Procedure in Action—Step 4: Indicate Objectives	306	Behavior Change Strategies and Practical Educational Activities for the Theory Determinant of Perceived Barriers [Expected Negative Outcomes of Behavior Change]	321
Questions and Activities	307	Behavior Change Strategy: Reflection on Expected Emotions From Performing the Behavior: Positive and Negative	322
References	307	Behavior Change Strategies and Practical Educational Activities for the Theory Determinant Food Preferences	322
12 Generating Educational Plans—A Focus on Enhancing Motivation for Behavior Change and Action: Step 5	308	Behavior Change Strategies and Practical Educational Activities for the Theory Determinant of Attitudes Toward Targeted Behavior Change Goal(s)	323
Overview	308	Behavior Change Strategies and Practical Educational Activities for the Theory Determinant of Perceived Norms	323
Chapter Outline	308	Behavior Change Strategies and Practical Educational Activities for the Theory Determinant of Self-Depictions	325
Learning Objectives	309		
Framework for Creating Theory-Based Nutrition Education Activities: The Importance of Behavior Change Strategies	309		
Audiences from Low-Resource Communities	311		
Translating Psychological Theory into Educational Practice: Determinants, Behavior Change Strategies, and Educational Activities to Enhance Motivation	311		
Clarifying Terms	312		
Selecting Behavior Change Strategies	312		
The Relationship of Behavior Change Strategies to Educational Activities	312		

Behavior Change Strategies and Practical Educational Activities for the Theory Determinant of Self-Efficacy/Perceived Behavior Control	325	Completing the Planning Matrix Tool to Outline Each Education Plan	337
Behavior Change Strategies and Practical Educational Activities for the Theory Determinant of Behavioral Intention	326	The Educational Plan: Developing a Teaching Format for Delivering the Session	337
Using Determinants and Behavior Change Strategies to Guide Development of Practical Educational Activities: The Food, Health & Choices Curriculum	329	Pilot Testing the Educational Plan	338
Organizing and Sequencing Educational Activities for Delivery with the 4 Es: The Educational Plan	330	Case Study: The Nutrition Education DESIGN Procedure in Practice—Step 5: Generate Plans: Focusing on Motivation	338
Sequencing Your Group Session or Other Intervention Venue With the 4 Es	331	Session Title, Behavior Change Goal, and General Educational Objectives	339
Exploring Other Audience Characteristics and Intervention Resources	333	The Educational Plan: Using the Planning Matrix Tool to Outline the Session	339
Identifying Relevant Audience Characteristics	333	The Educational Plan: Developing a Teaching or Narrative Format for Delivering the Session	339
Practical and Intervention Resource Considerations	333	Educational Plans in Practice	339
Generating an Educational Plan: The Nuts and Bolts	333	Questions and Activities	340
The Outline for a Single Session	333	References	340
Start with a Planning Tool to Create an Outline for Each Session	334	13 Generating Educational Plans—A Focus on Facilitating the Ability to Change Behavior and Take Action: Step 5	342
Generate the Final Educational Plan(s): Narrative Teaching Format Ready for Delivering to Your Audience	335	Overview	342
Generating the Final Educational Plan(s) for Internet/Technology-Based Intervention	336	Chapter Outline	342
Completing the Nutrition Education DESIGN Procedure Step 5: Generate Plans Module	336	Learning Objectives	343
Session Title, Behavior Change Goal, and General Educational Objectives	336	Facilitating the Ability to Change Behavior and Take Action: An Overview	343
Sequencing Activities Is Important: The 4 Es	336	Translating Psychological Theory into Educational Practice: Determinants, Behavior Change Strategies, and Educational Activities to Facilitate Behavior Change	343
		Initiating Behavior Change Through Action Goal Setting/Action and Coping Planning	347
		Behavior Change Strategy: Action Goal Setting/Action Planning [Implementation Intentions]	347
		Building Food- and Nutrition-Related Knowledge and Skills: Enhancing Behavioral Capability	350

Behavior Change Strategies and Educational Activities for the Theory Determinant of Knowledge and Cognitive Skills	350
Behavior Change Strategies and Educational Activities for the Theory Determinant of Affective Skills	352
Behavior Change Strategies and Educational Activities for the Theory Determinant of Behavioral Skills	354
Enhancing Self-Efficacy in the Behavior Change Process	355
Behavior Change Strategies and Educational Activities for the Theory Determinant of Action Self-Efficacy	355
Behavior Change Strategies and Educational Activities for the Theory Determinant of Coping Self-Efficacy	356
Behavior Change Strategies and Educational Activities for the Theory Determinant of Recovery Self-Efficacy	356
Strengthening Self-Regulation Processes or Action Control	357
Behavior Change Strategies and Educational Activities for the Theory Determinant of Self-Regulation/Action Control	357
Fostering Behavioral Supports for Self-Regulation	365
Behavior Change Strategies and Educational Activities for the Theory Determinant of Social Support	365
Behavior Change Strategies and Educational Activities for the Theory Determinant of Reinforcements	365
Behavior Change Strategies and Educational Activities for the Theory Determinant of Cues to Action	366
Behavior Change Strategies and Educational Activities for the Theory Determinant of Collective Efficacy/ Empowerment	366

Completing the Nutrition Education DESIGN Procedure Step 5: Generate Plans Module	368
Session Title, Behavior Change Goal, and General Educational Objectives	368
Sequencing Activities Is Important: The 4 Es	368
The Educational Plan: Using the Matrix Tool to Outline Sessions	368
The Educational Plan: Developing a Teaching or Narrative Format for Delivering the Session	369
Pilot Testing the Educational Plans	370
Case Study: The Nutrition Education DESIGN Procedure in Action—Step 5: Generate Plans, Focusing on Facilitating Behavior Change or Action	370
Session Title, Behavior Change Goal, and General Educational Objectives	370
Educational Plan: The Planning Matrix for Designing the Session	370
The Educational Plan: Teaching or Narrative Format for Delivering the Session	370
Educational Plans in Practice	370
Questions and Activities	371
References	371
14 Nail Down the Evaluation Plan: Step 6	373
Overview	373
Chapter Outline	373
Learning Objectives	373
Introduction: Why Evaluate?	374
Types of Evaluation	375
Outcome Evaluation: Outcomes Achievable in the Short, Medium, and Long Term	375
Process Evaluation	376
Planning the Outcome Evaluation	376
Evaluating Determinants of Behavior Change	376

Evaluating Behavior Changes Made or Actions Taken	377	Time Series Designs	396
Evaluating Health Outcomes to Solve	377	Surveillance Studies	396
Methods for Evaluating Outcomes	377	Qualitative Evaluation Designs	396
Linking Outcomes, Methods, and Instruments/Questions	378	Ethical Considerations When Conducting Evaluations With People	397
Methods to Evaluate Effects on Determinants of Behavioral Change: Short-Term Outcomes	379	Planning the Process Evaluation	397
Methods to Evaluate Effects on Intervention Behavior Change Goals: Medium-Term Outcomes	384	Process Evaluation to Understand How the Intervention Was Implemented	397
Making Behavioral Instruments Cognitively Appropriate and Motivating	387	Process Evaluation Data to Understand the Link Between Implementation and Outcomes	398
Methods to Evaluate Effects on Problems to Solve: Long-Term Outcomes	387	Use of the Process Evaluation Data	399
Criteria of Effectiveness	388	Completing the Nutrition Education DESIGN Procedure Step 6: Nail Down Evaluation Module	399
Assuring Appropriate, Reliable, and Valid Evaluation Tools for Your Intervention	389	Case Study: The Nutrition Education DESIGN Procedure in Action—Step 6: Nail Down Evaluation	400
Appropriateness	389	Outcome Evaluation	400
Validity	389	Process Evaluation	400
Reliability	390	Concluding Reflections	401
Sensitivity to Change	390	Questions and Activities	401
Cognitive Testing: Readability and Understandability	390	References	401
Qualitative Data	390	15 Using the Nutrition Education DESIGN Procedure to Create Environmental Supports for Behavior Change Goals	404
Validating and Pilot Testing Instruments	391	Overview	404
Examples of Validation Studies of Instruments	391	Chapter Outline	404
Designing Behavioral Evaluation Tools for Low-Literacy Audiences	391	Learning Objectives	404
Collecting Evaluation Data Pre- and Post-Intervention	392	Introduction: Why Creating Environmental Supports Complements Educational Plans	405
Constructing an Appropriate Evaluation Plan to Measure Outcomes	393	Overview of Environmental Supports	405
Experimental Designs	393	Step 1: Decide Behavior – the Behavior Change Goal for the Environmental Support	407
Quasi-experimental Designs	396	State Your Audience	407
Nonexperimental Designs to Provide Practice-Based Evidence	396	Identify the Problems to Solve	407
		Reflect on Audience Behaviors	407
		Choose Behavior Change Goal	407

Step 2: Explore Determinants – What Enables or Hinders Enacting the Behavior Change Goal	408
Explore Your Audience's Current Environment	408
Choose an Environmental Support to Create	411
Connect Environmental Support to Education	411
Step 3: Select Theory-Based Model—Simple Logic Model for Developing Environmental Supports	412
Create a Simple Logic Model	412
Apply an Equity Lens	420
Apply an Ecological Sustainability Lens	420
Step 4: Indicate Objectives – for Environmental Supports	421
Specify Environmental Change Objectives	421
Step 5: Generate Plans – for Your Environmental Support	421
Create Environmental Support Plans	421

Step 6: Nail Down Evaluation – for Your Environmental Supports	423
Plan Evaluation for Your Environmental Support	423
Plan Evaluation for Behavior Change Goal	425
Plan Evaluation for Problem to Solve	425
Evaluate What Was Challenging	425
Case Study: Nutrition Education DESIGN Procedure: Environmental Supports Plans in Practice	425
Taking Control: Eating Well and Being Fit Program Overview	426
Taking Control: Eating Well and Being Fit Program Family Activities	426
DESIGN Procedure: Environmental Supports Plans	429
Chapter Summary	429
Questions and Activities	431
References	431

PART III RESEARCH AND THEORY IN ACTION: DELIVERING NUTRITION EDUCATION IN PRACTICE

433

16 Delivering Nutrition Education Effectively in Group Settings	435
Overview	435
Chapter Outline	435
Learning Objectives	435
Delivering Nutrition Education Effectively in Practice	436
Communicating with Your Audience: Basic Principles	437
Communication Source Characteristics	437
Message Characteristics	439
Receiver or Audience Characteristics	440
Communications in Social Context	441

Integrating Learning Theory and Learning Styles into Your Educational Plans	442
Understanding Learning Theory	442
The Power of Active and Cooperative Learning	443
Understanding Learning Styles: Kolb's Model	443
Integrating Instructional Design Theory Into Your Educational Plans	444
Building on Instructional Design Theory	445
Using Principles of Good Instruction: The Importance of Sequencing Learning Experiences	445
Integrating Instructional Design Theory with Learning Theory: Teaching Around the Cycle – Similarity to the 4Es	446

Participating in Community	
Coalitions	563
Food Policy Councils	563
Local School Wellness Policy	563
Community Coalitions	564
Advocating for Nutrition and Nutrition	
Education	564
Written Communications	564
Testimony, Hearings, and Forums	564
Helping to Shape Legislation	566

Educating Policymakers in Government	568
Why Educate Elected Government Officials?	568
Who Are Your Elected Officials?	568
Get to Know Them and Let Them Get to Know You	569
You Can't Do Everything, but You Can Do Something	570
Questions and Activities	571
References	571

PART IV NUTRITION EDUCATION DESIGN PROCEDURE WORKBOOKS AND CASE STUDY

573

Nutrition Education DESIGN Procedure Workbook: Educational Plans	575
Nutrition Education DESIGN Procedure Workbook: Educational Plans – Abbreviated Version	598
Nutrition Education DESIGN Procedure Workbook: Environmental Support Plans	600
Nutrition Education DESIGN Procedure Case Study: Educational Plans	617
o Step 1: Decide behaviors	618
o Step 2: Explore determinants	626
o Step 3: Select theory-based model	629

o Step 4: Indicate objectives	636
o Step 5: Generate plans	639
o Step 6: Nail down evaluation	656
Nutrition Education DESIGN Procedure Case Study: Environmental Support Plans	661
o Step 1: Decide behaviors	662
o Step 2: Explore determinants	667
o Step 3: Select theory-based model	671
o Step 4: Indicate objectives	674
o Step 5: Generate plans	676
o Step 6: Nail down evaluation	680
