ABOUT THE EDITORS	xiii
PREFACE	xv

Part 1	Fundamentals of the energy industry	1
---------------	--	---

CHAPTER 1	The energy system	3
	Samuele Furfari	
	1. Introduction	3
	2. Primary energy sources	8
	3. Final energy demand	52
	4. Conclusion	64
	References	65

CHAPTER 2	Structural analysis of energy demand	67
	Máté János Lőrincz and Jacopo Torriti	
	1. Introduction	67
	2. Background: structural analysis on the timing of energy demand	68
	3. Theories	68
	4. Applications	85
	5. Conclusions	97
	Exam questions	100
	References	100
	Further reading	106

CHAPTER 3	Energy supply	109
	Elena Telegina, Alexander Maksimenko, Sergey Eremin and Pier Giorgio De Sanctis Lucentini	
	1. Introduction	109
	2. Theory of supply	111
	3. Supply fundamentals	115
	4. Financing energy supply	126
	5. Security of supply	131
	6. Case study: gas supply options for Russian independent (non-Gazprom) gas producer	137
	References	151

CHAPTER 4	Energy transportation: gas.....	153
	Sofia Guidi Di Sante, Matteo Di Castelnuovo and Alessandro Rubino	
	1. Introduction	153
	2. The value chain of natural gas	154
	3. Regulation of the natural gas industry	162
	4. Natural gas hubs	182
	5. Exam questions	188
	References	188
	Further reading.....	190
CHAPTER 5	Energy transportation: electricity	193
	Christopher Decker	
	1. Introduction	193
	2. Background	194
	3. Theory	204
	4. Applications	222
	5. Conclusions	233
	6. Questions	234
	References	234
	Further reading.....	237
CHAPTER 6	Wholesale markets – regulation of electricity and gas industry	239
	Joan Batalla, Maria Teresa Costa-Campi and Elisa Trujillo-Baute	
	1. Introduction	239
	2. Liberalisation process: transforming the energy market landscape	242
	3. Electricity and natural gas wholesale markets.....	249
	4. Conclusions	268
	5. Exam or assignment questions	269
	References	270
CHAPTER 7	Carbon market analysis and risk management.....	275
	Takashi Kanamura	
	1. Introduction	275
	2. Carbon markets	276
	3. A model of carbon market equilibrium.....	281
	4. Carbon risk management	285
	5. Carbon market issues	295
	6. Conclusions	298
	7. Test Questions.....	298
	References	299
Part 2	Economics and policy of energy transition	301
CHAPTER 8	Energy innovation and the sustainability transition	303
	Matthew Hannon and Ronan Bolton	
	1. Introduction	303
	2. Energy transitions as ‘whole system’ change	305

	3. Trends in sustainable energy innovation	312
	4. Delivering a sustainable energy system: the need for insights from innovation and transitions studies	318
	5. Energy innovation and wider system change	322
	6. Conclusions	350
	References	352
CHAPTER 9	Impact of variable renewable energy sources on bulk power system planning and operations.....	363
	Michael Craig and Carlo Brancucci	
	1. Introduction	363
	2. Characteristics of wind and solar PV	366
	3. Planning and operational impacts of wind and solar PV	372
	4. Mitigating power system planning and operation challenges due to wind and solar power.....	381
	5. Conclusion	389
	6. Test Questions.....	389
	Acknowledgements.....	390
	References	390
CHAPTER 10	Regulatory challenges for energy storage systems	395
	Paola Casati, Matteo di Castelnuovo and Miguel Vazquez	
	1. Introduction	395
	2. Problem statement and literature review	399
	3. Regulatory challenges associated with market design	408
	4. Regulatory challenges associated with network services.....	414
	5. The Californian and German case studies.....	420
	6. Conclusion	425
	7. Test questions	428
	References	428
CHAPTER 11	Multicarrier energy systems.....	433
	Soheil Derafshi Beigvand, Hamdi Abdi and Massimo La Scala	
	1. Introduction	433
	2. The need for an integrated approach to multiple energy carriers.....	434
	3. Representation of multiple energy carrier systems	437
	4. Optimisation methods for dispatching energy carriers in a single hub or a grid of interconnected hubs.....	454
	5. Conclusions	469
	Appendix I.....	470
	Appendix II.....	512
	References	518

CHAPTER 12	Financing the energy transition: the role of public funding, collaboration and private equity.....	521
	Albert Jolink and Eva Niesten	
	1. Introduction	521
	2. Public funding of renewable energy.....	524
	3. From public funding to renewable energy collaborations	529
	4. From collaboration to private funding of renewable energy.....	534
	5. Private equity investment meets renewable energy.....	536
	6. Conclusion	540
	7. Test questions	542
	Appendix: Data and sampling.....	542
	References	544
CHAPTER 13	Beyond energy independence: the geopolitical externalities of renewables.....	549
	Gonzalo Escribano	
	1. Introduction	549
	2. Renewable energies and the Renewal of Geopolitics.....	550
	3. Similar vulnerabilities, new dependencies	556
	4. The geopolitical externalities of soft power in grid communities	560
	5. Case studies	562
	6. Concluding remarks	574
Part 3	Energy data modelling and forecasting	577
CHAPTER 14	A macro-evolutionary approach to energy policy	579
	Karolina Safarzynska	
	1. Introduction	579
	2. A macro-evolutionary approach	582
	3. The interactions of energy sector with manufacturing	583
	4. The interactions of energy industry and financial sector	587
	5. Conclusions and policy discussions	589
	References	590
CHAPTER 15	Econometric modelling and forecasting of wholesale electricity prices	595
	Alessandro Sapio	
	1. Introduction	595
	2. Stylised facts	597
	3. Econometric modelling and forecasting	613
	4. Economic models of the electricity market: some notes.....	626
	5. Conclusion and further reading.....	630
	6. Questions	634
	References	634
	Further reading.....	640

CHAPTER 16	Complex systems applications to electric mobility and regional intermittent sources planning.....	641
	Angelo Facchini and Antonio Scala	
	1. The science of complex systems.....	641
	2. Power systems and complex networks	643
	3. Application of complex networks to electric mobility planning.....	649
	4. Markowitz portfolios for the spatial planning of renewable sources.....	656
	5. Exercises and self-evaluation questions	663
	References	663
