Foreword 1	xi	2.2.1.1 Internet of Things	40
Foreword 2	xiii	2.2.1.2 Artificial Intelligence (AI)	40
Foreword 3	xvii	2.2.1.3 Machine Learning (ML)	40
Series Preface	xxi	2.2.1.4 Autonomous Robots	40
Preface	xxiii	2.2.1.5 Virtual Simulators	40
About the Authors	xxv	2.2.1.6 New Human–Machine Interfaces	41
About the Graphic Designer	xxvii	2.2.1.7 Encryption and Cybersecurity	41
Endorsements	xxix	2.2.1.8 Cloud and APIs	41
Glossary	xxxiii	2.2.1.9 Additive Manufacturing	41
List of Acronyms	xxxix	2.2.1.10 Blockchain	41
		2.2.1.11 Advanced Materials	42
Chapter 1: The End of Business as Usual	1	2.2.2 What Changes Can Industry 4.0 Enable?	43
1.1 The Trillion-Dollar Question	2	2.2.2.1 Responsive and Flexible Production Systems	44
1.2 The Future Is Warmer, Urbanized, Polluted, and Resource-Hungry	3	2.2.2.2 Integrated Ecosystems	44
1.3 It Can't Happen Again	9	2.2.2.3 Engineering for Life Cycle Throughout the Entire Value Chain	44
1.4 It's About People, Not Waste	12	2.2.2.4 Acceleration by the Use of Exponential Technologies	44
1.5 About This Book	15	2.2.3 Important Concepts in Industry 4.0 Systems	45
References	18	2.2.3.1 Predictive Maintenance	45
		2.2.3.2 Digital Twins	46
Chapter 2: Understanding Industry 4.0	23	2.2.3.3 Smart Factories	46
2.1 The Four Industrial Revolutions	24	2.2.3.4 Industrial Symbiosis	46
2.1.1 The First Industrial Revolution	25		
2.1.2 The Second Industrial Revolution	27		
2.1.3 The Third Industrial Revolution	30		
2.1.4 The Fourth Industrial Revolution	34		
2.2 Industry 4.0	36		
2.2.1 The Technologies that Drive the Revolution	38		

2.2.3.5 Lights-Out		3.5.1 Anthropogenic Stocks Are	
Manufacturing	46	Ignored but Rapidly Growing	90
2.2.3.6 Edge Computing	47	3.5.2 What Can We Really	
2.2.4 Revolution or Evolution?	47	Achieve Advancing	
2.3 More with Less and the		Circular Economy?	92
Rebound Effect	49	3.6 The Butterfly Effect	93
2.4 Radical Solutions to Difficult		3.6.1 How About Composite	
Problems	52	Materials?	96
2.4.1 Transforming Business		3.6.2 The Importance of the	
Models	53	System's Boundaries	96
2.4.2 Creating Collaborative		3.7 The End of Growth as We Know It	99
Ecosystems	54	3.7.1 The End of "Green Growth"	101
2.4.3 Killer Apps of the		3.7.2 IND4.0 and the Religion	
Industry 4.0	55	of Continuous Growth	102
References	57	3.8 Circular Economy for Whom?	104
Chapter 3:		3.8.1 The Social Footprint of	
Un(mis)understanding		Circular Economy Is	
Circular Economy	61	Shaped by Corporate	
3.1 A Global Trend	62	Interests	106
3.1.1 China and EU Are Leading		3.8.2 Time to Rethink	
the Way	62	Governance	111
3.1.2 Other Government		3.9 It's Huge, Systemic, Uncertain	
Initiatives	64	but Urgently Needed	114
3.1.3 Private Sector Initiatives	66	References	118
3.1.4 Why Now?	66	Chapter 4: Redefining	
3.2 Circular Economy Comes from		Resources and Waste	125
Our Past	69	4.1 IND4.0 Redefines Resources	126
3.2.1 The Post-World War II		4.1.1 The Energy Footprint	
Acceleration	71	of Digitalization	127
3.2.2 Industrialization Stimulated		4.1.2 Metals Are Key for IND4.0	129
the Linearization of the		4.1.3 More Food and More Water	131
Economy	72	4.2 Redefining the Term "Waste"	132
3.3 What Is a Circular Economy?	74	4.2.1 A Brief Historical Overview	133
3.3.1 Hundred Fourteen Answers		4.2.2 Future Waste Streams	136
for One Question	77	4.2.3 Anthropogenic Stocks	136
3.4 From Good Intentions to Science	80	4.2.4 Food Waste	139
3.4.1 We Live in a "Full" World	82	4.2.5 Plastics	140
3.4.2 Thermodynamics Are		4.2.6 E-Waste	144
Fundamental	85	4.2.7 Other Important Waste	
3.5 Circularity Is not Sustainability	87	Streams	146

4.3 Waste Hierarchy: Upgraded or Obsolete?	147	Chapter 5: Waste Management 4.0	213
4.3.1 Critiques About Waste Hierarchy	151	5.1 Perceptions and Reality	214
4.3.2 Looking for More Systemic and Complex Tools	154	5.1.1 Expectations for Industry 4.0	214
4.3.3 Looking for Alternatives to Waste Hierarchy	158	5.1.2 The Hype and the Surprise	215
4.4 Sorry, Recycling Is Not Circular Economy	160	5.1.3 Dilemmas Facing Waste Management	218
4.4.1 Weight-Based Targets Are Misleading	161	5.1.4 An Ongoing Transformation	219
4.4.2 Searching for New Metrics	163	5.2 Hardware in Waste Management	221
4.4.3 Losing My (Recycling) Religion	165	5.2.1 The Connected Devices of Waste Management	222
4.4.4 Why Do We Recycle? Service vs. Value Chain	167	5.2.1.1 Smartphones	222
4.4.5 Usual Misconceptions About Recycling	170	5.2.1.2 Connected Weights	223
4.5 Waste Management Goes Beyond Waste	173	5.2.1.3 Container Level Sensors	223
4.5.1 Complexity and Uncertainties Become the New Normal	178	5.2.1.4 RFID Bin Tags and Scanners	223
4.6 Final Sinks During the Anthropocene	181	5.2.1.5 Smart Locks	224
4.6.1 Chemical Pollution Is a Serious Threat	183	5.2.1.6 GPS Trackers	224
4.6.2 Clean Material Cycles in Circular Economy Require More Final Sinks	186	5.2.1.7 Material Scanners	224
4.6.3 Circular Economy Needs More and Better Waste Management	188	5.2.1.8 Industrial Robots	225
4.6.4 Waste to Energy in Circular Economy	190	5.2.1.9 Screening Machines	225
4.6.5 Sanitary Landfills in Circular Economy	191	5.2.2 Integrated Hardware Systems	226
4.7 Circularities for Materials-Linearities for People	193	5.2.2.1 Reverse Vending Machines	227
References	200	5.2.2.2 Underground Container Systems	227
		5.2.2.3 Automated Vacuum Collection (AVAC)	227
		5.2.2.4 Automated Waste Sorting Plants	228
		5.3 Software in Waste Management	229
		5.3.1 The Changing Landscape of Software Development	229
		5.3.1.1 From Servers to Cloud	229

5.3.1.2 From Files to APIs	229	5.4 Selected Case Studies	237
5.3.1.3 From Monoliths to Modules	230	5.4.1 Developing a Platform to Simplify Access Management Across Different Technical Solutions	237
5.3.1.4 From Centralized to Distributed Architecture	230	5.4.2 Using Bin Sensors to Decrease Overflowing Trash Cans with 80%	239
5.3.1.5 From Reactive to Predictive Software	230	5.4.3 Creating Symbiosis-Like Industrial Parks to Curb Emissions and Increase Resource Productivity	240
5.3.2 Current Software in Waste Management	231	5.4.4 Enabling a Fully Automated Waste Processing Facility	241
5.3.2.1 ERP Systems	231	5.5 The Value of Openness	243
5.3.2.2 Customer Management Systems	231	References	246
5.3.2.3 Project Management Software (PMS)	231	Chapter 6: Towards the Digitalization of the Waste Industry	251
5.3.2.4 Data Lakes and Data Warehouses	232	6.1 From Waste Management to Resource Innovation	252
5.3.2.5 Fleet Management Systems	232	6.1.1 A Fundamental Shift	253
5.3.2.6 Route Planning Software	232	6.1.2 Risks and Challenges	255
5.3.2.7 Field Reporting Software	232	6.1.3 From Specific to Holistic Problem Solving	256
5.3.2.8 Customer Apps	233	6.2 Leadership and Management	257
5.3.2.9 Marketplace Software	233	6.2.1 Long-Term Vision or Short-Term Pragmatism?	260
5.3.3 Dealing with Complexity and Creating Higher-Level Systems	233	6.2.2 Leadership Styles and Strategies	262
5.3.3.1 Connectivity/Integration Platforms	234	6.2.3 Choosing the Right Innovation Methodology	263
5.3.3.2 Cloud Communications Platforms	234	6.2.3.1 Design Thinking	264
5.3.3.3 Smart Contract Frameworks	236	6.2.3.2 Lean Start-Up	265
5.3.3.4 Code Repositories	237	6.2.3.3 Agile	265
		6.2.4 Building Industrial Ecosystems	267
		6.2.5 Dealing with Complexity	268
		6.2.6 Political Leadership	269

6.3 Exploration Versus Exploitation	272	7.2.4 Mobile Phones Are the Key to Create New Big Data Sets	307
6.3.1 Playing with Both Hands	272	7.2.5 Predicting Pandemics	311
6.3.2 The Three Types of Innovation	273	7.3 The Dark Side of the Moon	311
6.3.3 Resource Optimization: The Forgotten Perspective	274	7.3.1 Surveillance Capitalism?	313
6.4 From Digitalization to New Business Models	275	7.4 From Cities as Machines to Cities as Organisms	315
6.4.1 Sustainability as a Driver of Value	276	7.4.1 Urban Theories and the Role of Scaling	316
6.4.2 The Elements of a Business Model	279	7.4.2 From Urban Scaling to Urban Sustainability	318
6.4.3 Business Model Experiments: The RESTART Approach	281	7.4.3 Big Data Meets the New Urban Science	320
6.5 Democratizing Technology	284	7.5 Circular Economy: Digitized or Dead	323
6.5.1 The Benefits of Openness	284	References	327
6.5.2 Creating and Promoting Shared Standards	286		
6.5.3 Global Collaboration for the Common Good?	287		
References	290		
Chapter 7: The Rise of a New Science	295	Chapter 8: Stairway to Heaven or Highway to Hell?	333
7.1 The Rise of Urban Informatics	296	8.1 Circular Economy or Space Race?	336
7.1.1 New Answers to Old Questions, but Not for Free	298	8.2 Circular Economy and IND4.0 as Essentially Contested Concepts	339
7.1.2 Citizens' Engagement	300	8.3 Squeezing IND4.0 – Undermining Circular Economy	341
7.1.3 More Challenges	301	8.4 Governance Is the Key – Cities are the Lock	346
7.2 Islands of Information in Oceans of Big Data	303	8.5 Beyond Business as Usual Optimization	352
7.2.1 Understanding Cities	303	8.6 Environmental Incrementalism? No, Thanks	354
7.2.2 Understanding Supply Chains	305	8.7 IND4.0 Meets the Horse Manure Crisis	358
7.2.3 Understanding Waste Management	305	8.8 No Sanitation = No Sustainability	361
		8.9 Ask Sisyphus the Trillion-Dollar Question	363
		References	367

**Epilogue: The Future
Starts with You 373**

**Epilogue: Towards
Irreversible Wastelands 375**
