Choline—Chemistry and Significance as a Dietary Factor

By C. H. BEST AND C. C. LUCAS

I. Introduction.....	1
II. Discovery, Nomenclature, Constitution, and Synthesis.....	2
III. Properties of Choline and Its More Important Salts.....	6
IV. Detection and Estimation of Choline.....	9
V. Choline as a Dietary Factor.....	16
VI. The Lipotropic Effect of Proteins and Amino Acids.....	18
VII. Intermediary Metabolism of Choline and Other Lipotropic Factors....	24
VIII. The Vitamin B Complex and the Lipotropic Factors.....	30
IX. The Relation of Choline and the Other Lipotropic Factors to the Kidney.	33
X. The Lipotropic Factors and Cirrhosis of the Liver Produced by Dietary Means.....	35
XI. Choline and Hyperplasia of the Forestomach in Rats.....	37
XII. Choline, Butter Yellow, and Hepatic Tumors.....	38
XIII. The Relation of Choline and the Other Lipotropic Factors to Avian Nutrition.....	40
XIV. The Preliminary Work on Acetylcholine Production.....	41
XV. The Influence of Choline on Lactation.....	42
XVI. The Effect of Choline on Blood Cholesterol and Experimental Atherosclerosis.....	42
XVII. The Question of Lipotropic Factors Other Than Choline in Pancreas and Pancreatic Juice.....	42
XVIII. Choline Biosynthesis.....	45
XIX. The Mechanism of the Lipotropic Action of Choline and Other Substances.....	47
References.....	51

The Appraisal of Nutritional States

By NORMAN JOLLIFFE AND RITA M. MOST

A. Introduction.....	60
B. Prevalence of Malnutrition.....	60
I. Evidence from Mortality Statistics.....	60
II. Evidence from Morbidity Rates.....	62
1. Dental Caries.....	63
2. Underweight.....	63
3. Iron Deficiency Anemia.....	64
4. Vitamin A Deficiency.....	64
5. Riboflavin Deficiency.....	65
6. Vitamin C Undersaturation.....	66
7. The Prevalence of Rickets.....	66
III. Evidence from Dietary Surveys.....	66
1. Expenditure for Foods.....	67

2. Calories.....	67
3. Protein.....	68
4. Carbohydrate and Fat.....	69
5. Iron.....	69
6. Calcium and Phosphorus.....	70
7. Vitamin A.....	71
8. Vitamin B ₁	71
9. Riboflavin.....	73
10. Niacin (Nicotinic Acid).....	74
11. Vitamin C.....	74
12. Vitamin D.....	75
13. Grades of Diets.....	75
IV. Evidence from Food Supplementation.....	77
C. Factors Contributing to Nutritional Failure.....	78
I. Poor Food Habits.....	78
II. Vitamin-Free or Vitamin-Poor Calories.....	78
III. Price Rationing.....	79
IV. Intercurrent Illness.....	79
D. The Recognition of Nutritional Inadequacy.....	79
I. Dietary History.....	81
II. Medical History.....	81
III. Physical Examination.....	83
1. Vitamin A.....	83
2. Vitamin B ₁ (Thiamin).....	84
3. Riboflavin Deficiency (Vitamin B ₂).....	87
4. Nicotinic Acid.....	89
5. Pyridoxin (Vitamin B ₆).....	92
6. Pantothenic Acid.....	93
7. Inositol.....	93
8. p-Aminobenzoic Acid.....	94
9. Biotin (Vitamin H, Co-enzyme R).....	94
10. Vitamin B Complex.....	94
11. Vitamin C (Ascorbic Acid).....	94
12. Vitamin D.....	95
13. Vitamin E (α-Tocopherol).....	96
14. Vitamin K.....	97
15. Vitamin P (Citrin).....	97
16. Anti-Pernicious Anemia Factor.....	97
IV. Special Examinations.....	104
E. Summary.....	
References.....	104

Physical Methods for the Identification and Assay of Vitamins and Hormones

BY JOHN R. LOOFBOUROW

I. Introduction.....	109
1. Methods to Be Discussed.....	109
2. Preliminary Considerations.....	110
3. Applicability of the Methods Discussed.....	112
II. Absorption Spectrophotometry.....	112
1. Laws of Absorption and Methods of Presenting Data.....	112

2. General Characteristics of the Absorption of Vitamins, Hormones and Enzymes.....	115
3. Precision of Measurement.....	119
4. Absorption of Mixtures.....	124
5. Absorption Spectra of Individual Water-Soluble Vitamins.....	127
6. Absorption Spectra of Individual Fat-Soluble Vitamins.....	132
7. Absorption Spectra of Selected Hormones and Enzymes.....	137
III. Colorimetry.....	139
1. Methods and Precision of Measurement.....	139
2. Applications.....	142
IV. Fluorescence Spectroscopy.....	143
1. Methods and Applications.....	143
V. Fluorophotometry.....	145
1. General Considerations.....	145
2. Methods and Precision of Measurement.....	147
3. Applications.....	149
VI. Conclusions.....	151
References.....	151

The Chemical and Physiological Relationship Between Vitamins and Amino Acids

By H. H. MITCHELL

I. Introduction.....	157
II. Chemical Relationships between Vitamins and Amino Acids.....	158
1. General Considerations.....	158
2. The Relation of Amino Acids to the Biogenesis of the Vitamins.....	159
III. General Physiological Relationships between Vitamins and Proteins.....	161
1. As indicated by Appetite Studies.....	161
2. In Digestion.....	161
3. In Metabolism.....	163
IV. Specific Physiological Relationships Between Vitamins and Proteins.....	165
1. Flavoproteins.....	166
2. Carotenoid Proteins.....	166
3. The Avidin-Biotin Relationship.....	167
4. Ascorbic Acid and Collagen Formation.....	168
5. Enzyme-Coenzyme Relationships.....	170
6. Vitamin-Enzyme Relationships.....	171
7. Vitamins and Immunity.....	172
8. Vitamins and Anaphylaxis.....	173
9. Vitamins and the Metabolism of Hemoglobin.....	174
10. Vitamin K and Prothrombin.....	176
V. Specific Physiological Relationships Between Vitamins and Amino-Acids- genic Hormones.....	176
1. Thyroxin and Vitamins.....	177
2. Adrenalin and Vitamins.....	177
VI. Specific Physiological Relationships Between Vitamins, Amino Acids and Their Simple Derivatives.....	178
1. Ascorbic Acid and Glutathione.....	178
2. Vitamins and Creatine Metabolism.....	179

3. Vitamins and Amino Acid Metabolism.....	180
VII. Summary.....	185
References.....	187

The Photoreceptor Function of the Carotenoids and Vitamins A

By GEORGE WALD

I. Introduction.....	195
II. Carotenoids in Light-Sensitive Structures.....	196
III. Functions of Carotenoids in Plants.....	197
IV. Phototactic Systems of Protista; Astaxanthin.....	211
V. Photokinetic Systems of Lower Invertebrates.....	214
VI. Invertebrate and Vertebrate Eyes; the Vitamins A.....	215
VII. Summary and Conclusions.....	223
References.....	225

The Significance of the Vitamin Content of Tissues

By ROGER J. WILLIAMS

I. Introduction.....	229
II. General Distribution in the Tissues of Various Organisms.....	230
1. Vitamins A, D, E, K.....	230
2. Ascorbic Acid.....	232
3. B Vitamins.....	233
III. Distribution of Vitamins in the Tissues of Mammals.....	235
1. Tables and Discussion.....	238
2. Correlation with Respiratory Activity of Tissues.....	238
IV. Significance of Distribution with Regard to the Functioning of the Respective Vitamins.....	239
1. Vitamins A.....	239
2. Ascorbic Acid.....	241
3. B Vitamins.....	242
a. Individual Members.....	242
b. General.....	243
V. General Observations.....	245
References.....	246

Growth-Factors for Protozoa

By RICHARD P. HALL

I. Introduction.....	249
II. The Basal Medium.....	250
III. Thiamin.....	252
IV. Riboflavin.....	257
V. Pyridoxin.....	258
VI. Pantothenic Acid.....	258
VII. Other Vitamins of the B-Complex.....	258
VIII. Ascorbic Acid.....	258
IX. Sterols.....	261
X. Hematin and Related Substances.....	261
XI. Unidentified Growth-Factors.....	262
XII. Factors Inducing Excystment.....	264

XIII. Miscellaneous Growth Stimulants.....	265
XIV. Discussion.....	265
References.....	266

Physiology of Anti-Pernicious Anemia Material

BY GEORGE R. MINOT AND MAURICE B. STRAUSS

I. Clinical Aspects of Pernicious Anemia.....	269
1. Blood Picture.....	270
2. Bone Marrow Pathology.....	271
II. The Effect of Anti-Pernicious Anemia Material on the Blood.....	272
1. The Reticulocyte Response.....	272
2. Effect of the Initial Red Blood Cell Level.....	274
3. Effect of the Amount of Potent Material.....	275
4. Effect of the Route of Administration of Potent Material.....	276
5. Effect of the Rate of Administration of Potent Material.....	278
6. Effect of the Reactive State of the Bone Marrow.....	278
III. The Effect of the Anti-Pernicious Anemia Material on Other Manifestations of the Disease.....	280
IV. Effects of Anti-Pernicious Anemia Material on Normal Man and Animals..	281
V. Effect of Anti-Pernicious Anemia Material in Disorders of Man Other than Pernicious Anemia.....	282
VI. The Formation of the Anti-Pernicious Anemia Material.....	283
VII. Concluding Remarks.....	288
References.....	288

The Intermediate Metabolism of the Sex Hormones

BY GREGORY PINCUS AND WILLIAM H. PEARLMAN

I. Introduction.....	294
II. Progesterone (C_{21} Steroids) Metabolism.....	296
1. Sources of Progesterone and Progestationally Active Material.....	296
a. Corpus Luteum.....	296
b. Placenta.....	296
c. Adrenal Glands.....	297
2. The Isolation of Products Which Probably Originate from Progesterone.....	297
3. Species Differences in Pregnandiol Excretion.....	300
4. The Relative Importance of Certain Endocrine Organs in Progesterone Production.....	302
5. Miscellaneous.....	305
III. Testosterone and Androgen Metabolism (C_{19} Steroids).....	307
1. The Isolation of Testosterone.....	307
2. The Isolation of Androsterone and Related C_{19} Steroids.....	308
3. Artifacts in the Study of Intermediary Metabolism of Androgens....	312
4. Can Progesterone or Other Adrenal Cortical Steroids (C_{21} steroids) Be Converted into 17-Ketosteroids in vivo ?.....	312
5. Theories of Oxidative Scission in vivo of Ring D of the Steroid Molecule.....	314
IV. Common Features of Progesterone and Testosterone Metabolism.....	315
V. Chemical Transformations of Sex Hormones in vitro.....	316
1. General Remarks.....	316

2. Reactions Involving Rings A and B.....	318
a) Male Sex Hormones (C_{19} Steroids).....	318
b) Progesterone (C_{21} Steroids).....	321
c) Steroids Other Than the Sex Hormones.....	322
d) Estrogens.....	324
3. Reactions Involving Ring D and the C_{17} Side-Chain.....	325
a) Reduction of the C_{17} Carbonyl to an Hydroxyl Group.....	325
b) Oxidation of the C_{17} Hydroxyl to a Carbonyl Group.....	326
c) Oxidations in the C_{17} Side-Chain.....	326
VI. Estrogen Metabolism.....	326
1. The Isolation of Estrogens.....	326
2. Likely Sites of Estrogen Synthesis.....	328
a) Ovaries.....	328
b) Placenta.....	328
c) Adrenals.....	329
d) Testes.....	329
3. Chemical Reactions of the Estrogens in vivo.....	329
4. Estrogen Inactivation.....	333
5. Theories of Estrogen Inactivation.....	334
a) The Formation of Conjugated Estrogens.....	334
b) Oxidative Processes.....	334
c) Reductive Processes.....	335
VII. Origin and Interrelationships of the Steroidal Hormones.....	335
References.....	338

The Hormones of the Adrenal Cortex

BY T. REICHSTEIN AND C. W. SHOPPEE

I. Introduction.....	346
1. Basic Biological Facts.....	346
2. Evaluation of Biological Activity.....	346
3. Methods of Assay.....	347
II. Summary of Substances Isolated in a State of Purity from the Adrenal Cortex.....	348
1. Methods of Isolation.....	348
2. Nomenclature and Formulae.....	349
3. List of Steroids Isolated from the Adrenal Gland.....	351
4. Description of the Individual Compounds.....	351
a. The $C_{21}O_5$ Group.....	351
b. The $C_{21}O_4$ Group.....	358
Sub-group a: Without Oxygen at C_{11}	358
Sub-Group b: With Oxygen at C_{11} (Corticosterone Group).....	360
Sub-Group c: Ketone of Unknown Constitution.....	363
c. The $C_{21}O_3$ Group.....	363
d. The $C_{21}O_2$ Group.....	367
e. Steroids with Less Than 21 Carbon Atoms.....	368
f. Other Substances.....	369
III. Determination of Constitution and Configuration and Reciprocal Inter-conversions.....	370
1. The $C_{21}O_5$ Group.....	370

2. The $C_{21}O_4$ Group.....	380
Sub-group a: Without an Oxygen Atom at C_{11}	380
Sub-group b: With an Oxygen Atom at C_{11} (Corticosterone Group) ..	382
3. The $C_{21}O_3$ Group.....	384
4. The $C_{21}O_2$ Group and Steroids with Less Than 21 Carbon Atoms.....	386
IV. Partial Synthesis of the Natural and Related Steroids.....	386
1. The $C_{21}O_4$ Group, Sub-group a, and Related Compounds.....	386
2. The $C_{21}O_3$ Group and Related Compounds.....	392
V. Amorphous Fractions with Higher Activity.....	403
VI. Constitution and Biological Activity.....	405
References.....	405
Author Index.....	415
Subject Index.....	431
