

Extended Contents

List of Abbreviations	xix
Guide to Statistical Symbols	xxi
1 • A Measurement Theoretical Framework for Longitudinal Data: Introduction to Latent State-Trait Theory	1
1.1 Introduction / 1	
1.2 Latent State-Trait Theory / 3	
1.2.1 Introduction / 3	
1.2.2 Basic Idea / 3	
1.2.3 Random Experiment / 5	
1.2.4 Variables in LST-R Theory / 5	
BOX 1.1. Key Concepts and Definitions in CTT / 7	
1.2.5 Properties / 10	
1.2.6 Coefficients / 11	
BOX 1.2. Properties of the Latent Variables in LST-R Theory / 12	
1.3 Chapter Summary / 14	
1.4 Recommended Readings / 15	
2 • Single-Factor Longitudinal Models for Single-Indicator Data	16
2.1 Introduction / 16	
2.2 The Random Intercept Model / 17	
2.2.1 Introduction / 17	
2.2.2 Model Description / 17	

- BOX 2.1.** Available Information, Model Degrees of Freedom, and Model Identification in Single-Indicator Longitudinal Designs / 19
- BOX 2.2.** Defining the Random Intercept Model Based on LST-R Theory / 20
 - 2.2.3 *Variance Decomposition and Reliability Coefficient* / 21
 - 2.2.4 *Mplus Application* / 22
- BOX 2.3.** Model Fit Assessment and Model Comparisons / 24
 - 2.2.5 *Summary* / 26
- 2.3 The Random and Fixed Intercepts Model / 28
 - 2.3.1 *Introduction* / 28
 - 2.3.2 *Model Description* / 28
- BOX 2.4.** Means of Linear Combinations / 28
- BOX 2.5.** Defining the Random and Fixed Intercepts Model Based on LST-R Theory / 31
 - 2.3.3 *Variance Decomposition and Reliability Coefficient* / 32
 - 2.3.4 *Mplus Application* / 32
 - 2.3.5 *Summary* / 34
- 2.4 The ξ -Congeneric Model / 34
 - 2.4.1 *Introduction* / 34
 - 2.4.2 *Model Description* / 35
- BOX 2.6.** Defining the ξ -Congeneric Model Based on LST Theory / 37
 - 2.4.3 *Variance Decomposition and Reliability Coefficient* / 38
 - 2.4.4 *Mplus Application* / 38
- BOX 2.7.** The MODEL CONSTRAINT and MODEL TEST Options in Mplus / 40
 - 2.4.5 *Summary* / 43
- 2.5 Chapter Summary / 43
- 2.6 Recommended Reading / 44
- Note / 44

3 • Multifactor Longitudinal Models for Single-Indicator Data

45

- 3.1 Introduction / 45
- 3.2 The Simplex Model / 45
 - 3.2.1 *Introduction* / 45
 - 3.2.2 *Model Description* / 46
- BOX 3.1.** Defining the Simplex Model Based on LST-R Theory / 48
- BOX 3.2.** Should a Researcher Constrain State Residual or Measurement Error Variances in the Simplex Model? / 51
 - 3.2.3 *Variance Decomposition and Coefficients* / 51
 - 3.2.4 *Assessing Stability and Change in the Simplex Model* / 53
- BOX 3.3.** Endogenous versus Exogenous Variables in Structural Equation Models and Mplus / 54
 - 3.2.5 *Mplus Application* / 56
- BOX 3.4.** Specifying the Simplex Model with Equal State Residual Factor Variances / 57
- BOX 3.5.** Direct versus Indirect (Mediated) Variable Effects in the Simplex Model / 61
 - 3.2.6 *Summary* / 62

- 3.3 The Latent Change Score Model / 62
 - 3.3.1 *Introduction* / 62
 - 3.3.2 *Model Description* / 63
 - 3.3.3 *Variance Decomposition and Coefficients* / 64
 - 3.3.4 *Mplus Application* / 65
 - 3.3.5 *Summary* / 68
- 3.4 The Trait–State–Error Model / 69
 - 3.4.1 *Introduction* / 69
 - 3.4.2 *Model Description* / 69
- BOX 3.6.** Defining the TSE Model Based on LST-R Theory / 72
 - 3.4.3 *Variance Decomposition and Coefficients* / 75
- BOX 3.7.** The Mean Structure in the TSE Model / 76
 - 3.4.4 *Mplus Application* / 79
- BOX 3.8.** Estimation Problems and Bias in the TSE Model / 83
 - 3.4.5 *Computing the $\text{Con}(\tau_i)$, $\text{TCon}(\tau_i)$, $\text{SCon}(\tau_i)$, and $\text{Osp}(\tau_i)$ Coefficients in Mplus* / 85
 - 3.4.6 *Summary* / 86
- 3.5 Latent Growth Curve Models / 88
 - 3.5.1 *Introduction* / 88
 - 3.5.2 *The Linear LGC Model* / 88
- BOX 3.9.** Defining the Linear LGC Model Based on LST-R Theory / 91
 - 3.5.3 *The LGC Model with Unspecified Growth Pattern* / 97
- ~~**BOX 3.10.** Defining the LGC Model with Unspecified Growth Pattern Using the Concepts of LST-R Theory / 99~~
- 3.6 Chapter Summary / 105
- BOX 3.11.** Using Ordered Categorical Observed Variables as Indicators / 109
- 3.7 Recommended Readings / 110
- Notes / 110

4 • Latent State Models and Measurement Equivalence Testing in Longitudinal Studies

113

- 4.1 Introduction / 113
- 4.2 The Latent State Model / 114
 - 4.2.1 *Introduction* / 114
 - 4.2.2 *Model Description* / 114
 - 4.2.3 *Scale Setting* / 116
- BOX 4.1.** Relationships Between the LS and CTT Models / 116
- BOX 4.2.** Available Information and Model Degrees of Freedom in Multiple-Indicator Longitudinal Designs / 117
- BOX 4.3.** Alternative Methods of Defining the Scale of Latent State Variables / 120
 - 4.2.4 *Model Definition Based on LST-R Theory* / 120
 - 4.2.5 *Variance Decomposition and Reliability Coefficient* / 120
- BOX 4.4.** Defining the LS Model Based on LST-R Theory / 121
 - 4.2.6 *Testing ME across Time* / 122
- BOX 4.5.** Levels of ME According to Widaman and Reise (1997) / 123
- BOX 4.6.** Nested Models and Chi-Square Difference Testing / 124
 - 4.2.7 *Other Features of the LS Model* / 125
 - 4.2.8 *Mplus Application* / 126

- BOX 4.7.** Different Ways to Specify and Analyze the Mean Structure in the LS Model / 128
 - 4.2.9 *Summary* / 134
- 4.3 The LS Model with Indicator-Specific Residual Factors / 136
 - 4.3.1 *Introduction* / 136
 - 4.3.2 *Model Description* / 136
- BOX 4.8.** Indicator-Specific Effects in Longitudinal Data / 137
- BOX 4.9.** Defining the LS-IS Model Based on LST-R Theory / 140
 - 4.3.3 *Variance Decomposition and Coefficients* / 142
- BOX 4.10.** Correlated Errors: An Alternative Way to Model Indicator Specificity in Longitudinal Data / 144
 - 4.3.4 *Mplus Application* / 145
- BOX 4.11.** Providing User-Defined Starting Values in Mplus / 147
 - 4.3.5 *Summary* / 151
- 4.4 Chapter Summary / 151
- 4.5 Recommended Readings / 153
- Notes / 153

5 • Multiple-Indicator Longitudinal Models

155

- 5.1 Introduction / 155
- 5.2 Latent State Change Models / 156
 - 5.2.1 *Introduction* / 156
 - 5.2.2 *Model Description* / 157
 - 5.2.3 *Variance Decomposition and Coefficients* / 159
 - 5.2.4 *Mplus Application* / 160
 - 5.2.5 *Summary* / 160
- 5.3 The Latent Autoregressive/Cross-Lagged States Model / 161
 - 5.3.1 *Introduction* / 161
 - 5.3.2 *Model Description* / 162
- BOX 5.1.** Defining the LAS Model Based on LST-R Theory / 164
 - 5.3.3 *Variance Decomposition and Coefficients* / 164
 - 5.3.4 *Other Features of the Model* / 165
 - 5.3.5 *Multiconstruct Extension* / 165
 - 5.3.6 *Mplus Application* / 167
 - 5.3.7 *Summary* / 170
- 5.4 Latent State-Trait Models / 171
 - 5.4.1 *Introduction* / 171
 - 5.4.2 *The Singletrait-Multistate Model* / 172
- BOX 5.2.** Defining the STMS Model Based on LST-R Theory / 175
- BOX 5.3.** Some Guidelines for the Interpretation of the Con, Osp, and Rel Coefficients / 177
- BOX 5.4.** Specifying an STMS Model as a Bifactor Model / 179
- BOX 5.5.** STMS Models without versus with Autoregressive Effects / 185
 - 5.4.3 *The STMS Model with Indicator-Specific Residual Factors* / 186
- BOX 5.6.** Defining the STMS-IS Model Based on LST-R Theory / 188
 - 5.4.4 *The Multitrait-Multistate Model* / 192
- BOX 5.7.** Defining the MTMS Model Based on LST-R Theory / 194

- BOX 5.8.** The MTMS Model with Autoregression / 200
- 5.5 Latent Trait-Change Models / 202
- 5.5.1 *Introduction* / 202
- 5.5.2 *The LST Trait-Change Model* / 204
- BOX 5.9.** Defining the LST-TC Model Based on LST-R Theory / 207
- BOX 5.10.** Alternative Equivalent Ways to Specify the LST-TC Model / 209
- 5.5.3 *Multiple-Indicator Latent Growth Curve Models* / 212
- BOX 5.11.** Defining the Linear ISG Model Based on LST-R Theory / 216
- 5.6 Chapter Summary / 223
- 5.6.1 *Advantages of Multiple-Indicator Models* / 223
- 5.6.2 *Limitations of Multiple-Indicator Models* / 228
- 5.7 Recommended Readings / 229
- Notes / 230

6 • Modeling Intensive Longitudinal Data

231

- 6.1 Introduction / 231
- 6.2 Special Features of Intensive Longitudinal Data / 232
- 6.2.1 *Introduction* / 232
- 6.2.2 *Wide- versus Long-Format Data* / 232
- 6.2.3 *Imbalanced Time Points* / 234
- 6.2.4 *Autoregressive Effects* / 235
- 6.3 Specifying Longitudinal SEMs for Intensive Longitudinal Data / 235
- 6.3.1 *Introduction* / 235
- 6.3.2 *The Random Intercept Model as a Multilevel Model* / 235
- BOX 6.1.** Wide-to-Long Data Transformation of Data in Mplus / 238
- 6.3.3 *The Linear Growth Model as a Multilevel Model* / 243
- 6.3.4 *The Multitrait–Multistate Model as a Multilevel Model* / 247
- 6.3.5 *The Indicator-Specific Growth Model as a Multilevel Model* / 252
- 6.3.6 *Modeling Autoregressive Effects Using DSEM* / 257
- 6.4 Chapter Summary / 276
- 6.5 Recommended Readings / 277

7 • Missing Data Handling

279

- 7.1 Introduction / 279
- 7.2 Missing Data Mechanisms / 280
- 7.2.1 *Missing Completely at Random* / 281
- 7.2.2 *Missing at Random* / 282
- 7.2.3 *Missing Not at Random* / 283
- 7.3 ML Missing Data Handling / 285
- 7.3.1 *Introduction* / 285
- 7.3.2 *ML Missing Data Analysis in Mplus* / 286
- 7.3.3 *Summary* / 290
- 7.4 Multiple Imputation / 290
- 7.4.1 *Introduction* / 290
- 7.4.2 *MI in Mplus* / 291
- 7.4.3 *Summary* / 296

7.5	Planned Missing Data Designs / 296	
7.5.1	<i>Introduction / 296</i>	
7.5.2	<i>Analysis of Planned Missing Data and Simulations in Mplus / 297</i>	
7.6	Chapter Summary / 303	
7.7	Recommended Readings / 305	
	Note / 306	
8 •	How to Choose between Models and Report the Results	307
8.1	Model Selection / 307	
8.2	Reporting Results / 310	
8.2.1	<i>General Recommendations / 310</i>	
8.2.2	<i>Methods Section / 311</i>	
8.2.3	<i>Results Section / 315</i>	
8.3.	Chapter Summary / 320	
8.4	Recommended Readings / 320	
	Notes / 321	
	References	323
